AIR-SH Series

Aircraft Window Masks

Paint removal masks safeguard windows by forming an impenetrable barrier against chemical action. The masks are pre-cut to aircraft window sizes from high-quality pressure sensitive aluminum foil.

Paint masks fit like a template over the entire window assembly to protect against paint overspray. The material is a strong, crepe-masking tape, pre-cut to window-to-window dimensions and carried on an easily removed liner.

Masks can be ordered in either aluminum for stripping applications, or paper for painting applications. Custom masks for any aircraft can be manufactured to your specifications. Contact customer service for details.

Material: Crepe Paper or Aluminum

Note: Quantity for each kit is predetermined by the number of windows on the aircraft model.

AR-SH & CD-SH Series

Inspection/Identification Arrows and Dots

Inspection/Identification Arrows and Dots can be permanently affixed or removed without leaving any residue. They are color-coded to identify and point directly to problem areas on any equipment.

- Recommended temperatures up to 46°F (7°C)
- Use for flagging, identification, quality inspections or to indicate repair

Material: Paper or Vinyl **Color:** See chart for color coding

EP58-SH Series

Edge Protectors

EP58-SH Series protects PC Board Connector Surfaces. Use during cleaning, dipping, & solder wave. Available in other materials

- Temperatures up to 350°F (177°C)
- Easily cuts to required lengths
- Reusable

Material: Neoprene **Color:** See chart

Note:
Sample will represent one-foot length.
Sold in individual 30" pieces.
