

Omnidirectional movement

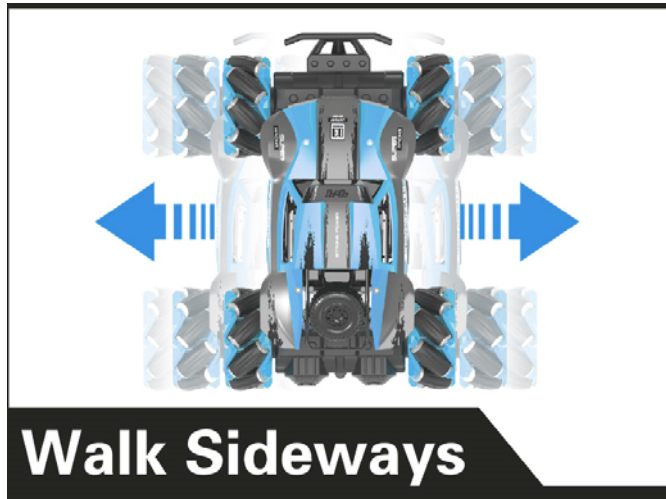

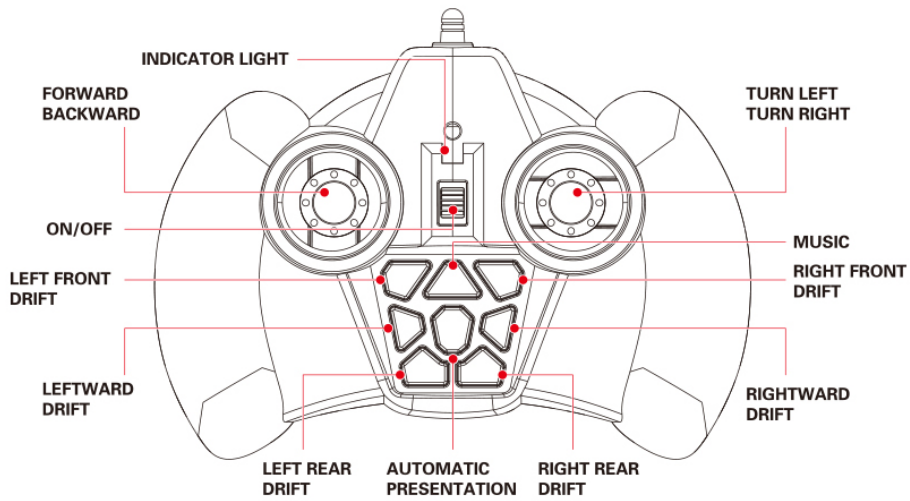

Mecanum Wheel Remote Control Toy Car 1:18 (Blue)

SKU 114090056

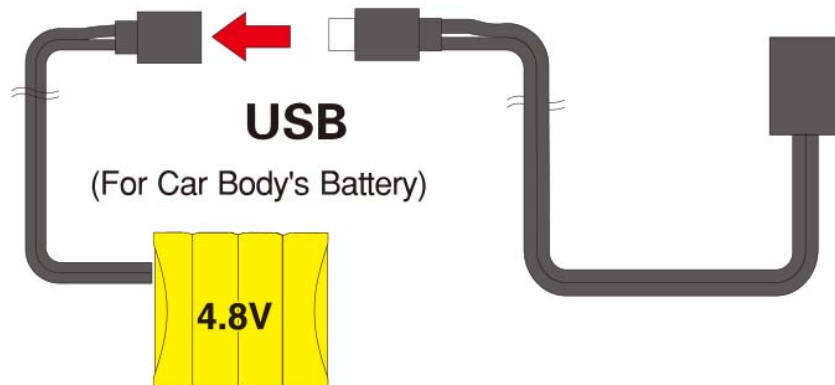

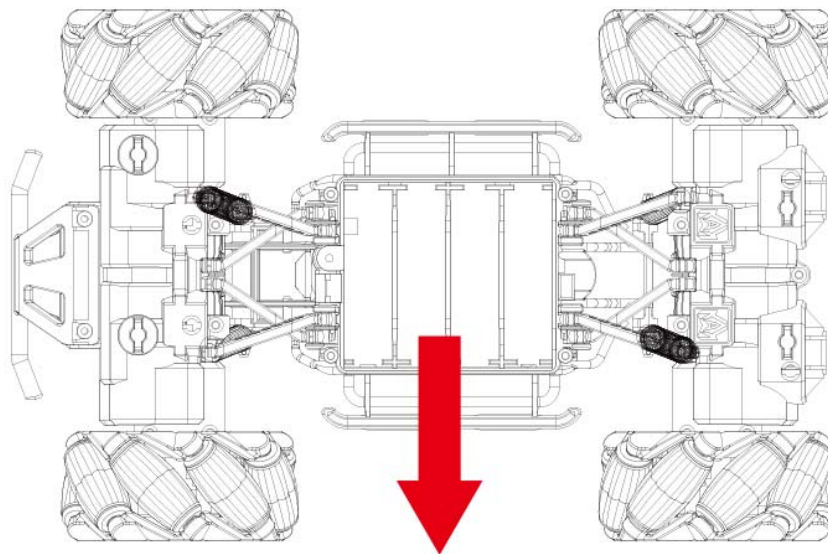

The car has four Mecanum wheels and four separate suspension systems, which means he can move in all directions, and the suspension system allows it to travel on different terrains, which is a very cool toy.

In addition to being a toy, we can also transform it on the basis of it, such as using Arduino/Seeeduno/Raspberry pi to give the car brain, and also use Grove to give it the ability to feel the external data.

2 x 1.5" AA" ALKALINE BATTERIES
(NOT INCLUDED)

Part List :

1 x remote control car

1 x remote control

1 USB charger

1 x car battery

Remarks: no remote control battery
