

SERIES: PRFE20W-D | **DESCRIPTION:** DC-DC CONVERTER

FEATURES

- 20 W isolated output
- ultra-wide 18:1 input range
- single/dual regulated outputs
- UL/EN 62368 certified
- meets EN 55032/55035/50155 with external circuits
- 3000 Vdc isolation
- remote on/off
- wide operating temperature range (-40~105°C)

INPUT FUSING AND SAFETY CONSIDERATION

The PRFE20W-D series converters have no internal fuse. In order to achieve maximum safety and system protection, always use an input line fuse. We recommended a 3.15A time delay fuse for all models. It is recommended that the circuit have a transient voltage suppressor diode (TVS) across the input terminal to protect the unit against surge or spike voltage and input reverse voltage (as shown).

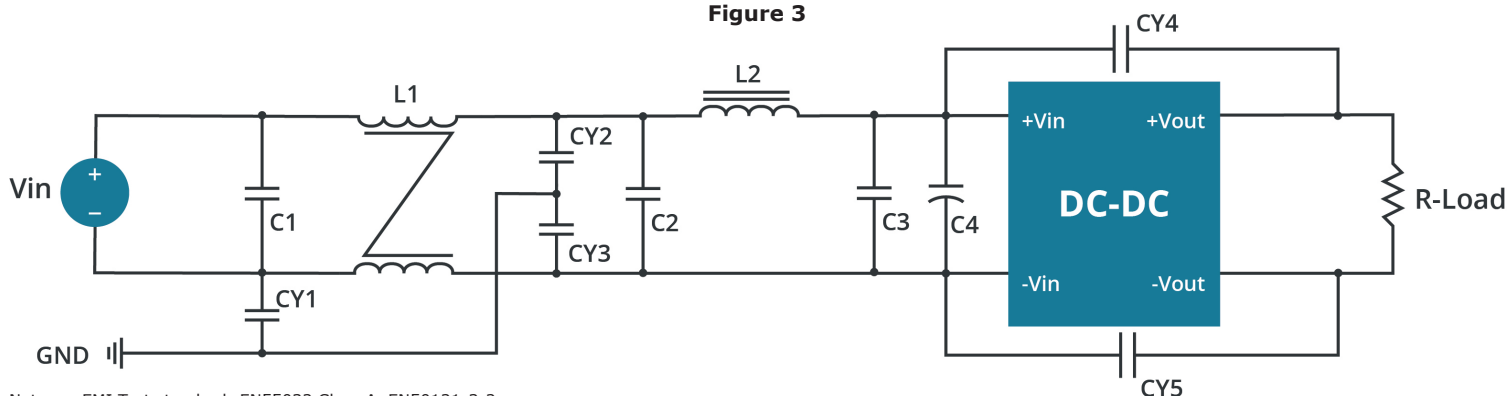

The external TVS & input capacitor (Cin) is required if PRFE20W-D series has to meet EN61000-4-4 & EN61000-4-5. The PRFE20W-D series recommended a TVS & aluminum capacitor (120µF/220V) to connect parallel.
