TABLE OF CONTENTS/INTRODUCTION

Cables To Go™ History

Cables To Go started in 1984 in the back room of a small Dayton, Ohio computer store by three men and \$3,000. After 25 years, it has become a leading manufacturer and distributor of computer and audio/video cables and connectivity solutions. The selection of more than 6,000 stock items ensures quick deliverability of what you demand. When you choose Cables To Go, you receive the highest quality connectivity products, a lifetime warranty on all cables, plus free technical support. Cables To Go pledges "Service Through Every Connection" long after you've received your order.

Visit us today at www.cablestogo.com

3555 Kettering Blvd. • Moraine, Ohio 45439

Toll Free: 800.287.2843 • 24-Hour Fax: 800.331.2841

Custom Solutions

Not every connectivity solution is standard. For those applications where a custom solution is needed, Cables To Go can help. We offer domestic shortrun and off-shore large volume, custom design and manufacturing capabilities. All of our custom products receive a lifetime guarantee against defects in workmanship.

Distributors & Resellers

Cables To Go products are widely available through distribution. Our close relationships with the industry's top distributors mean many of our products are just a day or two away from your doorstep. All of our packaging is minimal to keep costs down, while enabling Cables To Go resellers to customize the final solution. Cables To Go is actively seeking new VARs, Integrators, Installers, OEMs and Distributors. Go to www.cablestogo.com/ register to learn more about the exciting opportunities Cables To Go offers.

Terms & Conditions

Prices are subject to change without notice. Custom ordered products are non-returnable and cannot be cancelled. Shipping discrepancies must be reported within five days of receipt. Call our customer service department at 800.287.2843 for more information.

Returns

Please see www.cablestogo.com

Warranties

In addition to individual manufacturers' warranties, Cables To Go offers a lifetime guarantee against defects and labor on all custom and distributed cables. Other distributed products such as switch boxes and computer accessories carry a full, one-year warranty against defects. Warranties do not apply to damage from misuse or consequential damage. Our warranty liability will not exceed the purchase price of a product. Cables To Go assumes no liability for damage and/or injury resulting from use of equipment supplied by this company, including the loss of data.

Placing An Order*

1. Call our tollfree number at 800.287.2843 and speak to one of our connectivity consultants. We are available to help you Monday through Friday from 8:30 a.m. to 6:00 p.m. EST.
2. Go online! Cables To Go is on the Web and ordering has never been easier. Visit our site: www.cablestogo.com – secure ordering is just a mouse click away!
3. Send a fax to our 24-hour fax line at 800.331.2841. Local faxes should be sent to 937.496.2666. Cables To Go accepts Visa, MasterCard, American Express, checks and money orders. We do not add any credit card surcharges. Orders are subject to a \$20.00 minimum order size.

*Please include sales tax for the following states: Alabama, California, Florida, Illinois, Colorado, Iowa, N. Carolina, Ohio, Utah, Texas, Massachusetts, Missouri and Tennessee. This list is subject to change.

Open account terms are available to qualifying resellers only - please contact your account manager at 800.287.2843 for additional information. Cables To Go carries a full inventory of the products highlighted throughout this catalog, which enables us to ship most orders the same business day.

Order it today and receive it tomorrow! **

**Additional shipping charges may apply.

40555	25ft Plenum M/M Stereo Audio Cable	\$54.99
40556	35ft Plenum M/M Stereo Audio Cable	\$64.99
40557	50ft Plenum M/M Stereo Audio Cable	\$84.99
40558	75ft Plenum M/M Stereo Audio Cable	\$119.99

Education Applications

Cabling Needs for the 21st Century Classroom

Benefits:

- Future-Proof Products
- Wide Variety of A/V & IT Connectivity Products
- Customized Cables & Wall Plates Available
- Retail Packaged Products for Student Stores

Applications:

- Whiteboards
- Classroom Projectors
- Digital Signage for the Campus & Cafeteria
- Auditorium Sound Systems
- Data Networking & Server Rooms
- Desktop Solutions for Office Needs
- Security & Surveillance Systems

To ensure students receive the best education possible from Kindergarten through University levels, providers are investing heavily in technological advances. These new technologies give students an edge in learning. With a wide variety of IT and A/V products in stock, you'll remain on the forefront of developing technologies while keeping budgets and time frames within plan.

Identify Your Solution!

We can help you determine the RapidRun® cabling system you need for your whiteboard application. Fill out the selections below and we'll provide a quote.

Selection 1 *

Mark the aluminum wall plate option you typically use in your classroom or installations:

Selection 2

Mark the cable length you would normally use to accommodate the distance from the projector to the wall plate:
 15ft 25ft 35ft 50ft 75ft

Selection 3

Mark the cable length you would normally use to accommodate the distance from the computer to the wall plate:
 3ft 6ft 10ft 15ft 25ft

*For more configuration options, please contact your account manager.

The diagram shows how RapidRun works with Interactive Whiteboards in many classrooms.

DESKTOP SOLUTIONS

Cables To Go™ Desktop Solutions provide PC desktop and laptop users increased functionality, flexibility and value from their systems. From all line cables to UXGA monitor cables and everything in-between, Cables To Go has the right accessories to enhance virtually any computer application. No other manufacturer provides the same product depth, quality and expertise as Cables To Go.

Having multiple computers in the home or office is now commonplace, and with TruLink® KVMs from Cables To Go users can control multiple systems with a single keyboard, mouse and monitor. TruLink KVMs eliminate redundant desktop peripherals, conserving space and power while providing complete control through multiple systems. Built with the finest chip sets and featuring sturdy, all-metal housings, TruLink KVMs are designed for years of hassle-free connectivity. See our full listing of KVM switches and cables starting on page 14.

To provide users greater flexibility with their PC's DVI and VGA video ports, Cables To Go offers a wide range of cables, signal extenders and signal selectors. These cables and devices provide users enhanced control, power and flexibility. See our innovative VGA and DVI solutions starting on page 2.

USB has replaced SCSI, parallel and serial connections as the preferred desktop connectivity bus. With USB cables, adapters and hubs from Cables To Go, users gain control and flexibility through the common USB interface. See our complete listing of USB accessories starting on page 15.

Cables To Go also provides complete connectivity solutions for FireWire®, parallel, serial, SCSI, IDE, SATA, Cat5e and Cat6, power and cable management. See the rest of our quality solutions starting on page 19.

Monitor Cable Resolution Guide

Connection Type	Display Mode	Intended Resolution (pixels)	Resolution (V x H)	Amount Of Colors
HD15	VGA	640 x 480	307,200	256 maximum
HD15	SVGA	800 x 600	480,000	More than 16 million
HD15	XGA	1024 x 768	786,432	More than 16 million
HD15	SXGA	1280 x 1024	1,310,720	More than 16 million
HD15	UXGA	1600 x 1200	1,920,000	More than 16 million
HD15	WSXGA	1680 x 1050	1,764,000	More than 16 million

Understanding Display Modes

SVGA – SVGA offers a resolution of 800 x 600 with 16 million colors possible. Most home and office applications today still operate at this resolution.

XGA – (eXtended Graphics Array) offers a resolution of 1024 x 768 providing an increased resolution over SVGA. Perfect for users desiring a higher quality viewing experience for applications such as: computer gaming, streaming video, graphic design and slide show presentations.

SXGA – (Super eXtended Graphics Array) offers a resolution of 1280 x 1024 providing an increased quality over XGA. High resolution monitors and projectors can accept SXGA resolutions to offer premium results for the same applications used with XGA.

UXGA – (Ultra eXtended Graphics Array) offers a resolution of 1600 x 1200 for high resolution applications. Perfect for an individual connecting a computer to a high definition television or a high resolution projector or monitor.

WSXGA – (Wide Super eXtended Graphics Array) offers a resolution of 1680 x 1050 and is commonly used on widescreen LCD monitors.

Plenum Rated HD15 UXGA Cable With 3.5mm Audio

40681

CMP rated cable jacket enables in-wall installation without the use of conduit

Plenum Rated HD15 UXGA Cables With 3.5mm Audio from Cables To Go are designed for use with video projectors, plasma screens, LCD or CRT monitors, KVM switches and in installations where the cable must perform over long distances. These cables are constructed from three 75-Ohm 28AWG coaxial cables plus three 26AWG twisted pairs and two 26AWG conductors ensuring signal integrity in your installation. The cable is shielded by a tinned copper braid providing a minimum of 85% coverage, by Mylar® aluminum foil and drain wire to provide 100% coverage. CMP rated PVC jacket and Teflon® inner insulators provide the fire protection required to run these cables within walls and air plenums without the need for conduit.

- CMP rated
- FEP and Teflon construction
- Metal HD15 connector housing
- Ideal for video presentations in educational or commercial installations

Plenum Rated UXGA Cables

40248

A necessity when installing video systems in commercial and educational facilities

UXGA is the preferred interface for high quality data and image display especially when longer runs are a factor. This precision cable assembly features three 75-Ohm video conductors, three 26AWG UTP and two 26AWG conductors. The assembly is 100% shielded using a combination of Mylar® foil and copper braid. CMP rated PVC jacket and Teflon® insulation meet all plenum code requirements.

- CMP-rated cable jacket
- Low Smoke PVC outer jacket and FEP, Teflon inner insulator
- Three 28AWG coax cables, three 26AWG twisted pairs, two 26AWG conductors
- Metal HD15 connector housing
- Lifetime warranty

DESKTOP SOLUTIONS

Plenum Rated Panel-Mount UXGA M/F Cables

52103

Fixed in-wall cable installation without the use of conduit

Build VGA functionality into a custom system in the form of a secure and efficient fixed port. Provide access to a PC, monitor or projector with minimal exposure or repositioning. The CMP rated cable jacket allows in-wall installation without the use of conduit. From connections at podiums and kiosks to wall plate mounting, panel-mount cables are a great way to keep your connections clean and professional. Featuring molded screw-style connectors and UXGA compatibility, these cables are available in various lengths to meet your exact specifications.

- Connectors: Metal HD15 Female to HD15 Male
- CMP rated
- FEP and Teflon® construction
- Ideal for monitors, video presentation devices, video splitters and KVM switches
- Includes one pair of 4-40 screws and nuts

45° Angled Premium Shielded HD15 SXGA Monitor Cables

Enables easy installation in the tightest spots

Gain maximum flexibility when positioning your monitor with 45° Premium Shielded SXGA Cables from Cables To Go. The 45° connector on one end of the cable allows installation in even the tightest locations. Constructed from premium grade video cable, this cable uses a combination of coax and twisted pair to accommodate cable runs up to 100ft, without any of the typical distortion problems associated with extended length cabling runs.

- Connectors: HD15 Male to HD15 45° Male or Female
- Constructed from premium grade shielded video cable using a combination of coax and twisted pair
- Accommodates cable runs up to 100ft without a booster (in most applications)
- Ideal for video presentation devices, video splitters and KVM switches

Corporate Solutions

Meeting Your Office Needs

Benefits:

- Over 5,000 Products in Stock, Ready to Ship Same-Day
- Complete Range of Office Solutions from Data Networks to Desktops
- Custom Fiber and Cable Solutions are Available
- Made in the U.S.A. *

Applications:

- DataComm Solutions
- Corporate Communications through Digital Signage, Boardroom Projectors and Sound Systems
- Desktop Control
- Networking Systems

Your corporate solutions needs are where we started our business over 25 years ago. Over the years we have added a few more products on our shelves but the basic philosophy has remained the same, service through every connection. We have the products and support to help you with any configuration, from a small home office to a large-scale data network system.

*Products that are made in the U.S.A. are noted throughout the catalog. Not all Cables To Go products are made in the U.S.A. Contact your sales representative for additional information.

VGA270™ HD15 M/F UXGA Monitor Cables

52050

Rotating 270° connectors on each end move from side to side for ultimate flexibility

Bring ultimate flexibility to your video applications with the patent-pending VGA270 UXGA Monitor Cables from Cables To Go. The 270° HD15 connectors on each end rotate from side to side in almost a complete circle, allowing you to position the cable to fit your installation. The connectors feature detents, or click-stops, every 90° ensuring signal integrity is maintained.

- Constructed of three coax and four twisted pair with an overall foil and braided shield to support the highest video resolutions
- Ideal for connecting presentation equipment, video splitters, monitors and KVMs

Flexima™ UXGA Cables

28243

The ultimate in flexibility and performance

These ultra-thin, highly-flexible cables will not coil up or snag during installation, and the low profile connector will allow installation in places other connectors won't. Featuring ferrites, these high performance double shielded and triple shielded coax monitor cables can go the distance without ghosting and signal distortion.

- Constructed from premium double shielded twisted pairs and triple shielded coax
- Connectors: HD15 Male to HD15 Male
- Ferrites protect against EMI/RFI interference
- Accommodates cable runs up to 100ft without a booster (in most cases)
- Ideal for video presentation devices, home theater and HDTV applications, classrooms, POS, server rooms and more

Ultima™ SXGA HD15 Male To Dual HD15 Female Monitor Y-Cable

29610

Premium style and performance

Ultima Series PC Cables from Cables To Go combine style, quality, performance and value, while giving you the ultimate in cable technology. The connectors are color-coded to match the ports on your personal computer, ensuring a simple connection. Constructed from UL tested and certified cable, the Ultima Series meets the rigid standards of everyday use. The cable is double shielded with a dual foil and braid. Copper foil wraps the undermold, while a 360° solder-to-connector shell and cable braid create an end-to-end shielding solution for a noise-free connection.

- Connectors: HD15 Male to (2) HD15 Female
- Splits a VGA signal to two identical displays
- Ultra-flexible jacket and oversized thumbscrews for easy installation
- Constructed from three individually shielded 75-Ohm coax and four twisted pair to minimize crosstalk, noise and other interference

DESKTOP SOLUTIONS

Panel-Mount SXGA M/F Cables

52092

Fixed VGA connections where you need them

Build VGA functionality into a custom system in the form of a secure and efficient fixed port. Provide access to a PC, monitor or projector with minimal exposure or repositioning. Featuring molded screw-style connectors and SXGA compatibility, these cables are available in various lengths to meet your exact specifications.

- Connectors: HD15 Female to HD15 Male
- Constructed of premium grade shielded video cable which uses a combination of coax and twisted pair
- Accommodates cable runs up to 100ft without a booster (in most cases)
- Ideal for video presentation devices, video splitters and KVM switches
- Includes one pair of 4-40 screws and nuts

Easy Extender 3-In-1 SXGA Desktop Extension Cables

24742

Extend the reach of your keyboard, video and mouse with a single cable

The 3-in-1 Easy Extender Desktop Extension Cable from Cables To Go is ideal for extending your keyboard, monitor and mouse up to 30ft away from your computer or laptop. Single jacket, unibody molding eliminates EMI/RFI interference while cleanly extending your desktop without the cable clutter of ordinary individual extension cable products.

- Connectors: HD15 Male, (2) PS/2 Male-to-HD15 Female, (2) PS/2 Female
- All-in-one design organizes and simplifies cable runs
- PC-99 color-coded connectors for easy identification
- Individually shielded coaxial SXGA lines for crisp, quality video
- Plug-and-play installation
- Single cable construction extends VGA, PS/2 keyboard and mouse
- Flexible, rugged PVC unibody jacket for safety and durability
- Comprehensive EMI/RFI protection via multi-level shielding
- Overall foil and woven braided shield for complete protection

Ultima™ 3-In-1 SXGA Desktop Extension Cables

29633

Professional style and functionality for desktop extensions

For the ultimate in style, flexibility and convenience, Ultima 3-in-1 Desktop Extension Cables from Cables To Go are the ideal solution for extending your keyboard, monitor and mouse up to 30ft from your computer system. Their unibody design features unique VGA and PS/2 breakouts on both ends of the cable, eliminating the mess created by running multiple, individual cables from your system to the desktop. These cables not only look great and provide a neat appearance, but they also are built from high performance components to ensure absolute signal integrity. To protect against EMI/RFI interference, the entire cable features an overall foil and braided shield. Individual coax lines also are individually shielded for crisp, quality video images without ghosting.

- Connectors: HD15 Male, (2) PS/2 Male-to-HD15 Female, (2) PS/2 Female
- All-in-one design organizes and simplifies cable runs
- Individually shielded coaxial SXGA lines for crisp, quality video
- Charcoal gray jacket, gold connectors and PC-99 color-coded connectors for plug-and-play installation

Ultima™ 5-In-1 Desktop Extension Cables With Speaker & Microphone

29629

Extend the reach of your speakers, microphone, keyboard, mouse and monitor with a single cable

Ultima 5-In-1 Desktop Extension Cables from Cables To Go are ideal for extending your keyboard, mouse, monitor, speakers and microphone up to 30ft away from your computer or laptop. Single jacket, unibody molding not only shields your cables from EMI/RFI interference, but it also cleanly extends your desktop without the clutter created by ordinary individual extension cable products.

- Input: HD15 Female; (2) PS/2 Female; (2) 3.5mm Female
- Output: HD15 Male; (2) PS/2 Male; (2) 3.5mm Male
- Comprehensive EMI/RFI protection via overall foil and woven braided shield
- Charcoal gray jacket, gold connectors and PC-99 color-coded connectors for plug-and-play installation

02561

HD15 To 5-BNC Video Cables

The ideal solution for computer and HDTV monitors

HD15 To 5-BNC Video Cables from Cables To Go are constructed from premium quality 75-Ohm mini coax wire to ensure a crisp monitor image. Each wire is shielded with 100% Mylar® foil and 85% copper braid that is soldered 360° to the connector shell, creating a shielding solution for a noise-free connection.

- Connectors: HD15 to 5-BNC
- 28AWG tinned copper coax conductor delivers quality video
- Low-loss 75-Ohm impedance delivers accurate picture, resolution and color
- BNC connectors provide cable matched 75-Ohm impedance
- Aluminum undermold shield assists in reducing EMI/RFI interference
- Breakout cables are color-coded for easy identification
- Mylar® foil and braided shield provides a clear, noise-free, vivid picture
- Fully molded connectors provide excellent strain relief that keeps your cable intact
- Flexible PVC jacket for easy installation
- Designed to work with monitors, HDTV and other video applications
- UL 2919 rated

Item#	Description	MSRP
02561	6ft HD15 Male To 5-BNC Male Video Cable	\$39.99
07573	10ft HD15 Male To 5-BNC Male Video Cable	\$44.99

SonicWave™ RGBHV Video BNC Breakout Cables

Ideal cables for HDTV projectors with RGBHV input

Your expensive HDTV video projector deserves SonicWave BNC Breakout Cables. Component Video Cables are the industry standard for delivering the full measure of performance, and BNC connectors are a broadcast industry standard. SonicWave Component Video Cables ensure state-of-the-art performance through advanced cable design and materials. Precision construction guarantees maximum signal fidelity and a lifetime of dependable performance.

- Connectors: 5-BNC Male to (1) HD15
- Flexcable ultra-flexible PVC jacket for easy installation
- Broadcast quality 75-Ohm component video interconnects feature silver-plated, oxygen-free copper center conductors and nitrogen-foamed PE dielectric
- Three layers of shielding: (2) 80% OFC copper braids and (1) 100% overlapped. Mylar® foil provide maximum immunity to environmental EMI/RFI interference
- Silver-solder construction eliminates the negative effects of dissimilar metals on the delicate video signal

SonicWave™ HD15 To Video RCA Breakout Cables

The right choice for HD15 to component connections

SonicWave HD15 To Video RCA Breakout Cables are specifically designed for digital video and high definition analog video applications. These HD15 to Video Breakout Cables ensure state-of-the-art performance through advanced cable design and materials. Precise construction techniques maintain 75-Ohm impedance to guarantee maximum signal fidelity and a lifetime of dependable performance.

Note: These cables are not compatible with computer monitor ports. Your video source must provide a Y/Pb/Pr component video signal from the HD15 port to use this cable.

- Broadcast quality 75-Ohm component video interconnects feature silver-plated oxygen-free copper center conductors and nitrogen-foamed PE dielectric
- Three layers of shielding: two 80%+ OFC copper braids and one 100% overlapped Mylar® foil provide maximum immunity to EMI/RFI interference
- Silver solder construction eliminates the negative effects of dissimilar metals on the delicate video signal
- Flexcable ultra-flexible PVC jacket for easy installation

Ultima™ HD15 To RCA Video Breakout Cables

HD15 to Component Video

Ultima HDTV Video Cables produce superior HDTV picture quality. Designed for use with satellite TV, HDTV, Y/Pb/Pr Component Video and LCD projectors.

- Connectors: HD15 Male to (3) RCA Male
- 24k gold-plated connectors provide resistance to oxidation for error-free data transfer
- Constructed from three individually shielded miniature 75-Ohm coax cables
- Foil, braid and undermold shielding for protection against EMI/RFI interference

Note: These cables are not compatible with computer monitor ports. Your video source must provide a Y/Pb/Pr component video signal from the HD15 port to use this cable.

DESKTOP SOLUTIONS

DisplayPort™ Cable With Latches

54000

Next generation technology cables

Get the most out of your electronic equipment by using DisplayPort Cables from Cables To Go. DisplayPort is a next-generation technology that delivers high bandwidth digital audio/video signals from your PC to your display. These cables are made from quality materials and are designed to deliver sharp, crystal-clear picture and sound. These cables are Certified DisplayPort cables, adhere to DisplayPort 1.1 standards, and come with a lifetime warranty. Ensure quality and reliability with DisplayPort Cables from Cables To Go.

- Pure digital connection
- Nickel-plated Male-to-Male Molex® connectors
- Fully shielded to protect EMI/RFI (Al/Mylar® wrapped, with copper braid shield)
- 28AWG copper wire
- Supports 10.8Gbps; 12bpc (bits per component), 36bpp (bits per pixel) and 120Hz refresh rate
- Certified DisplayPort 1.1

Item#	Description	MSRP
54000	1m DisplayPort Cable w/ Latches	\$39.99

DisplayPort™ Signal Adapters

54130

Convert a DisplayPort signal to HDMI™, VGA or DVI

DisplayPort is a new license-free, next generation digital standard endorsed by Video Electronics Standards Association (VESA) to provide a way to defeat the limitations of VGA and DVI connections. The DisplayPort interface provides a seamless connection among a broad range of electronics such as PCs and home theater equipment. The durability of DisplayPort also allows it to be compatible with many other digital technologies such as HDMI, VGA/DVI.

- 8in dongle-style adapter
- Nickel-plated DisplayPort Male Molex® connectors
- Molded HDMI, VGA or DVI connector
- 28AWG copper wire
- Al/Mylar® shielded to protect against EMI/RFI
- Pure digital connection; supports video and audio
- Supports full 1080p resolution
- Lifetime warranty

54131	DisplayPort Male To DVI Female Adapter	\$39.99

DVI Connector Guide

DVI (Digital Visual Interface) was developed by the industry body DDWG (the Data Display Working Group) to send digital information from a computer to a digital display, such as a flat-panel LCD monitor. DVI uses TMDS (transition minimized differential signaling) to transmit large amounts of digital data from the source to the display, resulting in a high-quality image. DVI took a step forward in the A/V marketplace with the development of HDMI™, which integrates audio and video into a more compact interface. Most DVI connectors have 24 pins and a single, larger, offset ground bar. These are called DVH interfaces, and carry a digital signal only. Some DVI connectors, called DVH, have four extra pins that surround the offset ground bar. A DVH interface is designed to carry both digital and analog signals. When a DVH connection needs to be adapted to an analog signal, the DVI connector required is known as DVFA.

With DVI technology two bandwidth options exist, single and dual-link. A dual-link interface provides two TMDS links, or groups of data channels, that can carry more than 9.9Gbps of digital video information. A dual-link cable is backwards-compatible with single-link applications. A single-link male DVI plug has pins arranged in two groups of nine with the flat ground bar off to one side. A single-link interface provides only one TMDS link and carries 4.95Gbps of digital information. DVI single link is commonly found on HDMI to DVI adapters since HDMI uses a single link transmission.

Digital Flat Panel DFP - 20-Pin

Mini DisplayPort™ Adapter Cables

Connect a computer with a Mini DisplayPort video output to a VGA, DVI, or HDMI™ monitor

This adapter cable converts a Mini DisplayPort signal for viewing on a VGA, DVI, or HDMI-equipped display. Connect the adapter cable directly to the computer. Then use your existing VGA, DVI, or HDMI cable between the adapter and the display, and enjoy computer video content on virtually any high-definition digital audio/video display.

- Compliance with DisplayPort Specification v1.1a at 1.62/2.7 Gbps data rate
- Encryption Support: DP-CD Rev.1.1; HDCP™ 1.3 with HDCP key-embedded
- Resolution Support: 1080p @ 60 Hz (Full HD)
- Supports WUXGA resolution (1920 x 1200 pixels)

54161	Mini DisplayPort to HDMI	\$24.99
54162	Mini DisplayPort to DVI	\$24.99
54163	Mini DisplayPort to VGA	\$34.99

DVI-I Dual Link Digital/Analog Video Cables

Supports digital and analog displays; digital transmission up to 9.9Gbps

Digital Visual Interface (DVI) is the standard interface for a high performance connection between PCs and flat panel displays, digital CRT displays, projectors and HDTV. DVI Dual-Link Digital/Analog Video Cables from Cables To Go deliver the high performance, high bandwidth interface needed for video displays of today while leaving headroom for the products of tomorrow. These precision-engineered cables are fully compliant with the DVI standard defined by DDWG (Digital Display Working Group). The DVI-D dual link configuration provides enough bandwidth for resolutions up to 2048 x 1536 and allows high-speed digital transmission up to 9.9Gbps.

- Connectors: DVI-I 29-Pin Male to DVI-I 29-Pin Male or Female
- 3 analog 30AWG coaxial lines allow for high-speed analog transmission
- 28AWG copper conductors are individually insulated in hard-density polypropylene to minimize crosstalk ensuring high-speed, error-free transmission
- Shielded undermold protects against unwanted EMI/RFI interference
- Supports hot plugging of DVI display devices
- Supports digital and analog signals

DVI-I Single Link Digital/Analog Video Cables

Supports digital and analog displays; digital transmission up to 4.95Gbps

The DVH single link configuration provides enough bandwidth for resolutions up to 1600 x 1200 and allows high-speed transmissions up to 4.95Gbps.

- Connectors: DVI-I 23-Pin Male to DVI-I 23-Pin Male
- Coax line is individually wrapped in foam-polyolefin insulation and over-wrapped braided copper shield
- Gold-plated contacts provide full conductivity
- Supports hot plugging of DVI display devices
- Compatible with flat panel displays, digital CRT displays and projectors
- DVI-I plug connector can only be inserted into a DVI-I interface
- 28AWG copper conductors are individually insulated in hard-density polypropylene to minimize crosstalk
- Shielded undermold protects against unwanted EMI/RFI interference
- Three analog 30AWG coaxial lines allow for high-speed analog transmission

Easy Extender 3-In-1 DVI Desktop Extension Cables

27945

All-in-one flat panel, keyboard and mouse extension cable

These precision-engineered all-in-one cables are designed to give flexibility in positioning your keyboard, mouse and flat panel away from your computer. The DVI-D segment delivers the high performance, high bandwidth interface needed for video displays of today while leaving headroom for the products of tomorrow.

- Connectors: DVI-D 24-Pin Male, (2) PS/2 Male-to-DVI-D 24-Pin Female, (2) PS/2 Female
- All-in-one bonded cable design organizes and simplifies cable runs
- Dual link digital signaling allows for high-speed transmission up to 9.9Gbps
- 28AWG copper conductors are individually insulated in foam polypropylene to minimize crosstalk ensuring high-speed, error-free transmission
- Tri-shielded with dual Mylar® foil and braid shield, reducing interference
- Ferrite core adds additional EMI/RFI noise protection
- Supports hot plugging of DVI display devices
- Resolutions up to 2048 x 1536 (supports digital signal only)
- PC-99 color-coded connectors for easy installation

M1 Male (EVC) Projector Cables

38048

Multi-function cables for use with newer projectors

M1 (also known as EVC or P&D) Cables from Cables To Go work with projectors and other devices with the new universal M1 connector. M1 can carry both digital and analog signals as well as USB. In addition, M1 with USB allows the use of a wireless presenter, with just one cable!

Compatible with the following projectors:

- ASK Proxima®: C110, C160, C170, C180, C410, C420, C440, C450, C460, M1, M2+, C445, C450, C175, C185, DP1200X, DP1000X, DP8400X, DP8500X
- Dell™: 3200MP, 3300MP, 4100MP, 5100MP
- Hitachi: CP-X1200, CP-X1250
- InFocus®: LP120, LP540, LP600, LP640, LP70+, LP815, LP820, LP840, LP850, LP860, X2, LP70, 4805, 7210, 7205, 5700, SP777, SP4805, SP5000, SP5700, SP7200, SP7205, SP7210, IN32, IN34, IN72, IN74EX
- Toshiba: TDP-T3, TDP-S3, TDP-S2V, TDP-T1, TDP-S1-US, TPD-B1-US, TDP-P4, TDP-P3-US, TLP-X4500U
- ViewSonic®: PJ1172

TruLink® VGA Video Splitter/Extender

39968

Split your VGA signal to multiple outputs with or without audio, up to 210ft away

Simultaneously distribute any VGA video signal to up to eight different video outputs up to 210ft while maintaining exact picture quality with the Video Splitter/Extender (VSE) from Cables To Go. There is no software or complicated interface cards to install. Available with 2, 4 and 8-ports, the VSE is ideal for classrooms, exhibits, trade shows, monitor testing, demonstrations and multimedia presentations. The VSE also is ideal for broadcasting video information such as news headlines, stock prices, airline flights and train schedules.

- Color-coded connectors - HD15 Male input, HD15 Female outputs
- Power and activity LED indicators
- Free technical support and one year warranty
- Suitable for XGA, SVGA, VGA and multi-sync monitors
- Daisy-chain multiple units together for even more outputs
- (2) 100ft Pro Series HD15 M/M UXGA Monitor Cables included with #39991 and #39992

TruLink® UXGA Video/Audio Matrix Switches

39973

Split your video and audio signals from multiple sources to multiple destinations

TruLink Video/Audio Matrix Switches from Cables To Go are ideal for distributing audio and video in classrooms, at exhibits, trade shows and demonstrations and for multimedia presentations. These matrix switches enable the broadcast of audio and video from multiple computers to multiple displays. Any one of the inputs can be broadcast to any or all of the outputs. Built-in video signal enhancement allows you to place monitors up to 164ft away while maintaining your video quality. Switch between computers via push buttons or use the included infrared remote control for PC selection from up to 6ft away. From use in test bench facilities, data centers and help desks to video broadcasting, TruLink Video/Audio Matrix Switches deliver both performance and value.

- Broadcasts the audio and video outputs from up to two or four computers to up to two or four monitors
- Any one of the inputs can be broadcast to any or all of the outputs
- Simultaneously display an image from one source to one of the monitors and an image from the second source to the second monitor
- Built-in video signal enhancement allows monitors to be placed up to 164ft away
- Use the 3.5mm audio outputs to drive either speakers or earphones
- PC selection via push buttons or IR remote control
- Supports video resolutions up to 2048 x 1536
- Suitable for VGA, SVGA, XGA, SXGA, UXGA and multi-sync monitors

Item#	Description	MSRP
39973	2 x 2 UXGA Video/Audio Matrix Switch	\$129.99
39974	4 x 4 UXGA Video/Audio Matrix Switch	\$399.99

TruLink® 2 & 4-Port UXGA Monitor Switcher/Extenders

39972

Display video output from up to four computers on a single monitor or projector - up to 210ft away

The TruLink Video Switcher/Extender will connect the video outputs of up to four computers to one monitor or projector. Daisy-chain more than one switcher to expand the number of computers you can connect. With the built-in video signal enhancement, you can place the monitor up to 210ft away while maintaining your video quality. No software is required and PC selection is easy. Switch between computers via push buttons or use the infrared remote control for PC selection from up to 6ft away. For use in test bench facilities, data centers, help desks, classrooms and multimedia centers, the TruLink Video Switcher/Extender delivers both performance and value.

- Connect video output from up to four computers on a single monitor or projector
- PC selection via push buttons or IR remote control
- Daisy-chain switches to expand the number of computers connected
- Built-in video signal enhancement allows monitor to be placed up to 210ft away
- Supports video resolutions up to 2048 x 1536
- Suitable for VGA, SVGA, XGA, SXGA, UXGA and multi-sync monitors
- Maximum bandwidth - 450MHz
- Input connectors: HD15 Female
- Output connector: HD15 Female

TruLink® VGA With Audio Over Cat5 Extender

39984

Extend your VGA and audio signals up to 1000ft over Cat5e

The TruLink VGA With Audio Over Cat5 Extender allows you to extend your VGA and 3.5mm audio signal up to 300m (1000ft) over a Cat5e Unshielded Twisted Pair (UTP) cable. This solution is ideal for applications where your VGA monitor needs to be placed further than 100ft away. This is common in applications where you need video presentation in one room but want the computer to be out of sight. Driving VGA and audio signals over Cat5e allows you to take advantage of your existing UTP cable infrastructure.

- Extend your analog video and audio signals up to 300m (1000ft)
- Cat5e UTP cabling enables easy and cost effective in-wall installation

Note: This solution requires either a 1-Port or 4-Port base unit and a remote unit for each connected monitor. The base unit and remote units are sold separately enabling a solution that fits your particular configuration.

Item#	Description	MSRP
39984	1-Port VGA w/ Audio Over Cat5 Extender - Base Unit	\$219.99
39985	4-Port VGA w/ Audio Over Cat5 Extender - Base Unit	\$264.99
39986	VGA With Audio Over Cat5 Extender - Remote Unit.....	\$219.99

TruLink® VGA Over Cat5e Video Extension System

39959

39960

Use inexpensive Cat5e cable to extend the distance of VGA video signals

The TruLink VGA Over Cat5e Video Extension System (VES) solution that extends VGA signals up to 300m (1000ft) over a standard Cat5e unshielded twisted pair (UTP) cable and provides signal distribution to up to four displays. The TruLink VES is ideal for applications where VGA-equipped displays need to be placed away from the computer and for environments where multiple displays driven from a common source signal are required. Digital signage environments will benefit from the power of the TruLink VES system.

Distance:	50m	100m	180m	200m	300m
Resolution:	2048 x 1536	1280 x 1024	1024 x 768	800 x 600	640 x 480

Item #	Description	MSRP
39959	TruLink 1-Port VGA Over Cat5e Transmitter	\$179.99
39960	TruLink 4-Port VGA Over Cat5e Transmitter	\$219.99
39961	TruLink VGA Over Cat5e Receiver	\$179.99

TruLink® DVI Over CAT5 Extender

39975

Extend your DVI-D signal up to 50m over Cat5

The TruLink DVI Over CAT5 Extender is a durable solution that allows you to extend your DVI signal up to 50m (164ft) over two Cat5 Unshielded Twisted Pair (UTP) cables. This solution is ideal for applications where your DVI monitor needs to be placed further than the average 20m DVI cable limitation. Driving a DVI signal over Cat5 allows you to take advantage of your UTP cable infrastructure already installed for a costeffective and reliable installation.

- Extend your digital video signal up to 50m (164ft)
- Cat5 UTP cabling enables easy and cost effective in-wall installation
- Ideal for digital signage applications in retail stores, classrooms and boardrooms

Item#	Description	MSRP
39975	TruLink DVI Over CAT5 Extender	\$349.99

TruLink® 2-Port DVI-D Splitter

40312

Split 1 DVI-D output for display on 2 DVI-D compatible monitors

The TruLink DVI-D splitter connects two HDTV displays or two computer monitors equipped with DVI inputs. HDCP compatibility means this splitter will work with high definition video for HDTV applications and high resolution PC applications. Compatible with DVHD equipped PC video cards operating at a maximum resolution of 1920 x 1080 pixels, or with video devices at 480p, 480i, 720p, 1080i, and 1080p scan rates. Built-in DVI repeater allows lossless runs up to 10 meters from the splitter.

- Supports resolutions up to 1920x1080 (1080p)
- Supports EDID and HDCP
- Rugged metal enclosure to prevent damage
- Cascadable up to 4 levels
- Extends DVI-D signals up to 10 meters

Item#	Description	MSRP
40312	2-Port DVI-D Splitter.....	\$199.99

2-To-1 Keyboard/Video Manual Switch Box

03367

Ideal for switching between multiple PCs to a single projector

Ideal for presentations, this box will easily switch between two VGA/SVGA monitors and PS/2 keyboards. Each box has a durable, metal casing which helps prevent any unwanted EMI/RFI interference from distorting the signals.

- 2-to-1 manual switch
- Input/output connectors: HD15 Female and PS/2
- Metal case helps prevent unwanted EMI/RFI interference

Item#	Description	MSRP
03367	2-To-1 AB HD15/ PS/2 KVM Manual Switch Box	\$34.99

DB25 Manual Switch Boxes

03289

The cost-effective way to share devices

DB25 Manual Switch Boxes from Cables To Go are ideal for sharing parallel or serial peripherals. These switch boxes feature a heavy-duty, easy-to-turn rotary switch enclosed in a metal case with rubber feet to protect your desk or table top. The rugged metal case is designed to withstand the rigors of everyday use and to prevent unwanted EMI/RFI interference. Each connector is wired straight through in a pin-to-pin configuration to ensure compatibility.

- 2-to-1 manual switch
- Input/output connectors: DB25
- Rugged metal case helps prevent unwanted EMI/RFI interference
- Not designed for use with laser printers

Item#	Description	MSRP
03289	2-To-1 DB25 Manual Switch Box.....	\$22.99

TruLink® DVI & USB KVM Switches With Audio

52047

Control two or four computers with one DVI monitor, USB keyboard, USB mouse and speaker set; cables included

The 2-Port and 4-Port TruLink DVI And USB KVM Switches With Audio allow you to access, control, boot and reboot multiple USB enabled multimedia computers. You can do this by using only one USB keyboard, mouse, DVI monitor/flat panel display and a speaker set and microphone. The DVI connections support both digital video input (flat panel displays, data projectors, plasma displays and digital TVs) and analog video input (traditional monitors and TVs). In addition, this switch provides two USB ports for device sharing. The independent switching of the KVM, USB peripheral and audio ports allows you to listen to music or use USB devices from one computer while you work on the other. The 2-Port and 4-Port TruLink DVI and USB KVM Switches With Audio provide multi-platform support for PC, Macintosh® G3/G4 and iMAC®.

- DVI digital and analog monitor support
- Computer selection via push buttons or hot-keys
- Built-in 2-port USB hub for peripheral sharing
- Independent (asynchronous) switching of KVM, peripheral USB and audio ports

Item#	Description	MSRP
52047	TruLink 2-Port DVI & USB KVM w/ Audio.....	\$199.99
52048	TruLink 4-Port DVI & USB KVM w/ Audio.....	\$269.99

DESKTOP SOLUTIONS

TruLink® VGA & PS/2 KVM Switches

52042

Control two or four computers with one VGA monitor, PS/2 keyboard and PS/2 mouse; cables included

TruLink KVM Switches are popular among users who have more than one computer system. KVM switches also are used by businesses when one person uses multiple computers.

- Easy to install - no software required - connecting cables to the computers is all it takes
- Switch between the computers manually via the push button port selector switch or with hot-key combinations entered from the keyboard
- Superior video quality - up to 2048 x 1536
- Compatible with all PC operating platforms
- Supports Microsoft IntelliMouse® and the scrolling wheel on most mice

Item#	Description	MSRP
52041	TruLink 2-Port VGA & PS/2 KVM	\$54.99
52029	.5m Console Replacement Cable	\$11.99

TruLink® VGA & USB/PS/2 KVM

35566

Connects up to four computers to one PS/2 or USB keyboard, mouse and VGA monitor; cables included

Get the most out of your desktop peripherals and save space with 4-Port VGA And USB/PS/2 KVM Switches. These KVM switches support both USB and PS/2 mice and keyboards, and the embedded 3-port USB hub allows you to share USB peripherals between your systems. All the cables you need are included so there is nothing extra to buy!

- Allows up to four computers to share one keyboard, mouse and VGA monitor
- Built-in USB 2.0 hub allows up to three USB devices to be shared among the four PCs
- Supports video resolutions up to 2048 x 1536
- Features Auto Scan and Auto Switch
- Offers over current protection
- LED status indicators let you easily see which computer is selected
- Includes an external adapter for power-hungry devices
- Compatible with Windows® 7/98/98SE/ME/2000/XP/Vista and Mac® OS9/X, Linux, and Sun® Micro OS

Item#	Description	MSRP
35555	4-Port VGA & USB/ PS/2 KVM	\$119.99

TruLink® 2-Port PS/2 & USB Micro KVMs With Audio

52043

Control two computers with one monitor, keyboard and mouse

Take control of two PCs and free your desktop from clutter with the TruLink 2-Port PS/2 and USB Micro KVM With Audio. This powerful, compact KVM solution provides everything you need to control two PCs from a single keyboard, monitor, mouse and speaker set. Fully integrated single jacket six foot cables attach to your PCs to eliminate tangles and provide a neat, clean appearance.

No software is required. Hotkey functionality enables you to switch from PC to PC. The KVM's LEDs clearly indicate which system is selected.

- Supports high video resolution up to 2048 x 1536 and a bandwidth of 400MHz
- 3 year warranty with free technical support

2-Port Dual Display DVI/VGA & PS/2 KVM Switches

32562

Unleash the power of extended desktop and use dual DVI displays with two systems

Take advantage of extended desktop in both Windows XP® and Mac® OS/X with the 2-Port Dual Display DVI KVM. Designed specifically for sharing two flat panel displays between two computers while using a common keyboard and mouse.

- Channel selection: Push button or hot key command
- Numerical LED display: 1x 7-segment LED
- Keyboard/mouse emulation: PS/2
- Analog display max resolution: 1920 x 1440
- Digital display max resolution: 1600 x 1200

PC Port Connectors

- 2x PS/2 keyboard 6-Pin Mini-Din Female
- 2x PS/2 mouse 6-Pin Mini-Din Female
- 4x DVI-I single link Female (capable of accepting and supporting DVI-D)

Console Port Connectors

- 1x PS/2 keyboard 6-Pin Mini-Din Female
- 1x PS/2 mouse 6-Pin Mini-Din Female
- 2x DVI-I single link Female (capable of accepting and supporting DVI-D)

TruLink® 2-Port VGA & USB/PS/2 KVM

Connects two computers to one USB or PS/2 keyboard, mouse and one VGA monitor; cables included

This TruLink 2-Port VGA and USB/PS/2 KVM Switch offers a quick and easy way to eliminate clutter from your desktop. It can control two computers with just one keyboard, mouse and VGA monitor. Connect the switch to your computers via USB and VGA by using the included cables.

- Controls two PCs with one PS/2 or USB keyboard, one PS/2 or USB mouse and one monitor
- Three USB 2.0 downstream ports are ideal for sharing USB keyboards and mice or other USB peripherals
- Supports three types of switching: Hardware push button, hot keys on PS/2 keyboard, and On-Screen-Display Utility Software (for Windows®)
- Windows® 7 compatible
- Supports video resolutions up to 2048 x 1536
- Plug-and-play compatible

Ultima™ 5-In-1 KVM Cables With Speaker & Microphone

29621

Connect each of your PCs to a KVM + Audio switch with a single cable

Ultima 5-in-1 KVM Cables are universally designed to work with KVM switches from many leading manufacturers. These cables feature separate keyboard, monitor, mouse, speaker and microphone connectors combined into one cable with breakouts at each end. The 5-in-1 design and color-coded connectors make this cable easy to manage. The VGA cable is built from premium coaxial cabling to ensure superior resolution and eliminate ghosting and fuzzy images.

- Input: HD15 Male, (2) PS/2 Male, (2) 3.5mm Male
- Output: HD15 Male, (2) PS/2 Male, (2) 3.5mm Male
- Lifetime warranty

TruLink® KVM Over Cat5 Extender

39969

Extend the distance between your KVM and your computers up to 230ft over Cat5

The TruLink KVM Over Cat5 Extender is a robust solution that allows you to extend the distance between your KVM switch and your VGA monitor, keyboard and mouse. Place your computers in one location and your console in another, up to 230ft apart. Driving the VGA and USB or PS/2 signals over Cat5 unshielded twisted pair (UTP) cable allows you to take advantage of your UTP cable infrastructure already installed for a cost-effective and reliable installation.

- Extend the distance of your keyboard, monitor and mouse to 230ft
- Keep your computers in a secure, remote location while allowing access to the console
- Plug-and-play solution - no software required
- Works with your existing VGA/USB or VGA/PS/2 KVM switch
- VGA resolutions of up to 1600 x 1200 @75Hz (depending on distance)

Ultima™ 3-In-1 Universal KVM Cables

29625

High performance and 3-in-1 design make this the ultimate choice in KVM cables

Ultima 3-In-1 KVM Cables are universally designed to work with KVM switches from many leading manufacturers. These cables feature single cable construction with separate keyboard, monitor and mouse breakouts at each end. The 3-in-1 design and color-coded connectors make this cable easy to manage. The VGA cable is built from premium coaxial cabling to ensure superior resolution and eliminate ghosting and fuzzy images.

- Input: HD15 Male, (2) PS/2 Male
- Output: HD15 Male, (2) PS/2 Male
- 3-in-1 design keeps cable area organized
- Color-coded connectors for easy identification
- Lifetime warranty

DESKTOP SOLUTIONS

4-Port Rack mountable KVM Switch With On-Screen Display

22391

Control multiple computers with just one keyboard, monitor and mouse

Ideal for home and office applications, KVMs are the easy and affordable way to control multiple computers with a single keyboard, monitor, and mouse.

- High quality video up to 1920 x 1440 with bandwidth of 200MHz
- Supports Microsoft IntelliMouse®, IntelliMouse with Intelli-Eye®, IntelliMouse Explorer® and Logitech Firstmouse+® and Mouseman+®
- Select PCs by push button, hot key or auto scan
- Audible indicator for switching confirmation
- Caps lock, scroll lock and number lock states are automatically saved and restored upon switching
- Hot pluggable - add or remove connected PCs without powering down the KVM
- Auto Scan Mode automatically selects computers sequentially
- Front panel LED display for easy status monitoring
- One HD15 Female port for monitor and two PS/2 Female ports for keyboard and mouse; HD15 Male and PS/2 Female input for video out for KVM to connect to computers

PS/2 Console UTP Extender

22578

Extend your KVM up to 500ft away from your CPU

The PS/2 Console UTP Extender from Cables To Go allows access to a computer system from a remote console (keyboard, monitor and mouse) up to 500ft away. The UTP Extender is ideal for factory and construction sites or any type of installation where the console needs to be kept in a accessible location. It provides the ideal means to access the remote system box, by using inexpensive Cat5 UTP cable, commonly used in Ethernet networks, instead of bulkier, more expensive standard cables. Setup is easy - connect the PC system box and local console to the local module, run the UTP cable to the remote module (up to 500ft away) and plug the remote console into the remote module.

Connectors

- Keyboard: 6-Pin Mini-DIN Female
- Mouse: 6-Pin Mini-DIN Female
- Monitor: 15-Pin HD Male/Female
- Unit to unit: RJ45 8P8C Jack

Item#	Description	MSRP

USB 2.0/SXGA KVM Cables

14175

Just one cable connects your PC to a USB KVM

USB 2.0 KVM Cables from Cables To Go are universally designed to work with USB KVM switches from many leading manufacturers. These cables feature USB 2.0 and monitor connectors combined into one cable that is separated at each end. The 2-in-1 design makes this cable easy to manage while keeping your desktop free of cable clutter. The SXGA cable is built from premium coaxial cabling and ensures superior resolution while eliminating ghosting and fuzzy images. These cables also can be used to connect monitors and USB peripherals directly to your computer.

- Input connectors: HD15 Male and USB A Male
- Output connectors: HD15 Female and USB B Male
- 2-in-1 design keeps desktop organized
- Premium coaxial cabling ensures superior resolution
- Lifetime warranty

Item#	Description	MSRP

USB 2.0/DVI-D KVM Cables

Connect your PCs to a USB/DVI KVM with just one cable

These precision-engineered KVM Cables from Cables To Go are designed to connect your flat panel to your USB/DVI-D KVM. The DVI-D dual link configuration provides enough bandwidth for resolutions up to 2048 x 1536, and allows high-speed digital transmission up to 9.9Gbps. The USB 2.0/DVI KVM Cable meets the rigid standards of everyday use.

- Input Connectors: DVI-D 25-Pin Male and USB 2.0 A Male
- Output Connectors: DVI-D 25-Pin Male and USB 2.0 B Male
- #14179 and #14180 feature 3.5mm M/M connectors for connecting a microphone and speakers
- Shielded under-mold protects against unwanted EMI/RFI interference
- Dual Mylar® foil and braid shield reduces interference
- Gold-plated contacts provide full conductivity with no data loss
- Lifetime warranty

Note: DVI-D supports digital signal only

DVI-D KVM Cables

Connect your PC to a DVI KVM switch with a single cable

These precision-engineered KVM Cables from Cables To Go are designed for connecting your keyboard, mouse and flat panel to your DVI-D KVM. The DVI-D segment delivers the high performance, high bandwidth interface needed for video displays of today while leaving headroom for the products of tomorrow. Enough bandwidth for resolutions up to 2048 x 1536 and high-speed all digital transmission up to 9.9Gbps.

- Connectors: DVI-D 25-Pin Male, (2) PS/2 Male-to-DVI-D 25-Pin Male, (2) PS/2 Male
- Shielded undermold protects against unwanted EMI/RFI interference
- Ferrite core for added EMI/RFI noise protection
- 28AWG copper conductors are individually insulated in foam-polypropylene to minimize crosstalk, ensuring high-speed, error-free transmission
- Mylar® foil and braid shield reduces interference
- Gold-plated contacts for full lossless conductivity
- Supports hot plugging of DVI display devices
- PC-99 color-coded connectors for easy installation

Shielded Cat6a Snagless Patch Cables

The next generation of networking

Experience the next generation of networking with Cat6a Patch Cables from Cables To Go. These network cables enable 10-Gigabit data transmission over a 4-conductor twisted pair copper cable, allowing connection distances of up to 100m. Current Cat6 cabling systems may only support 10-Gigabit Ethernet over limited distances. The Cat6a draft extends the Cat6 electrical specifications from 250MHz to 500MHz. It also proposes a new measurement for Power-Sum Alien crosstalk to 500MHz. Alien crosstalk is a coupled signal in a disturbed pair arising from a signal in a neighboring cable.

- Supports IEEE 802.3af® and is DTE power compliant
- Compatible with T568A and T568B wiring
- Provides NEXT performance beyond 600MHz
- Low-profile hood is ideal for high density switch applications
- A snagless hood design
- PoE rated to four times the standard

Cat6 Molded Snagless Patch Cables

Ultra high bandwidth for mission-critical applications

Cat6 Patch Cables from Cables To Go handle bandwidth intensive applications up to 550MHz and will drastically reduce both impedance and structural return loss (SRL) as compared to standard 100MHz wire. This is accomplished by bonding together each of the individual pairs to help maintain the twist spacing throughout the line right up to your termination point. Constructed from high quality wire and a shortened body plug, these cables will keep NEXT levels to a minimum. The molded, snag-free boot prevents cable snags during moves, adds and changes and provides excellent strain relief. Cat6 550MHz Snagless Patch Cables from Cables To Go are available in a variety of colors to easily colorcode your network installation.

27140

- Connector: 50-micron gold-plated RJ45 Male to Male
- Conductor: 24AWG stranded copper
- Jacket: PVC
- Molded, snag-free boot prevents unwanted cable snags
- Applications:
 - Gigabit 1000 BASE-TX; 100 BASE-TX; 10 BASE-T (IEEE 802.3®)
 - 4/16 Mbps Token Ring (IEEE 802.5®); 100 VG-AnyLAN
 - 100 Mbps TP-PMD (ANSI X3T9.5); 55/155 Mbps ATM
 - Voice: T1
 - High bandwidth applications such as 622 ATM, wideband
- Designed for network adapters, hubs, switches, routers, DSL/cable modems, patch panels and twisted pair applications
- Standard: Cat6 TIA/EIA- 568-B-2.1

Shielded Cat6 Molded Patch Cables

Protect your network data from EMI/RFI interference

Stay ahead of the game with Shielded Cat6 550MHz Snagless Patch Cables from Cables To Go. These high-speed cables are designed to deliver stable performance to 550MHz for distribution of data, voice and video. They will handle bandwidth intensive applications up to 550MHz and beyond and drastically reduce both impedance and structural return loss (SRL) as compared to standard 100MHz wire. Constructed with high quality cable and a shortened body plug, this design will keep NEXT levels to a minimum. Each cable is designed to meet EIA/TIA Cat6 TIA/EIA-568-B-2.1, draft nine standards. For high noise environments or applications where shielding is mandatory, these cables are a perfect fit. A 60% braid over 100% foil grounded to the metal connector shell provides excellent shielding against EMI/RFI. The colored jacket makes these cables easy to distinguish. Whether patched in a panel or used to make the final connection at the desktop, these shielded Cat6 cables provide the performance and look for today's high end networks.

- Connectors: 50-micron gold-plated RJ45 Male to Male with nickel-plated shielded shell
- 24AWG Stranded Copper conductor
- 60% braid over 100% foil shield
- PVC jacket
- Applications:
 - Gigabit 1000 BASE-T; 100 BASE-T; 10 BASE-T (IEEE 802.3[®])
 - 4/16Mbps Token Ring (IEEE 802.5[®])
 - 100 VG-AnyLAN
 - 100Mbps TP-PMD (ANSI X3T9.5)
 - 55/155Mbps ATM
 - T1 voice
- Designed For: Network adapters, hubs, switches, routers, DSL/cable modems, patch panels and other twisted pair applications
- Meets or exceeds all Category 6 TIA/EIA- 568-B-2.1, draft 9 standards

Cat5e Assembled Patch Cables

A cost effective network patching solution that doesn't sacrifice quality

Today's advanced fast Ethernet and Gigabit computer networks require enhanced Category 5 high-speed cabling to distribute data, voice and video. These cables will handle bandwidth intensive applications up to 350MHz and will drastically reduce both impedance and structural return loss (SRL) as compared to standard 100MHz wire. This is accomplished by bonding together each of the individual pairs, helping to maintain the twist spacing throughout the line right up to your termination point. High quality wire and a shortened body plug will keep next levels to a minimum. Patch Cables from Cables To Go are available in a variety of colors to easily color-code your network installation.

- Connector: 50-micron gold plated RJ45 Male to Male
- Conductor: 4-pair 24AWG Stranded Copper
- Jacket: PVC
- Designed For: Network adapters, hubs, switches, routers, DSL/cable modems, patch panels and other twisted-pair applications
- Exceeds Category 5e specifications
- Wired: TSB 568B (AT&T 258A)
- Certification: TIA/EIA

Cat5e Molded Snagless Patch Cables

24814

Wide array of colors and lengths for 10/100 networking

Today's advanced fast Ethernet and Gigabit computer networks require enhanced cat5 high-speed cabling to distribute data, voice and video. Cat5e Cables from Cables To Go will handle bandwidth intensive applications up to 350MHz and will drastically reduce both impedance and structural return loss (SRL) as compared to standard 100MHz wire. This is accomplished by bonding together each of the individual pairs, helping to maintain the twist spacing throughout the line right up to your termination point. High quality wire and a shortened body plug will keep NEXT levels to a minimum. 350MHz Patch Cables from Cables To Go are available in a variety of colors to easily color code your network installation.

- Connector: 50-micron gold-plated RJ45 Male to Male
- Conductor: 4-pair 24AWG stranded copper
- Jacket: PVC / Wired: TSB 568B (AT&T 258A)
- Designed for network adapters, hubs, switches, routers, DSL/cable modems, patch panels and other twisted pair applications
- Exceeds Cat5e specifications
- Certifications: TIA/EIA; UL-Listed

Cat5E 350 MHz Solid Patch Cable

15160

Solid twisted pair cable for high performance networking applications

For voice/data/video distribution, it will handle bandwidth-intensive applications up to 350 MHz. Meets all Cat5E TIA/EIA standards, and drastically reduces both impedance and structural return loss (SRL) when compared to standard 100 MHz wire. Each individual pair is bonded together to help maintain the twist-spacing throughout the line, right up to the termination point. Constructed from high-quality cable and a shortened body plug, this design minimizes Near-End Crosstalk (NEXT) levels.

- Conductor: 4-pair (UTP) 24AWG solid copper
- Connector: 50 micron gold-plated male RJ45
- Jacket: PVC, high density polyethylene insulation
- CSA listed
- Lifetime Warranty

4 & 7-Port USB 2.0 Aluminum Hubs

29563

Add four or seven high-speed USB 2.0 ports to your computer; hard-mountable metal base included

The 4 and 7-Port USB 2.0 Aluminum Hubs conveniently adds four or seven high-speed USB 2.0 ports to your computer. The hub easily slides out of the base making it convenient to travel with as well. The 4 and 7-Port USB 2.0 Aluminum Hub can be self-powered from the USB port or utilize the included power supply. USB-IF certification ensures high-speed data transfers up to 480Mbps. Whether you are downloading or transferring spreadsheets, MP3 files, digital pictures or video streams, this hub will make connecting several high-speed USB 2.0 devices hassle-free.

- One upstream port and four or seven downstream ports
- USB-IF certificated, CE and FCC approved
- Fully compatible with USB 2.0 Specification
- Supports self-powered mode or included AC power adapter
- Downstream ports have automatic connect and speed detection function plus overcurrent protection with auto recovery
- Supports Windows® 98SE/2000/ME/XP and Mac® OS X or higher

USB 2.0 Hub Cable

27402

Connect three USB 2.0 devices and one USB Mini-B device to your computer with just one cable

The 4-Port USB 2.0 Hub Cable from Cables To Go is a unique hub that allows you to connect up to four USB 2.0 devices with just one cable. Three USB "A" Female ports allow you to plug in your USB devices without having them cluttered together. The USB Mini-B Male plug is ideal for connecting digital cameras, camcorders and USB flash memory card readers. Unlike traditional USB hubs, this one eliminates the clutter associated with traditional hubs by saving space with the small form factor, allowing you to spread your devices out and eliminating the need for a separate Mini-B cable.

- Connect three devices with USB A Male connectors such as mice, printers and additional hubs
- Connect your devices with USB Mini-B ports such as digital cameras, camcorders and flash memory card readers
- Compliant with USB 2.0 specifications
- Bus powered - no external power adapters required
- Small form factor - 54.4 x 29.6 x 12mm

7-Port USB 2.0 Hub

29560

Compact, portable design adds seven USB 2.0 ports to your PC or Mac®

The USB 2.0 7-Port Hub from Cables To Go is the easiest and fastest way to connect USB devices to your PC or Mac. Seven high-speed ports allow you to connect an almost limitless number of USB devices including modems, scanners, printers, PC cameras, digital cameras, keyboards, telephones and other high tech appliances. The USB 2.0 7-Port Hub is specially designed for space-saving function and multi-connection convenience. Download and edit your digital pictures, MP3s and video streams with this easy-to-use hub. Each port handles up to 480Mbps, is fully hot swappable and daisy-chainable up to 127 devices.

- Seven 480Mbps 4-Pin USB 2.0 Ports
- Supports 1.5/12/480Mbps transfer rates
- Fully plug-and-play and hot swappable
- Compliant with OHCI Rev. 1.0a and USB Specification Revision 2.0
- Supports self-power mode and has built-in overcurrent protection
- Supports up to 127 devices by cascading

4-Port USB 2.0 Laptop Hub

18459

Connect more USB peripherals to your notebook

The tradeoff between functionality and portability is all too common for laptop users. USB helps alleviate this problem, but some laptops have only one built-in USB port. The USB 2.0 4-Port Laptop Hub from Cables To Go provides three extra ports for connecting peripherals.

- 18in connector cable with an LED indicator
- Fully compatible with USB enabled Macs® and PCs
- Bus powered to eliminate the need for an additional power supply
- USB 2.0 and 1.1 ensures compatibility with all your USB peripherals
- No software required
- Ideal for keyboards, mice and other low power USB devices

Item#	Description	MSRP
18459	4-Port USB 2.0 Laptop Hub	\$29.99

USB 2.0 Manual Switches

30505

Share your USB devices between multiple PCs

The USB 2.0 Manual Switch from Cables To Go lets you conveniently share USB devices between multiple PCs or Macs®. Easily extend the number of USB devices shared by using a USB hub to daisy-chain up to 127 devices. Quickly switch between the two computers with the use of hotkeys. Plug-and-play functionality makes installation a breeze.

- For sharing one USB device between two or four computers
- Compliant with USB 2.0 specification providing data transfer rate up to 480Mbps
- Expand the number of devices shared using a hub to daisy-chain up to 127 devices
- Easily switch between computers by using the port select button or your keyboard
- The LED port status indicator lets you see which computer is selected

USB 2.0 Internal Hubs

29553

Expand your USB connectivity within your computer's case

The USB 2.0 High-Speed Front-Bay Hub from Cables To Go has 4 ports that will connect to either USB 2.0 High-Speed or USB 1.1 peripheral devices. The internal USB hub can be mounted into any 3.5 inch drive bay allowing for hassle free front-side connection of USB devices. With four downstream ports, it is designed to work with mice, keyboards, CD-R/RW's, hard drives, webcams, flash card readers and other USB enabled devices.

- Adds (4) additional USB ports to your system
- Connects to existing USB 2.0 port
- Mounts in an unused 3.5in drive bay
- Plug-and-play installation
- Backwards compatible with USB 1.1 devices
- Support up to 127 devices by cascading multiple hubs
- Supports per port over current detection and protection

Item#	Description	MSRP
29553	USB 2.0 High-Speed Front-Bay Hub 4-Port - Beige.....	\$29.99

29580

A cable is just a cable, right? Not any more! Presenting Illuminated USB 2.0 Cables from Cables To Go. Stop settling for bland by adding a little light to your life with these LED cables! These cables are USB 1.1 and 2.0 compliant so they are fully functional as well as great-looking. The LEDs on the cables provide link confirmation and help color code your USB devices and ports. See immediately that your USB devices are ready for use and stop wondering which cable is connected to which device.

- Ideal for color coding ports to devices
- The LEDs are power/connection indicators too
- Make plug-and-play connections for keyboards, mice, modems, printers and other USB peripherals
- USB 2.0 compliant; supports 480Mbps

USB 2.0 A/A Active Extension Cable

Extend your USB connection up to 80ft

39978

USB Active Extension Cables from Cables To Go buffer the incoming and outgoing signals to ensure compliance with the USB 2.0 specification for electrical and timing minimums. You can connect up to five active extension cables end-to-end to achieve up to 80ft extension! Both low and high-speed USB devices will function equally well with the USB Active Extension.

- Connect up to (5) active extension cables end-to-end to achieve an 80ft extension
- Actively buffers the incoming and outgoing signals to ensure compliance with USB's revision 2.0 specification for electrical and timing minimums
- Connectors: USB Type A Male to Type A Female

USB 2.0 Easy Transfer Cable For Windows

39977

Easily transfer files between compatible Windows operating systems

The USB 2.0 Vista Compatible Easy Transfer Cable from Cables To Go is a hasslefree way to transfer all your files from your older Windows® XP system to the new Vista systems. A simple wizard driven program will walk you through a few simple steps to transfer your files (such as program data files, photos, music and videos), emails and settings from your old system to your new Vista system in no time. This transfer cable can also transfer data between two XP or two Vista systems.

- An easy way to transfer files from your Windows XP to the new Vista platform or transfer files between two XP or two Vista computers
- Transfer data at speeds up to 480Mbps via USB 2.0 connectivity
- Full compliance with USB Specification Revision 1.1 and 2.0
- No external power is required; supported by bus power from either USB port
- Approximately 6ft in total length
- Has USB Type A connectors on both ends; no other cables or adapters required
- System Requirements: Computer with USB port and Window® 98 or later - including Windows® 7.

Note: Windows and Vista are registered trademarks of Microsoft® Corp. This product is not manufactured or endorsed by Microsoft Corp.

USB A/A Style Extension Cables

26686

An economical extension solution

A/A Cables from Cables To Go are designed to extend the reach of your existing USB A/B cable. Foil and braid shielding reduces EMI/RFI interference and twisted pair construction helps reduce crosstalk thus ensuring high-speed, error-free data transfer.

- Connectors: USB Type A Male to Type A Female
- PC and Mac® compatible
- Extend the distance of your existing USB A/B cable
- Designed for use with low-speed, low-power devices only
- Not for use beyond a total extended single length of 5m
- For longer lengths, or high power devices use the Cables To Go Active USB Extension # 39978

Ultima™ USB 2.0 A/B Cables

29141

The ultimate in quality, style and performance

Ultima Series USB 2.0 Cables from Cables To Go combine style, quality, performance and value while giving you the ultimate in cable technology. The sleek design of the molded connectors makes them easy to grip. The connectors are color coded to match the ports on your personal computer or notebook, ensuring a simple connection. Ultima Series meets the rigid standards of everyday use. The USB 2.0 Cable is double-shielded with a dual foil and braid. A metal shield surrounds the connector, while a solder-to-connector shell and cable braid create an end-to-end shielding solution for a noise-free connection.

- Provides high-speed data transfer up to 480Mbps
- 24k gold connectors provide corrosion resistance for error-free data transfer
- Matched twisted pair wires minimize crosstalk for high-speed, error free data transfer

USB 2.0 A Male To Micro-USB Male Cables

27361

Connect a portable device such as a cell phone, PDA or digital camera with a Micro-USB connection to your computer

Micro-USB Cables from Cables To Go allow you to connect to cell phones, GPS systems, PDAs, OTG devices and digital cameras using the Micro-USB connection. The Micro-USB connector's small form factor is ideal for modern small portable devices while offering better performance than previous USB standards. Whether you are replacing a lost cable or looking for a second cable for the office, these cables allow you to quickly and easily transfer data or charge your device.

- Micro-A Male and Micro-B Male cables available to fit your application
- Supports data transfer and power from a computer to many of the new cell phones, GPS systems, PDAs, OTG devices and digital cameras
- Supports transfer speeds of up to 480Mbps
- Micro-USB is smaller and thinner than the previous USB Mini-B standard while offering better performance
- Compliant with USB 2.0 specifications and the on-the-go supplement

USB 2.0 Y-Cables

28107

Increases the amount of power running to a portable hard drive from a PC or Mac®

There are times you may have an external device, such as a portable 2.5" hard drive, and a standard USB cable is not able to transfer enough power to operate the device. This problem can be easily solved by using our USB 2.0 Y-Cables. Simply plug the USB-B end into the device and the two USB-A ends into open USB ports on a single PC or Mac. The cable then pulls power from both USB ports, increasing the output to the external drive.

- Connectors: 1 USB Type B Male to 2 USB Type A Male
- Foil and braid shield reducing EMI/RFI interference
- Red molded hood for auxiliary power
- USB 1.0, 1.1 & 2.0 compliant

Note: This cable is not designed to split USB signals to multiple computers. The two USB A connectors are meant to plug into USB ports on the same computer.

IEEE 1394A® FireWire® Active Extension Cable

39976

Extend your current IEEE 1394A FireWire cable an additional five meters

The IEEE 1394A Active Extension Cable from Cables To Go allows you to overcome the 4.5m length limitation of the IEEE 1394 standard. With this active extension cable, you can now extend your current cable another 5m! This is ideal for any situation where your device needs to be placed away from your computer. The IEEE 1394 Active Extension Cable is compatible with 1394-1994 standards and is fully interoperable with the FireWire implementation of the standard. Data transfer rates of up to 400Mbps are supported and you can daisy chain up to five active extension cables to extend the distance of your cable up to an additional 25m!

- Connectors: 6-Pin Male to 6-Pin Female
- PC compatible; Apple® FireWire, Sony i.LINK® and S400 compatible
- Power supply: Bus power
- Fully supports Open HCI requirements

Note: FireWire and the FireWire symbol are trademarks of Apple Computer, Inc., registered in the U.S. and other countries. The FireWire logo is a trademark of Apple Computer, Inc. This product is not manufactured or endorsed by Apple Computer, Inc.

DB Mini DB Connectors

This is a common connector used in many computer, audio/video, and data applications. The official name is D-subminiature, but many people call it "D-sub" or just "DB". The connector gets its name from its trapezoidal shape that resembles the letter "D". Most DB connectors have two rows of pins. Common types of D-sub connector are DB9 and DB25, used on PCs for serial and parallel ports. One special type of D-sub connector is the High-Density DB style, which looks just like a regular DB connector, only with pins that are slightly smaller and placed closer together. This is typically referred to as an "HD" connector. HD connectors often have three rows of pins instead of two. The most common HD connector is the HD15, which is found on PC video cards and monitors. DB- and HD-connectors use thumbscrews to secure the connector in place. Another type of D-sub is the MD, or Micro DB connector. This connector is slimmer than a standard D-sub, with pins even smaller than the ones used on HD connectors. The MD is also commonly called a "half-pitch" DB connector. These are often used in SCSI applications, and the most popular types are the MD50 and MD68 connections. MD-connectors can use latch clips or thumbscrews as anchoring mechanisms. D-sub connectors are usually described by the total number of pins that they can hold. In some cases, a DB25 connector may only have 4 or 5 pins loaded into it; however, it is still called a "DB25" connector and not a "DB4" or "DB5". Another example is the HD15 connector used by monitors—most monitor cables only are loaded with 14 pins, but are still called an HD15 connector.

Centronics/Mini Centronics

The Centronics connector has a plastic bar in the center of the connector body that holds the contact pins. The body of the connector is often blue in color using latch clips on the sides to hold the connector in place. Centronics connections are commonly found on older printers and some telecommunication applications. The micro Centronics uses a smaller body connector and is commonly found on multi-function printers.

DIN / Mini-DIN Centronics

DIN connectors are round, with pins arranged in a circular pattern. This type of connector is used widely for PC keyboards, MIDI instruments, and other specialized equipment. Another type of DIN connector is the mini-DIN. As the name suggests, mini-DIN connectors are smaller in size than a regular DIN. They are still round, but with the pins arranged in horizontal rows rather than in a circular pattern. Mini-DIN connectors are used for S-Video connections, PS/2 mouse and keyboards, and some other applications. DIN and mini-DIN connectors are both held in place by the friction of the connector body and by pins.

For more details, check out the Connector Guide on our Web site.

TruLink® PC to TV Converter

40698

Convert your computer's VGA video output signal to an s-video or composite video input for your monitor or TV

Simple to install, this converter is ideal for viewing slide presentations, browsing the web, PC gaming, and viewing pictures or movies that are stored on your PC, streamed from the internet or played through the computer's DVD player. The unit supports NTSC/NTSC-J/PAL systems with s-video and composite video outputs. A full-function remote allows users to zoom in/out, adjust vertical, adjust horizontal, flickering filter, color bars, and power. Powered from a standard USB port; two AAA batteries are required for the remote control.

- Reproduction of your computer's video output on any TV or monitor utilizing standard s-video or composite video inputs.
- Converter accepts 640 x 480 pixels (VGA), 800 x 600 pixels (SVGA), and 1024 x 768 pixels (XGA) video signals from a PC

IEEE 1394® FireWire® 4-Pin/6-Pin Adapter M/F

27028

Convert a FireWire 6-Pin Male cable to a 4-Pin Male connector

This FireWire Adapter from Cables To Go provides you with the quality you need to achieve the high-speed performance you expect from your IEEE 1394 devices. Designed to be 100% compatible with Apple FireWire, Sony iLink®, and all other IEEE 1394 peripherals. The FireWire Adapter converts a 6-Pin Male cable to a 4-Pin connector. It is ideal for use with notebooks and other systems with a 4-Pin FireWire port.

- Fully compatible with FireWire, Sony iLink, and all other IEEE 1394 peripherals
- Not for use with bus-powered FireWire peripherals

Item#	Description	MSRP
27028	FireWire 4-Pin Male To 6-Pin Female Adapter	\$9.99

DB9 Female To Mini Din 8-Pin Male

25041

Communication cable for NEC Plasmas and Projectors

The DB9 To Mini Din 8-Pin Cable from Cables To Go sends the communication signal from your control system to your NEC plasma or projector.

- This cable will allow:
 - Communication from an AMX, Crestron, or Extron control system
 - Communication from a PC using the NEC geometric correction tool for adjusting a projector to display an image on a cylindrical, spherical or corner screen
 - Communication from a PC using the NEC image express utility to send images to the projector for presentations as well as basic projector control, projector lamp and error status or asset management
- Connectors: DB9 Female to Mini Din 8-Pin Male
- 28AWG conductors
- This cable will work for the following NEC products with an 8-Pin control port:
 - NT410/510/1000/1100
 - LT30/35
 - LT180
 - LT240/260/245/265

Gender Changers & Adapters

02751

Use your existing cables with these low-cost solutions

Cables To Go offers DB-Style Gender Changers and Adapters. They can be used to join two existing cables. Each will quickly and easily convert the gender of any parallel, serial, game/midi or video port. In addition, they can be used to splice together two existing cables. Save yourself the cost and hassle of having to buy a new cable for each new application by simply changing the gender of your existing port and using the very same cable. Each changer is molded and fully shielded, preventing any unwanted EMI/RFI interference caused from office equipment.

- Connectors: HD15-Pin Female to HD15-Pin Female
- Use: Converts a HD15-Pin Male connection to a HD15-Pin Female connection
- Designed for: Video applications
- Lifetime warranty

USB To DB25 IEEE 1284® Printer Adapter

16899

Use a USB port on your PC or hub to connect a parallel printer

With the USB To DB25 IEEE 1284 Printer Cable from Cables To Go, you can use a USB port on your PC or hub to connect a parallel printer. This is ideal for computers without a parallel port or to free-up the parallel port for a zip drive or scanner. Forget the hassles of IRQ sharing by adapting your high-speed printer to USB. If you have multiple printers, you can eliminate the need for a switchbox by connecting each printer to a USB port. The device is fully transparent to the user and is ideal for true bidirectional communication.

- Connectors: One USB A to DB25 Female
- Auto negotiates hardware recognition for faster protocol setup
- Compliant with USB 1.0 specifications
- Compatible with Windows® 7/98/ME/2000/XP/Vista

Item #	Description	MSRP

Lava Serial PCI & ISA I/O Cards

16637

Add additional serial ports to your PC

Lava PCI & ISA I/O Cards from Cables To Go are the easiest way to add high-speed serial COM ports to your PC. These high-speed serial port cards have become the interface of choice when connecting point-of-sale devices (POS), UPSs, PDAs (e.g. PalmPilot), external modems, serial printers and digital cameras. Lava Serial I/O Cards also are ideal for use in various industrial applications, medical imaging equipment, white box builds and more. All cards come with a lifetime warranty.

- #16637 - Adds (2) high-speed 16550 UART serial ports to any ISA-equipped PC Supports throughput rates up to 115.2kbps
- #16639 - Adds (2) high-speed 16550 UART serial COM ports to any PCI-equipped PC - Supports up to 115.2kbps throughput on each port

Item#	Description	MSRP

Lava EPP 1-Port Parallel PCI I/O Card

16645

Add an additional parallel port to your PC

The Lava Parallel PCI I/O Card from Cables To Go is capable of data throughput rates up to three times faster than standard ISA or motherboard parallel ports. Ideal as an interface to external storage devices (e.g. zip drives), printers and parallel port scanners, the Lava Parallel PCI Card is a speedy low-cost addition to any PCI-based PC.

- Adds (1) 25-Pin Enhanced (EPP) Parallel Port to any PCI-equipped PC
- Auto Configuration
- Lifetime Warranty
- PCI Bus Single 25-pin Enhanced (EPP) Parallel Port
- Easy plug-and-play installation
- Up to 3 times faster data throughput than comparable ISA bus or motherboard parallel port
- Fully supports Enhanced Parallel Port (EPP) standard
- Fully backward compatible with standard 4-bit and 8-bit (bidirectional) parallel ports

Item#	Description	MSRP
16645	Lava EPP 1-Port Parallel PCI Card.....	\$44.99

DESKTOP SOLUTIONS

6-Port USB 2.0 PCI Card

29554

Upgrades older PCs to the current USB 2.0 standard

The High-Speed USB 2.0 Card from Cables To Go is your link to the highest USB speeds available. The 6-port card upgrades desktop computers to the new USB 2.0 standard. With its four external and two internal ports, it is designed to work with mice, keyboards, CD-R/RW's, hard drives, webcams, flash card readers and other USB enabled devices. The High-Speed USB 2.0 Card can transfer data at 480 Megabits per second, making it 40 times faster than previous USB adapters and 20% faster than Firewire.

- Adds (6) active USB 2.0 high-speed ports to your computer
- Plug-and-play installation
- Ports: (6) downstream USB Type A receptacles ([4] external and [2] internal)
- Backwards compatible with USB 1.1 devices
- Downstream ports can handle high-speed (480Mbps), full-speed (12Mbps) and low-speed (1.5Mbps)
- Supports up to 127 devices by cascading multiple hubs
- Interface: 32-bit PCI

Item#	Description	MSRP
29554	6-Port USB 2.0 PCI Card	\$32.99

USB To DB9 Serial Adapters

26886

26479

Easily convert serial devices to USB

USB Serial Adapters from Cable To Go provide an external plug-and-play solution to add up to four RS232 serial devices to a USB-enabled computer. Many newer computers, particularly laptop computers and handheld devices, no longer include legacy serial ports, and desktop computers have reduced the number of serial ports supported. Users with serial devices may find themselves unable to communicate with installed equipment.

- For connecting serial devices to PCs with no available serial port
- Works with PDA, digital cameras, modems, ISDN terminal adapter and other RS232 serial devices
- Supports remote wake-up power management
- 96 byte buffer each for upstream and downstream data flow
- Connectors: One USB A to DB9 Male
- Supports automatic handshake mode
- Over 230Kbps data transfer rate
- Easy installation - no IRQs, no IRQ conflicts
- Windows® 7 compatible

IEEE 1284® DB25 Parallel Cables

06103

For use with printers, scanners and other IEEE 1284 peripherals

- Works with IEEE 1284 compliant printers, tape drives, Iomega® devices, scanners and other IEEE 1284 compliant peripherals
- Connectors: DB25 (A) Male to DB25 (A) Male or Female
- Provides increased speed and functionality over standard parallel cabling
- Maximum end-to-end attenuation not to exceed 1.5dB at 5MHz

DESKTOP SOLUTIONS

Centronics 36 Cables

02681

For use with legacy dot-matrix printers

Gain flexibility and efficiency by positioning your printer in the best location (up to 50 ft. away). Use our superior quality, Centronics-style extension cables. Choose the configuration that fits your needs: male/female to extend an existing parallel cable, or male/male to connect a Centronics switch box to the parallel printer. Each cable is fully molded and foil shielded to block EMI/RFI interference caused by a noisy office environment.

- Male/Female to extend an existing parallel cable
- Male/Male to connect a Centronics switch box to a parallel printer
- Each cable is fully-molded and foil shielded to block EMI/RFI interference caused by a noisy office environment
- Lifetime warranty

IEEE 1284® DB25 To MC36 Parallel Printer Cables

02302

Connects your HP® DeskJet, LaserJet, DesignJet or OfficeJet to your PC

High-speed IEEE 1284 Compliant Cables from Cables To Go enable the added speed and two-way communications offered by your printer. Advanced design and construction ensure maximum performance.

- Designed for use with HP DeskJet, LaserJet, Color LaserJet, DesignJet printers, HP OfficeJet Series, HP 2500C Professional Series Color printer, HP CopyJet Copier, and HP LaserJet 3100 Printer-Fax-Copier-Scanner
- Connectors: DB25 (A) Male to MicroCentronics 36 (C) Male
- Provides increased speed and functionality over standard parallel cabling
- Greater protection against EMI/RFI interference
- Lifetime warranty

Item#	Description	MSRP
02302	6ft IEEE 1284 DB25M To MC36M Parallel Printer Cable	\$20.99

DB25 To C36 Parallel Printer Cables

02707

Connects your uni-directional printer to your PC

Standard Parallel Printer Cables from Cables To Go are ideal for dot matrix and older laser printers. Fully-molded for excellent strain relief, our Parallel Printer Cables provide excellent shielding to protect valuable data from EMI/RFI interference. Each is designed with slotted, textured thumbscrews to make attachment and removal easy. All 25 conductors are wired for compatibility.

- Connectors: DB25 Male to Centronics 36 Male
- Lifetime warranty

Item#	Description	MSRP
02797	3ft DB25M To C36M Parallel Printer Cable	\$5.99

IEEE 1284® C36M To MC36M Parallel Printer Cables

02304

Centronics to MicroCentronics connectivity for non IEEE 1284 Printers

High-speed IEEE-1284 compliant cables from Cables To Go ensure you realize the added speed and two way communications offered by your HP DeskJet, LaserJet, Color LaserJet, DesignJet printers, HP OfficeJet Series, HP 2500C Professional Series Color printer, HP CopyJet Copier, and HP LaserJet 3100 Printer-Fax-Copier-Scanner. This advanced technology, which defines high-speed, bi-directional communications between PC and peripheral, requires both high quality connectors and a specialized wire-type to handle the increased data rates. Seventeen pair wire twisted with at least 36 turns per meter, molded connectors, foil shielding and 85% coverage braid soldered 360° to the connector shell providing maximum resistance against harmful EMI/RFI and achieving the maximum performance for your peripheral.

- Connectors: Centronics 36 Male (B) to MicroCentronics 36 Male (C)
- Provides increased speed and functionality over standard parallel cabling
- Greater protection against EMI/RFI interference
- Maximum end-to-end attenuation not to exceed 1.5 dB at 5Mhz
- Designed for use with HP DeskJet, LaserJet, Color LaserJet, DesignJet printers, HP OfficeJet Series, HP 2500C Professional Series Color printer, HP CopyJet Copier, and HP LaserJet 3100 Printer-Fax-Copier-Scanner

Parallel Laplink® Compatible Cable

02896

Easy-to-use and a real time saver

You can save the time and hassle of downloading to a disk altogether when transferring data from notebook to desktop with Laplink compatible cables from Cables To Go. They enable you to download data directly from your serial or parallel port. Simply use a download program like Laplink® or Interlink™. Choose either 9 pin or 25 pin serial ports for serial cable, or any standard PC parallel port for the parallel version. Cables come fully shielded and molded while carrying a lifetime guarantee.

- Transfer data directly from notebook to desktop PC
- Ideal for use with Laplink or Interlink software
- Fully shielded cable with molded connectors
- Lifetime warranty

Note: Laplink is a registered trademark of Laplink Software, Inc. This product is not manufactured or endorsed by the Laplink Software, Inc.

Modem Cables

05715

For connecting external modems to your computer

Modem Cables from Cables To Go are fully-molded and foil shielded to ensure long lasting data integrity, regardless of modem baud rates. The hoods have office quality appearance with long, easy-grip, slotted thumbscrews for neat and easy connections, all with an industrial strength robustness. With lengths available up to 25ft, your modem can be placed to organize your work area for maximum efficiency and comfort.

- Connectors: DB9 or DB25 Female to DB25 Male
- Foil shielded to protect against unwanted EMI/RFI interference
- Connect a PC to an external modem via the DB9 serial port
- Fully-molded connectors for excellent strain relief

Ultima™ Modem Cables

29619

Color coded with gold plating for added ease of use

Ultima Series PC Cables from Cables To Go combine style, quality, and performance, while giving you the ultimate in cable technology. The sleek design of the molded connectors makes them easy to grip. The connectors are color coded to match the ports on your personal computer, ensuring simple connections. Constructed from UL tested and certified cable, the Ultima Series meets the rigid standards of everyday use. The cable is shielded with a foil and braid.

- Connectors: DB25 Male to DB9 Female
- Provides performance modem connection for the fastest data transfer
- 24k gold-plated connectors provide maximum corrosion resistance for error-free data transfer
- Heavy-duty molded strain relief provides increased flexibility and durability
- 28AWG conductors are insulated in polypropylene to minimize crosstalk, ensuring high-speed, error free transmission
- Aluminum undermold shield assists in reducing EMI/RFI interference to meet FCC requirements
- Lifetime warranty

Ultima™ PS/2 Keyboard & Mouse Cables

Dress up your desktop with these stylish, high performance cables

Ultima Series PC Cables combine style, quality, performance and value, while giving you the ultimate in cable technology. The sleek design of the molded connectors makes them easy to grip. The connectors are color-coded to match the ports on your personal computer or notebook, ensuring a simple connection. The charcoal gray cable jacket not only matches your case but disappears behind your desk leaving a clean, organized look. Constructed from UL tested and certified cable, the Ultima Series meets the rigid standards of everyday use. The PS/2 cable is foil shielded with drain wire. Copper foil wraps the undermold, while a 360° solder-to-connector shell creates an end-to-end shielding solution for a noise-free connection.

- Connectors: 6-Pin Mini-Din
- Compatible with all PS/2 devices
- 24k gold connectors provide maximum corrosion resistance for error-free data transfer
- 26AWG copper conductors ensure excellent signal transmission.
- Aluminum undermold shield assists in reducing EMI/RFI interference to meet FCC requirements
- Lifetime warranty

Value Series 3.5mm Male To 2 RCA Type Male Audio Y-Cables

Connect your PC Audio output to your home audio system

Audio Y Adapter Cables from Cables To Go allow you to split a signal or adapt from one connection to another. These cost effective cables are of higher quality than most standard audio cables giving you crisp, clear sound for less. The dual conductor is 90% spiral-wrapped, which provides shielding against EMI/RFI interference. The connectors are color-coded for easy installation and identification and provide excellent strain relief.

- Connectors: 3.5mm stereo plug to RCA Plug x2
- Brass/nickel plated plugs
- Fully molded connectors provide excellent strain relief
- High quality 26AWG 90% spiral-wrapped copper shielded wire
- Color coded connectors: Red, white

SATA To IDE Converter Board

10153

Update your old devices to be compliant with your new SATA controller

Leverage your investment in existing IDE drives with this hassle-free IDE To SATA Adapter from Cables To Go. The adapter simply plugs into your IDE device, then connects to your SATA controller via a SATA device cable (included). Connecting IDE devices to SATA controllers ensure you get maximum performance while making the most of your hardware investments.

- Compliant with SATA specifications, revision 1.0
- Allows you to connect existing IDE drives to your SATA host adapter
- Plugs directly into the 40-Pin IDE connector; no PCI-slot is required
- One year warranty

Note: Power cable not included. If a power cord is required, see 03164 on page 51 or 03165 on page 52 depending on PC configuration.

10153	SATA Converter Board	\$39.99

2-Device Molded Round ULTRA ATA133 EIDE Cables

50039

Improve airflow in your case while adding a touch of style

Molded Round Ultra ATA133 Cables from Cables To Go deliver the performance you demand from your new UDMA IDE drives. The Molded Round Cables minimize clutter and maximize airflow within your case. The new high-speed UDMA interface allows host computers to send and retrieve data faster removing bottlenecks associated with system performance. The 40-Pin, 80-conductor Ultra ATA133 cable permits higher data transmission rates, reduces crosstalk and improves signal integrity. Ultra ATA133 ribbon cables are designed for use with Ultra 133/100 and Ultra 66 drives, and backwards compatible with Ultra33, IDE/ATAPI hard drives, CD-ROMs, CD-R/CD-RWs, zip drives, LS-120s and other IDE/ATAPI devices.

Note: Your burst rates may vary due to cable length, type of drive and controller used.

- Connector Layout: Blue – System, Gray – Slave, Black – Master
- Ideal for 1U servers and gaming/over-clocked systems
- Ideal for adding style to cases with window panels

Internal Drive Connectors

For many years, desktop computers have utilized the IDC 40 connector as an internal interface for hard drives. The IDC 40, commonly found on motherboards, allows up to two devices to be connected using a single cable. Applications requiring the connection of more than two devices require a connection through a separate IDC 40 on the motherboard, or the installation of an additional host controller card. With the advancement in portable technology the IDC 44 connector was developed for use in laptop computers. Although physically smaller than an IDC 40, the IDC 44 possesses additional pins to supply power to a 2.5in hard drive, eliminating the need for a cable. In addition, the IDC 44 provides a swappable interface for easy installation and removal. With the demand for a faster interface, these IDC connections are being replaced by SATA technology found in new computers today. Older IDC devices can be used with the newer SATA interface using a serial ATA converter board adapter located on page 48. Applications requiring the connection of multiple drives can benefit from the use of SCSI technology.

SCSI is a bus technology which allows devices to be chained together reducing the number of cables connected directly to the computer. In an internal SCSI application, multiple devices can be connected through a single cable reducing congestion and increasing air flow. Most internal SCSI applications utilize an MD50 or MD68 connection which closely resembles a larger IDC 40 connection. Although the parallel SCSI technology is being replaced by the new SAS (Serial Attached SCSI) technology, parallel SCSI is still used today in education, government and some end user applications.

Parallel expansion port with bracket

Ensure smooth data flow from your parallel port with an I/O Add-A-Port Adapter. These adapter cables connect to the motherboard or I/O adapter via flat ribbon cabling.

- Connectors: Internal 26-Pin IDC dual row to external DB25 Female
- Compatible with most brands of motherboard and I/O cards

Item#	Description	MSRP
10338	DB25F Parallel Add-A-Port Adapter With Bracket.....	\$5.99

2-Port Internal Motherboard Adapter

13413

Add ports to your computer

The 2-Port Internal Motherboard Adapter is a cable that adapts the header pins from most AT style Pentium® and newer motherboards to two standard sockets. This bracket will provide the missing link to PCs that have builtin capabilities, but have no connectors on the PC to utilize it. The 2-Port Panel Bracket connects to an internal board connector to provide two ports on the back panel.

Item #	Description	MSRP

13403	2-Port USB Internal AT Motherboard Adapter	\$11.99

SATA To eSATA Dual Port Adapter

13423

Converts two internal SATA connectors to the new External SATA connectors

The new SATA to eSATA Dual Port Adapter from Cables To Go adds eSATA ports to any SATA controller. This eSATA slot plate adapter allows you to take the high-speed of SATA outside your computer case. Just install the adapter plate into an open I/O slot on your computer. Then connect the cables to the SATA connectors on your motherboard or SATA controller card. This will allow you to connect eSATA drives that use the new eSATA connector.

- Slot plate bracket converts two internal SATA connections to the new eSATA connector
- Easily fits in any PC slot

Item#	Description	MSRP
13423	SATA To eSATA Dual Port Adapter	\$14.99

Outlet Saver Power Extension Cables

03137

Keeps your surge strip and UPS outlets free

Outlet Savers from Cables To Go keep your surge strip and UPS outlets from being blocked by bulky AC transformers. All power cables feature a fully-molded design that provides maximum durability and long life.

- Cable Type: Heavy-duty 18AWG
- Connectors: 3-prong grounded plug Female (NEMA 5-15-R) to 3-prong grounded plug Male (NEMA 5-15-P)
- Design: Female connector plugs directly into the device power cable and male connector plugs into the standard outlet
- Compatibility: Power transformer, computers, monitors, scanners, printers and other devices that use a 3-Pin Male to shroud power connector

Power Cord Splitters

Keep your surge strips and UPS outlets free

Manage your power more efficiently with the new Power Cord Splitter from Cables To Go. This splitter features one Male 3-prong plug which splits to multiple Female 3-prong plugs. Simply plug the power cord splitter's Male prong into an outlet and you're ready to power multiple electronic devices. Save space by eliminating extra cords and keep your surge strips and UPS outlets free. These cords are ideal in a compact workplace or home office where there is a need to run electronic equipment in a limited space.

- Cable Type: Heavy-duty 18AWG
- Design: Female connector plugs directly into device power cables and Male connector plugs into standard outlets
- Compatibility: Power transformers, computers, monitors, scanners, printers and other devices that use a 3-Pin Male-to-Female shroud power connector

MOBILITY SOLUTIONS

In many homes and businesses, the laptop PC has replaced the desktop system. The introduction of MP3 players and iPods® eliminated the use of the Walkman®. New technology demands new accessories designed to support the latest advances. Innovative mobility solutions from Cables To Go™ provide users flexibility and functionality.

Our iPod® docking stations and cables help users stay synced, charged and connected. Our wide range of MP3 player accessories provide the additional functionality not included with iPods and MP3 players out of the box. See our iPod and MP3 Player accessories starting on page 60. Laptops require mobile peripherals that are easy to organize and carry.

iPod® Compatible Power Adapters

For use with Apple® iPod portable music players or USB device

The USB charging cable for your cell phone or PDA is great - it charges quickly while you are at your PC. But what happens when you are away from your PC? The AC Power Adapter from Cables To Go lets you charge your devices with your USB cable no matter where you are. Plug the adapter into any 110V AC outlet and begin charging. In no time, you'll fully charge your cell phone or PDA battery. The lightweight design of the AC Power Adapter makes it ideal for travel, and far easier to carry than that heavy "power brick" that came with your device.

- Perfect for charging your cell phone or PDA via your USB charging cable
- Auto adjusts to voltage and frequencies worldwide
- LED indicates proper charging
- AC Adapter: Output: 5V DC, 1A, 5W (max) - Input: 100-240V AC, 0.15A, 50-60Hz. Certifications: UL, FCC, CE
- DC Adapter: Output: 5V DC, 850mA - Input: 12-24V DC Certifications: CE

All your iPod compatible essentials in a convenient travel case

Keep your Apple® iPod cables and accessories organized and at your fingertips. At home or on the go, make sure you always have the connections you need to power your device and enjoy your music - and eliminate the mess of jumbled, tangled cables! Additional included accessories allow you to sync and charge your iPod, connect directly to an external sound system and share music with a second headphone listener.

- FM transmitter broadcasts music files over an available FM station (Range: 87.9-107.9MHz, .1MHz interval)
- iPod dock to 3.5mm cable provides a direct stereo connection to another sound system
- Headphone splitter cable enables music sharing with a second listener
- iPod dock to USB cable connects to your computer to charge and sync your iPod
- AC and DC adapters provide power at home or in the car
- Compatible with any iPod with a dock connector

MOBILITY SOLUTIONS

Audio CrossPlay™

52065

Share two audio devices (MP3 player, etc.) between two audio outputs (speaker, headphone, etc.)

The Audio CrossPlay is ideal for sharing portable devices among different outputs. It also is ideal for sharing two separate portable audio devices between two users. One or both of the audio inputs can be sent through either audio output. Plug in two different MP3 players and listen to one or both through headphones, speakers or both. Or, connect a laptop or desktop and switch between headphones and speakers without having to disconnect the speakers/headphones each time. The mute feature allows silencing of each output independently so everything can be left connected even when not in use.

- Fits in the palm of a hand making it a truly portable solution
- Connect up to (2) 3.5mm (.125in) output devices such as speakers, headphones and audio jacks on computer
- Connect up to (2) 3.5mm (.125in) input devices such as MP3 players, CD players, laptops, desktops and DVD players

FlexUSB™ Adapter

30501

180° rotation of the adapter allows you to connect your USB devices in almost any position

The FlexUSB Adapter from Cables To Go is the ideal solution for connecting your USB devices to your laptop, PC or Mac®. Notebook work areas such as airline tray tables, small coffee shop tables, or a person's lap offer minimal space which limits the user's ability to effectively connect one or multiple USB devices. FlexUSB Adapters feature a patent pending design with both horizontal and vertical hinges for a flexible connection.

- Use with existing an USB cable
- Ratcheting positions provide stability to hold the adapter in the position you desire
- Works on both Windows® and Mac platforms
- Ideal for connecting all your USB devices such as portable USB storage devices, CD/DVD drives, MP3 players, wireless devices, external input, mice and more
- Compatible with USB 2.0 (High Speed)

USB Notebook Light

28230

The ideal solution for dark airplanes and hotel rooms

Don't be left in the dark! The USB Notebook Light from Cables To Go ensures you have light to do your computing when you need it most. Use it on the plane, during a dimly lit presentation, or in bed. Great for travelers and students alike, this featherweight light illuminates your keyboard without distracting others around you. The USB Notebook Light plugs directly into an available USB port so no external power supply is needed. The flexible neck allows you to arrange the light in any position you like, yet it is rigid enough to hold its shape. The LED light reliably provides light for up to 8,000 hours, so you'll never be caught in the dark again!

- Flexible jacket bends easily
- Jacket is rigid enough to hold shape
- LED provides up to 8,000 hours of use
- Provides enough light for your personal use - will not distract others
- Powered by an available USB port so no external power is needed
- Lightweight and compact design makes it a great travel companion

Silex USB Fingerprint Reader

34018

Use Fingerprint technology to secure your PC

The Silex USB Fingerprint Reader is the ideal solution for desktop and laptop security. Security is a rising concern for business owners and personal users alike. This unique device utilizes USB technology to provide fingerprint recognition as a login to your PC. With the Silex USB Fingerprint Reader, you can control access to sensitive information such as financial data, intellectual property and personal records, enhancing your PC's security. This device utilizes Silex's own fingerprint authentication algorithm that provides an unmistakable and accurate personal identification solution.

- Meets the government requirement of 500 dpi
- Fingerprint authentication can be used for logging in to a PC, to unlock screen savers, and can activate applications or be used for "members only" web pages
- File encryption prevents accidental or corrupt information leakage
- Supports 360° finger placement
- High quality matching software achieves False Rejection Rate (FRR) of 0.1% and False Acceptance Rate (FAR) of 0.001%. Minutiae data is only used for matching thus privacy is secured
- Supports Windows® 2000/XP

54Mbps Wireless Laptop PC Card

30708

Go wireless with this easy to use PC card

The 802.11g PC Card is a wireless PC Card that offers 54Mbps data rate with 2.4GHz frequency from the latest IEEE 802.11g® wireless standard. The 802.11g standard operates in the 2.4Ghz frequency band similar to 802.11b, providing a throughput up to 54Mbps by using a different radio technology in order to boost overall bandwidth. The PC card offers peer-to-peer connection via notebook Ethernet LAN/WAN connection.

- Easy to setup, and offers security protection with industry standard WEP (Wired-Equivalency Privacy) 64-bit or 128-bit encryption and WPA/WPA2.
- Data Transfer Rates: IEEE 802.11g: 6, 9, 12, 18, 24, 36, 48, and 54Mbps or IEEE 802.11b: 1, 2, 5.5, 6, 9, 11Mbps
- PCMCIA Type II, 32-bit interface is ideal for use with your notebook
- Driver Support: Windows® 2000/XP/Vista
- Network Protocols: TCP/IP, IPX, NDIS3, NDIS4 and NetBEUI
- LED Indicator shows RF/Link activity
- Operation Range: Indoor 100m and Outdoor 300m (distance varies with data rate at different usage environments)

Polarized 2-Slot Power Cord

27399

Replacement power cord for notebooks and other polarized devices

The Polarized 2-Slot Power Cord from Cables To Go is designed to work with notebooks, VCRs, DVD players and other devices that use a 2-Slot polarized A/V power cord. All Cables To Go power cables feature a fully molded design that provides maximum durability and long life.

- Cable type: Heavy-duty 18AWG
- Connectors: Panasonic polarized Female (IEC-320-C7) to 2-prong plug Male (NEMA 1-15-P)
- Design: Female connector plugs directly into device, and Male connector plugs into standard outlet
- Compatibility: Notebooks, VCRs, DVD players and other devices that use a 2-slot polarized power cable

Notebook Surge Suppressor

29799

On-the-go protection

Pack a little notebook protection with your next business trip. The 2701x Surge Suppressor from Cables To Go isolates damaging spikes and surges, safeguarding your sensitive electronics and precious data. The negative effects of EMI/RFI are also kept in check by a builtin noise filter.

- \$2,500 protection insurance for connected equipment
- Output connectors: 1 NEMA 5-15 receptacle, (2) RJ11
- Line protection: (hot, neutral, ground)
- Approvals: UL 452, 497A, 1283, 1363, 1449, 1492.
- EMI/RFI noise reduction: Up to 43dB
- Energy dissipation: 270 Joules
- Electrical rating: 125V, 15A, 1875W
- Max surge voltage: 330 volts
- Clamping time: 1ns (nanosecond)
- Maximum spike current: 4500A
- Exclusively for indoor use

Digital Signage Solutions

For Large & Small Applications

Benefits:

- Complete Array of Distribution Devices, Cables and Connectors
- New, Wireless VGA for Small-Scale Applications
- Option of Digital or Analog Cabling to Fit Your Needs
- Long and Short Run Product Solutions In-Stock

Applications:

- Retail Stores
- Corporations
- Bars and Restaurants
- Hotels
- Supermarkets
- Banks
- Entertainment Venues
- Schools
- Airports
- Government Facilities

Digital signage systems are being used in many different industries today. To help you decide which digital signage solution best fits your needs, consider a few basic requirements: number of displays, distance from source to display, and whether or not your content will include audio. With this information, we can help you begin designing your digital signage system today.

AUDIO/VIDEO SOLUTIONS

Cables To Go™ understands the wide-ranging needs of the audio/video market. Audio/Video Solutions from Cables To Go feature a broad offering of precision-crafted cables and powerful, yet easy to use active devices.

High definition digital video and audio are staples for today's entertainment systems, and Cables To Go has the connectivity solutions needed to support these fast-growing technologies. From home use to commercial settings, our Value Series, Velocity™ and SonicWave™ cable lines cover a broad range of performance specifications including HDMI™, DVI, component video, Toslink®, digital coax and analog audio and video cables. Learn more starting on page 75.

Take greater control and extend A/V systems with active devices from Cables To Go. Selectors, converters, extenders and splitters all bring greater functionality to A/V systems. These products can be found starting on page 76.

SonicWave™ HDMI™ High Definition Cables

40278

Ultimate performance for HDTV applications

High performance home theater cables for Blu-Ray™ and upconvert DVD players, HDTV receivers, TV sets, projectors, A/V receivers and other HDMI-equipped devices.

- HDMI (V.1.3 Deep Color, x.v.Color™, Dolby True HD™, DTS-HD Master Audio™)
- 1080p+ resolution up to 120Hz refresh rate, up to 16-bit and beyond
- Lossless multi-channel digital audio for full 7.1 surround
- High bandwidth (340MHz/10.2Gbps) for high-speed data transfer
- HDMI-CEC system control compatibility with SimplayHD™ verified performance
- CL3-rated jacket for in-wall applications
- Lifetime warranty

Velocity™ HDMI™ Mini To HDMI High-Speed Cables

40436

Easily adapt an HDMI mini connector to an HDMI connector

Some newer electronic devices, including camcorders and digital cameras, are equipped with new HDMI mini connectors to carry high resolution content. Quality Velocity HDMI Mini To HDMI High-Speed Cables easily adapt an HDMI mini connector to an HDMI connector ensuring a high quality, low-loss connection. Enjoy high resolution digital video and digital audio directly from your camcorder or camera on your HDTV. These fully-functional, high bandwidth cables are tested to perform at industry standards and are backed by a lifetime warranty.

- HDMI (v1.3 with Deep Color, x.v Color™)

AUDIO/VIDEO SOLUTIONS

Product Line Comparison

SonicWave™

SonicWave is for the audio/video expert who demands absolute signal integrity, spectral clarity and phenomenal accuracy. SonicWave Series audio/video cables achieve unsurpassed performance through revolutionary cable design, meticulous construction and carefully selected materials. The twisted-pair, silver-coated, oxygen-free copper (OFC) wire and low-dielectric Teflon® insulation deliver optimum signal transfer for exacting image and sound reproduction. CU Shielding Technology™ is an extruded sandwich of three interconnected layers of shielding, two 80%+OFC copper braids and one 100% overlapped Mylar® foil. Our exclusive SplitLok™ connectors are 24k gold-plated metal units.

Velocity™

The Velocity series of audio/video cables and bulk speaker wire provides excellent signal integrity for today's A/V enthusiast. These modestly priced, high-performance cables provide a stunning depth of sight and sound when tested against to other comparably priced audio/video cables. Twisted pair oxygen-free copper (OFC) wire and rubberized silicone or foam polyethylene dielectric provide optimized audio clarity and imagery. The low-loss, 100% Mylar® foil and braid shielding offers superior protection against noise and interference. The color-coded molded connectors attach to a UL-listed blue jacket allowing for easy installation and channel/function identification. The 24k gold-plated contacts ensure a corrosion free interface for long lasting, sonic quality - free from distortion.

Value Series

The Value Series of cables and bulk cabling from Cables To Go delivers high signal clarity of picture and sound geared toward the cost-conscious consumer. Connector contact points are gold plated to create an oxidation resistant barrier. The PVC overmold is color-coded to indicate video or stereo channels and is flexible to provide excellent strain relief. The UL-listed wire is 99.9% pure, 24-28AWG copper wrapped in a black PVC jacket. The 100% foil/60% braided shield (for the interconnects only) ensures accurate sound reproduction and guards against the negative effects of EMI/RFI. Spiral-wrapped, copper shielding and foam polyethylene are used where applicable to provide solid imaging. We demonstrate our absolute confidence in this full-function product line by offering a lifetime warranty. The Value Series provides clear sight and sound for less.

AUDIO/VIDEO SOLUTIONS

Connector Reference Guide

HDMI

DisplayPort

DVI

DVI-A

DVI-D

DVI-I

Dual Link

Single Link

HDMI™

Developed by Sony, Hitachi, Thomson (RCA), Philips, Matsushita (Panasonic), Toshiba and Silicon Image, HDMI was created as a digital interface standard for the consumer electronics market. The HDMI protocol combines high definition video, multichannel audio, and inter-component control in a single, digital interface. This cable has the ability to transmit uncompressed digital video from source to display. Even more, the HDMI connection enables audio/video components to share data and commands, thus unifying an offdisjointed collection of boxes into a functional, working system. HDMI is also fully compatible with computers and display devices, incorporating the Digital Visual Interface (DVI) standard.

DisplayPort™

DisplayPort is an interface technology that is designed to connect high-graphics capable PCs and displays as well as home theater equipment and displays. Like HDMI and DVI, DisplayPort utilizes TMDS link technology to send high-bandwidth video and audio signals. The 20Pin connector allows the contact point to send maximum data rates of 8.64Gbps plus 1Mbps for the AUX channel, which can carry additional data.

DVI

The DVI connection was designed as a replacement for the P&D (Plug and Display) standard, itself an upgrade from the digital-only DFP format. Designed primarily to connect a computer to an LCD flat panel monitor, DVI has found applications in advanced consumer electronics image devices where it is used to deliver digital video from a source to a display.

DVI-A

The "A" in DVI-A stands for analog. DVI-A is seldom encountered in the multimedia realm. Therefore, we do not offer a DVI-A cable.

DVI-D

Digital video at last! DVI-D transfers uncompressed digital video in its native format between components. DVI-D precludes the typical digital-to-analog/analog-to-digital conversions between a computer's video card and monitor to provide higher quality and a faster interface.

Note: DVI-D cannot be adapted to VGA. Contact your Cables To Go Representative for assistance.

DVI-I

Combine DVI-D and DVI-A on the same cable and you get DVI-I. The "I" stands for integrated. DVI-I does not convert a DVI-D to a DVI-A, or vice versa. It simply enables all 29 pins to conduct so that the cable is dual use. It wouldn't be uncommon for a manufacturer to use a DVI-I connector as the receptacle to allow for the use of both DVI-I and DVI-D cables, even if the analog transmission ability is never used.

DVI Single Link Or DVI Dual Link

DVI uses a digital information format called Transition Minimized Differential Signaling (TMDS). Single link cables use one TMDS transmitter, while dual link cables use two. A single link DVI connection supports a 1920 x 1080p image at 60fps. In the context of an audio/video theater system, DVI-D single link is 1080p compatible. HDMI uses a DVI-D video transport system, so HDMI is also 1080p compatible. A dual link connection supports up to a 2048 x 1536 image. The DVI dual link connector uses 24 of the possible 29 pins found on a DVI connector. A single link DVI cable enables 12 of those 24 DVI dual link pins. For audio/video applications, a single link cable is the correct choice.

Note: HDMI, the HDMI logo and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI licensing LLC.

AUDIO/VIDEO SOLUTIONS

Velocity™ High-Speed HDMI™ Cables

40314

Connect digital A/V sources with receivers, TVs and displays

Velocity High-Speed HDMI Cables deliver a strong combination of performance and value. High resolution digital video and true digital audio are delivered together in one convenient, compact connection. Fully-shielded conductors provide complete immunity to EMI/RFI interference and 24k gold-plated connectors ensure superior signal transfer.

- HDMI (V.1.3 with Deep Color, x.v.Color™, Dolby True HD™ and DTS-HD Master Audio™)
- High performance home theater cables for high definition DVD players, HDTV receivers, TV sets, projectors, A/V receivers and other HDMI-equipped devices
- Up to 1080p resolution at 60Hz refresh rate
- Lossless multi-channel digital audio for full 7.1 surround
- High bandwidth (340MHz/10.2Gbps) for high-speed data transfer
- HDMI-CEC system control compatibility

Digital 360° Rotating Adapters

40930

Install or adapt digital cables at multiple angles

When connecting flat panel displays and other digital A/V devices, it can be hard to know what angle may be required in a tight space. Digital 360° Rotating Adapters from Cables To Go can be twisted and turned to virtually any position, ensuring installation flexibility while maintaining signal integrity.

- Ideal for digital connections in tight spaces
- Clever ball joint design maintains signal integrity
- Connectors available in popular digital formats

Velocity™ HDMI™ And DVI In-Line Adapters

40367

Convert between HDMI and DVI connections

Velocity HDMI and DVI In-Line Adapters provide a digital, high definition video connection! You'll see the purity of the original signal with absolutely no picture degradation! Fully tested and absolutely guaranteed. An ideal choice to connect digital source components to DVI-equipped display devices!

- Ideal for connecting a digital source to a DVI-D display
- Pure digital connection with no signal degradation
- Gold-plated contacts for worry-free performance
- Ideal for Satellite, DVD, HDTV, Plasma, LCD and DLP
- Lifetime warranty

AUDIO/VIDEO SOLUTIONS

Velocity™ HDMI™ Female To Female Coupler

40970

Extend your existing HDMI connections

The Velocity HDMI Female to Female Coupler is designed to extend the distance of your existing HDMI cable by allowing two cables to be coupled together. It can often be difficult to predict where components will need to be placed in the future, or calculate the needed cable length for an installation. Miscalculations often go unnoticed until the cable is already installed. When your installation leaves you short, save time and money and avoid the aggravation of running new cables by simply extending your existing HDMI connection. It is compact and designed for minimal signal loss to provide an easy, quality connection between two HDMI cables.

- Gold-plated connectors
- PCB design safeguards signal integrity
- Does NOT amplify the signal – be sure to consider cable quality and overall length limitations

Item#	Description	MSRP
40970	Velocity HDMI Female To Female Coupler	\$14.99

Velocity™ HDMI™ Female To Male Port Saver & Mini Adapters

40434

Extends the life of your HDMI connectors

Protect your HDTV investment by using a Velocity HDMI Port Saver or Mini Adapter. Over time, the stress of plugging and unplugging cables causes the HDMI connector to wear. On many new flat panel televisions the weight of the HDMI cable may cause stress on the HDMI connector. The port saver alleviates stress from the HDMI connector by adapting the HDMI cable to virtually any angle. The port saver also takes the abuse of repeated plugging and unplugging instead of your HDTV HDMI connector. This adapter will quickly and easily extend the life your valuable equipment.

- Female to male Adapter
- Compact Size 2.5in (L) X 1in (W) X .5in (H)
- Gold-plated connectors
- Extends the life of equipment
- Packaged for resale
- Lifetime warranty

Item#	Description	MSRP

40434	Male HDMI Mini Port Saver Adapter	\$19.99
40435	HDMI To HDMI Mini Adapter	\$14.99

Passive HDMI™ & DVI Wall Plate Inserts

40385

Pass-through or adapts HDMI and/or DVI-based signals

Decora® compatible wall plates dress up any home theater, conference room or classroom. These wall plates were designed for ease of installation and to provide the best signal transfer possible. Unlike traditional pass-through wall plates, digital series wall plates from Cables To Go are constructed using four-layer computer grade printed circuit boards. The PCB traces are engineered to maintain the critical impedance necessary to transfer the delicate digital signal. Use these wall plates for HDMI and DVI installations, or use them to convert an HDMI connection to a DVI connection, or vice versa.

- Constructed using 4-layer computer grade PCB
- PCB traces engineered to maintain critical impedance
- Available in HDMI to HDMI, DVI to DVI, HDMI to DVI and DVI to HDMI configurations
- Fits standard electrical boxes and compatible with Leviton Decora brand trim plates
- 20AWG steel

Item#	Description	MSRP
40385	HDMI Digital Pass-Through Wall Plate	\$49.99
40387	DVI Digital Pass-Through Wall Plate.....	\$49.99

4 x 2 HDMI™ Matrix Switch

40444

4 inputs and 2 outputs for flexible audio/video distribution

Simultaneously route any four source devices to your choice of two monitors/displays, or deliver one signal to both displays. Connect all of your HDTV products such as DVD players, satellite receivers, cable set-top boxes, or gaming systems and watch any picture on any of two plasma, CRT, LCD or projection televisions with complete independence! Supports all video resolutions up to full 1080p high definition, and is compatible with HDCP and DDWG standards. This attractive device may be placed on a shelf or mounted in a 19" professional rack. Display selections can be set with the included discrete command remote control, front panel buttons, or via RS232 for seamless integration into more advanced control systems.

- HDMI Inputs: 4
- HDMI Outputs: 2
- HDTV Resolutions: 480i, 480p, 720p, 1080i, 1080p
- HDMI (v1.3 with Deep Color, x.v. Color™, Lip Sync, Multichannel digital audio)
- Maximum Cable Distance: 15m
- One year warranty

40444	4 x 2 HDMI Matrix Switch	\$999.99

AUDIO/VIDEO SOLUTIONS

TruLink® 2 & 4-Port HDMI™ Splitters

40471

Split one HDMI audio/video signal to multiple high definition displays

Connect an HDTV receiver, or other audio/video device, to multiple HDTV displays. The TruLink® HDMI Splitter supports HDMI v1.3 features as well as a full range of video resolutions from 480i to 1080p. The splitter is cascadable up to three layers.

- HDMI v1.3, x.v. color®, high-speed refresh rates and lossless surround sound
- HDCP-compliant for full playback of high definition content
- Built-in equalizer boosts the signal to allow cascading up to 80ft away
- Supports up to 12-bit color

Item#	Description	MSRP
40471	2-Port HDMI Splitter.....	\$199.99
40472	4-Port HDMI Splitter.....	\$249.99

TruLink® 4 & 6-Port HDMI™ Selector Switches

40445

Convenient switching among multiple HDMI sources

Most high definition audio/video components utilize the HDMI interface to provide crystal clear, digital sound and picture. With the wealth of devices now using HDMI it's easy to run out of free HDMI inputs on your TV set or receiver. The 4-Port and 6-Port HDMI Selector Switches from Cables To Go solve this problem by providing additional high definition digital inputs for sources such as DVD, Blu-ray™, gaming systems and high definition cable/satellite boxes. Our HDMI Selector Switches offer 3 or 5 rear inputs, plus a convenient front input for temporary connection of gaming systems or HD camcorders and cameras. Both devices are fully compatible with HDCP-enabled sources. Blue front panel LEDs display the HDMI source currently selected.

- HDMI (v1.3 with support for Deep Color, CEC, x.v. Color™, Dolby TrueHD™, DTS-HD Master Audio™)
- Supports 480i, 480p, 720p, 1080i and 1080p resolutions
- Supports HDCP and DDWG for HDMI compatible monitors
- Auto-sensing port selection
- Discrete code infrared remote control
- HDMI inputs: 3 (Rear), 1 (Front)
- HDMI outputs: 1 (Rear)

Item#	Description	MSRP
40445	4-Port HDMI Selector Switch.....	\$129.99
40446	6-Port HDMI Selector Switch.....	\$179.99

TruLink® 2-Port DVI-D Splitter

40312

Split 1 DVI-D output for display on 2 DVI-D compatible monitors

The TruLink DVI-D splitter connects two HDTV displays or two computer monitors equipped with DVI inputs. HDCP compatibility means this splitter will work with high definition video for HDTV applications and high resolution PC applications. Compatible with DVHD equipped PC video cards operating at a maximum resolution of 1920 x 1080 pixels, or with video devices at 480p, 480i, 720p, 1080i, and 1080p scan rates. Built-in DVI repeater allows lossless runs up to 10 meters from the splitter.

- Supports resolutions up to 1920x1080 (1080p)
- Supports EDID and HDCP
- Rugged metal enclosure to prevent damage
- Cascadable up to 4 levels
- Extends DVI-D signals up to 10 meters

Item#	Description	MSRP
40312	2-Port DVI-D Splitter.....	\$199.99

AUDIO/VIDEO SOLUTIONS

TruLink® HMDI™ Over Cat5e Extender

40477

Extend your digital video signal up to 60m (200ft)

The TruLink HDMI Over Cat5e Extender is a robust solution that allows you to extend your HDMI signal up to 60m (200ft) over two Cat5 Unshielded Twisted Pair (UTP) cables. This solution is ideal for applications where your HDMI monitor needs to be placed further than the average 10m HDMI cable limitation. This is common in large home installations and digital signage applications, as well as in retail stores, houses of worship, classrooms and boardrooms where you need video presentation in one room but want the source to be out of sight and in a safe and secure environment.

- Adjustable equalization
- Supports HDCP as well as the following resolutions using Cat5* cabling:
 - 40m 1920 x 1080 (1080p 12bit)
 - 60m 1920 x 1080 (1080i)
 - 60m 1280 x 720 (720p)
- Input/Output Connectors: HDMI Female
- RJ45 connectors join the Base Unit and the Remote Unit
- Power Supply: DC 5V 1A

*Cat6 cables can be used but are not recommended due to the skew of signal pairs

Item#	Description	MSRP
40477	HDMI Over Cat5e Extender.....	\$249.99

TruLink® DVI Over Cat5 Extender

39975

Extend your DVI-D signal up to 50m over Cat5

The TruLink DVI Over Cat5 Extender is a durable solution that allows you to extend your DVI signal up to 50m (164ft) over two Cat5 Unshielded Twisted Pair (UTP) cables. This solution is ideal for applications where your DVI monitor needs to be placed further than the average 20m DVI cable limitation. Driving a DVI signal over Cat5 allows you to take advantage of your UTP cable infrastructure already installed.

- Extend your digital video signal up to 50m (164ft)
- Ideal for digital signage applications in retail stores, classrooms and boardrooms
- Supports DDC and HDCP
- Supports the following resolutions using Cat5* cabling:
 - 30m - 1600 x 1200 @ 60Hz
 - 50m - 1280 x 1024 @ 60Hz
 - 50m - HDTV resolution up to 1080i
- Input / Output Connectors: DVI-D female
- RJ45 connectors join the Base Unit and the Remote Unit
- Power Supply: DC 5V 1.2A

*Cat6 cables can be used but are not recommended due to the skew of signal pairs

Item#	Description	MSRP
39975	TruLink DVI Over CAT5 Extender	\$349.99

TruLink™ HDMI™ Repeater

40383

Extend the length of your HDMI connection

Overcome typical cable length limitations and place your equipment where you want. Our HDCP compliant HDMI Repeater regenerates and equalizes the HDMI signal to ensure clear delivery over longer cable runs. Use a single repeater to reach up to 130ft, or add a second repeater for a total length of 200ft! To ensure maximum performance we recommend using our premium SonicWave™ High-Speed HDMI Cables. The HDMI repeater features Female to Female connection for use with standard HDMI cables. Simply run one HDMI cable from the video source to the HDMI repeater. Connect a second HDMI cable from the repeater to the display.

- HDMI (v1.3 for support with Deep Color, CEC, x.v.Color™ Dolby True HD™ and DTS-HD Master Audio™)
- Supports full 1080p high definition video
- Extend HDMI signal up to 200ft using SonicWave High-Speed HDMI Cables
- Fully HDCP compliant
- Repeater powered using HDMI cable

AUDIO/VIDEO SOLUTIONS

SonicWave™ RCA Component Video Cables

40103

High quality connection for all video resolutions up through 1080i hi-def

State of the art performance through advanced cable design, construction and materials.

- Fully shielded for complete immunity to EMI/RFI interference: (2) 80% + OFC copper braids, plus 100% overlapped Mylar® foil
- Silver-coated, oxygen-free copper conductors
- 24k gold-plated connectors
- Silver-solder construction
- Flexicable™ ultra-flexible PVC jacket for easy installation
- Maximum fidelity 75-Ohm coaxial cable
- Lifetime warranty

Velocity™ RCA Component Video Cables

40009

Experience lifelike color and crisp detail from your DVD player

Velocity RCA Component Video Cables will improve the performance of your progressive scan video sources by providing a much better cabling solution than the "throw away" cables that are included with most consumer electronics products.

- Connectors: RCA Plug x3 to RCA Plug x3
- Oxygen-free copper conductors for efficient signal transmission
- 100% Aluminum foil and braided OFC shield protect against noise and interference
- Bonded cable construction provides neat and easy component video connections
- Molded connectors feature precision-made 24k gold-plated contacts to ensure long-lasting quality
- Ultra-flexible jacket for easy installation

AUDIO/VIDEO SOLUTIONS

Velocity™ RCA Component Video + Audio Cables

HDTV quality video together with left/right audio

Velocity RCA Component Video cables provides improved picture and sound quality when compared to ordinary "out of the box" cables. Low-loss, 75-Ohm, oxygen-free, copper center conductors provide improved picture quality and performance.

- Easy connection of component video and stereo audio
- Twisted construction in audio conductors prevents EMI/RFI noise interference
- 24k gold-plated connectors ensure long-lasting quality

Plenum-Rated Component Video Cable

CMP-rated plenum jacket; low profile RCA connectors and small cable diameter enable easier in-wall installation

Audio/Video installations in educational and commercial settings often require plenum-rated cabling. Low-profile connectors (1.5in total depth) save valuable space in electrical boxes. This cable is constructed from three 75 Ohm coaxial cables using 26AWG center conductors and features a tinned copper braid that provides 92% over foil shield.

- CMP-Rated Cable Jacket

AUDIO/VIDEO SOLUTIONS

SonicWave™ S-Video Splitter Cables

40022

Maintain image quality over longer runs

When your S-Video cables can't go the distance, the SonicWave S-Video Separator is the answer. These cables are designed to allow you to send the luminance signal over one cable and the chrominance signal over another cable. Using these separators along with high quality RCA video cables will allow you to run S-Video signals in excess of 50ft with no noticeable signal loss. Individually shielded low-loss dual 75-Ohm silver-coated oxygen-free copper wire delivers the most accurate resolution and color. CU Shielding Technology™ provides three layers of shielding; two 80%+ OFC copper braids and one 100% overlapped Mylar® foil. The 24k gold-plated connectors ensure long lasting performance free from oxidation.

- Send luminance (black and white) and chrominance (color) signals through (2) separate cables
- Signals can be re-combined at opposite ends with a second cable assembly
- Available with RCA or BNC connectors

Item#	Description	MSRP
40022	1.5ft S-Video To Dual Coax RCA Splitter Cable.....	\$43.99

Plenum Rated S-Video + Stereo Audio Cables

40786

For commercial audio/video installations

Plenum Rated S-Video + Stereo Audio Cables from Cables To Go are designed to meet stringent building codes for placement of low voltage wiring within a commercial building. Placement of low voltage cables within the plenum, or air space above a suspended ceiling requires the installer to use materials that limit the release of smoke and fumes in the event of a fire. These are commercial grade cables constructed of 75-Ohm coaxial cable.

Value Series S-Video Cables

40915

Quality, cost-effective video connections

Value Series S-Video Cables from Cables To Go are constructed with high quality, multiple conductors delivering extraordinary video images. Separate conductors carry the Y-component (Chrominance) and the C-component (Luminance), providing better picture quality than a composite video cable.

- Connectors: 4-Pin mini-DIN Male to Male
- Better picture quality than with a composite video cable
- Suitable for DVD, game system, satellite and cable TV
- Compatible with most PCs and notebooks with 7-Pin TV output jacks

Item#	Description	MSRP

Value Series S-Video + 3.5mm To RCA Video + Stereo Audio Cables

27990

Quickly and easily connect your PC to your TV

Value Series S-Video + 3.5mm To RCA Video + Stereo Audio Cables from Cables To Go allow you to connect your multimedia PC to your television with ease. This precision-engineered adapter cable connects the S-Video out of your computer to a TV, thus eliminating the need for several cables and/or adapters.

- Connectors: S-Video Male and 3.5mm Plug to 3RCA Plug
- Convert from composite S-Video to RCA or vice-versa
- One piece solution, which eliminates couplers that cause signal loss
- Gold terminals ensure long-lasting, corrosion-free connections
- Fully molded connectors provide excellent strain relief

S-Video + RCA Audio Cables

02309

Convenient, cost effective audio/video connections

Value Series S-Video/RCA Cables from Cables To Go are the right choice for connecting your VCR, DVD, TV and other audio/video equipment to your TV or receiver. The S-Video component is constructed with dual 75-Ohm coaxial cable that delivers high-quality video images. The dual coax design carries the Video (Y) signal separate from the Color (C) providing higher resolution and better picture quality. The dual audio conductor is 90% spiral-wrapped with tinned-copper, which provides shielding against EMI and RFI interference.

- Audio and video together in a single cable assembly
- Available with an added composite video connection

Plenum Rated Audio/Video Cables

Composite video plus stereo audio for commercial installations

Plenum Rated Audio/Video Cables from Cables To Go are designed to meet stringent building codes for placement of low voltage wiring within a commercial building. The plenum, or air space above a suspended ceiling, is a common location for such wiring.

- CMP-rated jacket
- FEP, Teflon® inner insulation
- 26AWG center conductors
- 92% tinned copper braid shield over foil shield
- Precision machined connectors
- Lifetime warranty

40775	75ft Plenum Rated RCA Audio/Video Cable	\$249.99

40722

Plenum Rated Audio/Video Cables, M/M

Low profile RCA connectors for easier in-wall installation

Audio/video installations in educational and commercial settings often require plenum rated cabling. Our plenum rated line was engineered to overcome common challenges faced by installers. Low-profile connectors save valuable space and enable easier in-wall connections. Our small-diameter cable design further reduces the space and clearance required to run the necessary cabling through walls and plenum air spaces. These cables are constructed with three 75-Ohm coaxial cables using 26AWG center conductors and feature a tinned copper braid providing 92% over foil shield. The CMP rating provides the fire protection required to run within walls and air plenums without the need for conduit.

- CMP-Rated cable jacket
- Low Profile RCA Connectors (1 1/2" total depth)
- Small-diameter cable (1/4" diameter)
- (3) 26AWG coax with foil shield and 92% braid
- Lifetime warranty

Velocity™ RCA Audio/Video Extension Cables

29309

Extend the reach of existing audio/video connections

Velocity RCA Audio/Video Extension Cables offer excellent sound and picture quality. These cost effective, high performance cables can give your installation the extra reach needed to make the right connection. Twisted pair oxygen-free copper wire and a foamed PE dielectric ensure quality audio performance. A low-loss, 100% foil and spiral-wound, oxygen-free copper shielding provide protection against noise and interference. The color-coded molded connectors attach to an ultra-flexible jacket, and allow for easy installation and identification. The 24k gold-plated connectors ensure long-lasting, corrosion-free connections.

- Connectors: RCA Plug x3 to RCA Jack x3
- Bonded construction design for neat, easy connection of audio and video
- Oxygen-free copper center conductor delivers high-quality audio and video
- Foil and braid shield protects against noise and interference
- Twisted pair audio conductor construction reduces the effects of RFI and EMI
- Corrosion-resistant, precision made 24k gold-plated connectors ensure long lasting quality

Component Video/Composite Video Cables

40596

High definition gaming at 720p or 1080i

Xbox 360® Component Video/Composite Video Cables from Cables To Go put your gaming console where it belongs – right next to you! Oxygen-free copper conductors, foamed PE dielectric and EMI/RFI shielding ensure error-free signal transfer. Enjoy high quality stereo audio or use the optical audio port for a Dolby® Digital 5.1 surround sound experience. The unique hybrid connector combines reliability with excellent strain relief for a lifetime of performance. Available in component video or S-Video format.

- High definition gaming output of 720p or 1080i
- Progressive scan DVD playback in 480p
- Dolby® Digital 5.1 Surround Sound output
- Component Y/Pr/Pb high definition video output
- Composite cable for standard TV(480i) output
- 24k gold-plated contacts for enhanced signal transfer and corrosion resistance
- 10ft shielded cable

S-Video/Composite Video Cable

40595

High quality standard-definition video

Xbox 360® S-Video/Composite Video Cables from Cables To Go maximize your gaming experience on standard definition televisions. By using an S-Video connection, this cable provides a much more enhanced image than traditional composite video connections. Experience high quality audio with the stereo connection, or utilize the optical audio port for Dolby® Digital 5.1 Surround Sound. This 10ft shielded cable also includes a composite connection for use with legacy standard definition televisions.

- High definition gaming output of 720p or 1080i
- Progressive scan DVD playback in 480p
- Dolby® Digital 5.1 surround sound output
- Component Y/Pr/Pb high definition video output
- Composite cable for standard TV (480i) output

AUDIO/VIDEO SOLUTIONS

SonicWave™ F-Type RF Cables

45459

Professional-grade F-type coaxial video cables for those who demand the best

SonicWave F-Type RF Cables ensure your system achieves maximum performance through advanced cable design, construction and materials. CU Shielding Technology™ provides three layers of shielding: (2) 80% + OFC copper braids and (1) 100% overlapped Mylar® foil, which is the cable's first defense against unwanted noise and interference. Flexable™ ultra-flexible PVC jacket resists binding and kinking that causes errors in the signal path.

- For critical RF antenna signal distribution applications
- Extensive use of silver-plated oxygen-free copper ensures maximum bandwidth
- Triple-Shielded
- 75-Ohm RF coaxial cable
- 24k gold-plated F connectors

Velocity™ F-Type Mini-Coaxial Cables

40003

Super thin, low-loss coaxial video cable

Velocity F-Type Mini-Coaxial Cables from Cables To Go perform the same job as large, stiff, unsightly coaxial cables. These cost effective high-performance cables give you maximum video quality in a super thin design. Low-loss 75-Ohm pure copper wire and foam dielectric ensure optimum picture resolution and color. A Mylar® foil and braid shield protect against unwanted noise and interference. The molded connectors attach to an ultra-flexible jacket, and allow for easy installation. The 24k gold-plated heavy-duty connectors ensure long-lasting, high-performance connections.

- Super thin cable hides neatly between carpet and baseboard
- Ultra-flexible PVC jacket for easy installation
- Gold-plated connectors ensure long-lasting connection free from oxidation

Siamese RG59/U BNC To BNC With 18/2 Power

40984

Power cable stripped and tinned for easier soldering connections

Simplify the installation of surveillance systems! Carry video over the coax and run power over the 18/2 cable. RG59 features 22AWG solid copper center conductor with a 100% Mylar® foil shield and 55% tinned copper wire braid to protect the video signal from external EMI and RFI interference. Attached power line cable features 18AWG tinned copper with color coded jacket for easy identification.

- 22-gauge copper-conductor RG59 coax for excellent video connections
- 100% Mylar foil and 55% braid shield protects signal integrity
- 18-gauge tinned copper power line cable
- CL2 rated cable assembly

Home Theater Solutions

Providing Great Value for the Ultimate Experience

Benefits:

- Evolving Interconnect System Prepares You for the Future - RapidRun®
- Multiple Levels of Cabling Quality Meet Your Various System Demands
- Distribution Devices for Your Multiple Sources and Displays
- Achieve Signal Flexibility and Communication Ability with Converters
- Extenders and Amplifiers Allow You to Go the Extra Distance

Applications:

- Multi-Faceted, Home Theater Experiences
- Home Gaming Solutions
- Flat Panel/Movie/Surround-Sound Systems
- TV and Computer Integration in the Home

Home theater solutions can range from simple to million dollar systems, and everything in between. The components needed to create a home theater system can vary just as drastically, and it often takes an expert to design and install it. Cables To Go provides you with the cabling, splitters, selectors, distribution amplifiers, converters and technical expertise you need to find the right components for your system.

AUDIO/VIDEO SOLUTIONS

75-Ohm BNC Cables

40024

Quality connections for broadcast, studio and surveillance

High-quality 75-Ohm BNC Cables from Cables To Go for video applications including CCTV, broadcast, studio, boardroom presentation, home theater, etc. Manufactured from coax cable and nickel plated BNC connectors. A molded PVC strain relief protects the cable from wear over time.

- 75-Ohm RG-59/U cable
- For use in video applications including CCTV, broadcast and studio
- UL-listed coax cable and nickel-plated BNC connectors
- Dual shield cable; 60% copper braid over foil
- 22AWG copper covered steel center conductor

3-Play™ Component Video/Digital Audio Selector

40324

Easily switch between devices with component video, stereo audio and Toslink® digital audio

The 3-Play Audio/Video Selector from Cables To Go allows connection of up to three Toslink digital audio, three stereo analog audio pairs, and three component video (770.3) signals to a single display device. Experience lossless control of as many as three HDTV or progressive scan source components! Includes infrared remote control and DC 12V/500mA power supply. One-year parts and labor warranty.

- 3 Inputs for component video, Toslink digital audio and analog stereo audio
- Use for video game systems, DVD players and HDTV receivers
- Wireless infrared remote control or front panel selection
- Compact size fits anywhere, only 9-1/2" x 4-1/4" x 2" (W x D x H)
- Bandwidth: 0dB @ 50MHz
- S/N Ratio: 64dB

40324	3-Play Component Video Selector.....	\$84.99

3-Play™ Digital Audio/Video Selector

28731

Expand the capacity of your home theater's audio/video source input

The 3-Play Digital Audio/Video Selector from Cables To Go allows you to connect any combination of up to three Toslink®, three S-Video, or three RCA audio/video components to your home theater system. This is the perfect solution for the A/V enthusiast who wants to take full control of their system. Use the wireless remote control or the front panel switches to easily select sources. Includes an infrared remote control and DC 9V/500mA power supply.

- Input: (3) S-Video, (3) Toslink digital audio, (3) left/right stereo audio, (3) composite video
- Output: S-Video, Toslink digital audio, stereo audio and composite video
- Add flexibility to your existing system
- Virtually eliminates cable hassles - no more connecting and reconnecting cables
- Simple switching with 3 input selector buttons or remote control

28731	3-Play Digital Audio/Video Selector	\$69.99

6 x 2 Component Video Matrix Selector

40697

Component video with stereo/Toslink®. Add 6 inputs and 2 outputs to your home theater

Connect all your HDTV products and use the remote control or front panel buttons to watch any picture on either of two displays! This matrix switch offers six component video inputs, six stereo audio inputs, and six Toslink digital audio inputs. It will switch any of these inputs to either of the two outputs, with the audio following video. Includes infrared remote control with discrete commands for easy integration into your existing system.

- Component video inputs: 6 (5 Rear, 1 Front)
- Component video outputs: 2 (Rear)
- Audio inputs: L/R Analog Audio (5 Rear via RCA, 1 Front via 3.5mm jack), Toslink optical digital audio (5 Rear, 1 Front)
- Audio outputs: L/R Analog Audio and Toslink Optical Digital Audio (2 each rear)

Item#	Description	MSRP

AUDIO/VIDEO SOLUTIONS

3 x 5 Component Video Matrix Selector

40973

3 Input/5 Output component video, stereo and Toslink® audio, plus RS232 control

The 3 x 5 Component Video Matrix Selector from Cables To Go allows you to route any of three source devices to each of five TV/monitors or one source to all five TV/monitors. Connect all of your HDTV products such as DVD players or satellite receivers. Use the remote control, RS232 control or front panel buttons to watch any picture on any of five plasma, CRT, LCD or projection televisions with complete independence!

This matrix switch offers three component video inputs, three stereo audio inputs, and three optical digital audio Toslink inputs. It will switch all of these inputs to any of the five outputs, with the audio following video. The 3 x 5 Component Video Matrix Selector comes complete with an infrared remote control that features discrete commands to make programming complex macros into your universal remote control system a snap. The RS232 control option allows seamless integration into more sophisticated control systems. Now you can take control of your system and watch what you want where you want, and do it with no compromises!

- Component video inputs: 3 (2 Rear, 1 Front)
- Component video outputs: 5 (Rear)
- Audio Inputs: L/R analog audio (2 Rear, 1 Front via 3.5mm jack), Toslink optical digital audio (2 Rear, 1 Front)
- Outputs: L/R analog audio and Toslink optical digital audio (5 Rear)
- Compatible with all interlaced or progressive scan analog component video signals

Item#	Description	MSRP
40973	3 x 5 Component Video Matrix Selector	\$349.99

4 x 2 Component Video Matrix Selector

40473

Route four different sources independently to two monitors

The 4 x 2 Component Video Matrix Selector from Cables To Go allows you to route any of four source devices to each of the TV/monitors or one source to both TV/monitors. Connect all of your HDTV products and use the remote control, RS232 control, USB or front panel buttons to watch any picture on any two CRT, LCD or projection televisions with complete independence!

This matrix switch offers four component video inputs, four stereo audio inputs, and four coaxial digital audio inputs. It will switch all of these inputs to either of the two outputs, with the audio following video. The matrix switcher comes complete with an infrared remote control to make programming complex macros into your universal remote control system a snap. The RS232 control or USB option allows seamless integration into more sophisticated control systems. Now you can take control of your system and watch what you want where you want, and do it with no compromises.

- Rack mounts included
- Source and monitor selection by infrared remote, RS232, USB or manual selection
- Unit learns infrared commands for use with other infrared remote controls
- High bandwidth and low crosstalk provides maximum picture performance

Audio/Video Distribution Amplifiers

40394

Distribute a single audio/video device to multiple locations

Audio/Video has evolved into the medium of choice for business owners looking to gain the competitive advantage for customers. Along with a good video source, well-assembled cables and quality display devices, a good audio/video distribution system requires a high performance distribution amplifier.

- Inputs: 1 Composite Video + Stereo Audio
- Outputs: 4 Composite Video + Stereo Audio
- Supports cable runs up to 150ft
- Daisy-chain amplifiers for more displays
- Unity gain ensures output level is equal to input level
- Rack mountable with removable rack ears

Item#	Description	MSRP
40394	4-Output Video/Stereo Audio - 1RU	\$99.99

AUDIO/VIDEO SOLUTIONS

Audio/Video Distribution Amplifiers

41065

Distribute audio/video to multiple sources with these signal amplifiers

Distribute digital/HDTV and analog video signals from a single A/V source to multiple televisions, monitors and receivers. Cable runs up to 150ft are no problem! Unity gain ensures the output signal is virtually identical to the input signal. Maximum flexibility means multiple distribution amplifiers can be daisy-chained together for a nearly unlimited number of device connections!

- Support cable runs up to 150ft
- Unity gain ensures output is the same level as input
- Can be daisy-chained together for unlimited connections
- All units include distribution amplifier, power supply and user manual

Audio/Video Cat5 Distribution Hub & Cat5 Receiver

41168

Distribute audio/video content to one or more locations over Cat5 cable

This audio/video hub is able to distribute component video, digital audio, left/right audio and infrared emitter transmission over two common Cat5 cables. It features RCA jacks for audio, Component Video, and S/PDIF connections and 3.5mm jacks for infrared emitter connections. Dual output ports enable the audio/video signals to be delivered to two separate displays. Loopthru jacks support additional hubs for larger installations. At least one receiver unit (sold separately - PN: 41168) is required on the display end to complete the installation.

Note: One Transmitter and one receiver are required for each installation, sold individually.

Distribution Hub Features

- Active amplification ensures high quality transmission
- Discrete Passive Infrared Channel for the use of external infrared remote control systems
- Loop output for use of additional CAT5 transmitters
- (2) Cat5 outputs for additional location

Cat5 Receiver Features

- Rugged Metal Cabinet
- Discrete passive infrared channel for the use of external infrared remote control systems
- Cable length equalizer
- Video Continuity LEDs to ensure video signal

Component Video/S/PDIF Audio To RJ45 Female Balun

41165

Run Component Video/Digital Audio up to 300ft over unshielded twisted pair cable

Component Video/S/PDIF Audio To RJ45 Female Balun from Cables To Go provide an economical alternative to coaxial cable used in audio/video installations. The Balun maintains 75-Ohm impedance to the audio/video devices while providing 100-Ohm impedance to the cabling infrastructure. This balancing of the impedances allows the audio/video signal to travel with little or no degradation of signal up to 300ft over unshielded twisted pair cabling.

Save time by sharing existing UTP network cable for audio/video applications. This Balun has a set of 4 female RCA connectors for component video and Digital S/PDIF Audio. The female RJ45 jack provides a quick method of connecting the baluns to existing UTP cables. Our design features a wide-band transformer which permits all four channels to be used for composite video applications. The chassis is constructed out of heavy-gauge steel in order to stand up to abuse and provide shielding from unwanted interference. Sold individually. Commonly purchased in pairs.

- Transmit Component Video/Digital Audio over UTP cable
- Transmit up to 300ft with little or no visible degradation
- Compatible with 1080i
- Compatible with Composite Video or CCTV applications

AUDIO/VIDEO SOLUTIONS

TruLink® VGA With Audio Over Cat5 Extender

39984

Extend your VGA and audio signals up to 1000ft over Cat5e

The TruLink VGA With Audio Over Cat5 Extender is a robust solution that allows you to extend your VGA and 3.5mm audio signal up to 300m (1000ft) over a Cat5e Unshielded Twisted Pair (UTP) cable. This solution is ideal for applications where your VGA monitor needs to be placed further than the average 100ft VGA cable limitation. This is common in digital signage applications typical in retail stores, houses of worship, classrooms and boardrooms where you need video presentation in one room but want the computer to be out of sight and in a safe and secure environment. Driving VGA and audio signals over Cat5e allows you to take advantage of your existing UTP cable infrastructure for a cost-effective and reliable installation.

With the TruLink VGA With Audio Over Cat5 Extender, you can place your display across the room, on another floor, or in another building while your computer remains in a convenient location.

Note: This solution requires either a 1-Port or 4-Port Base Unit and a Remote Unit for each connected monitor. The Base Unit and Remote Units are sold separately enabling a solution that fits your particular configuration.

- Extend your analog video and audio signals up to 300m (1000ft)
- Cat5e UTP cabling enables easy and cost effective in-wall installation
- Ideal for digital signage applications in retail stores, houses of worship, classrooms and boardrooms

S-Video/Composite Video + Stereo Audio Selector Switch

28750

Add S-Video/Composite Video and Audio inputs to your TV

Add flexibility to your existing audio/video system, or quickly connect multiple gaming systems. This solution is for the A/V hobbyist who wants to take full control of an ever-expanding system while adding flexibility and trouble-free cable management. Virtually eliminate cable hassles with no more connecting and reconnecting cables. The front-mounted sliding switch enables easy selection of source devices, while the vertical tower design is a real space saver. No external power required.

- Add flexibility to your existing A/V system
- Simple device selection with single sliding switch
- Front panel input allows for easy connection of camcorder, game system and other A/V devices
- Vertical tower design saves valuable space
- No external power required
- Perfect for connecting multiple gaming systems

Audio/Video RF Modulator

41164

Programmable universal modulator distributes audio/video over an RF system

The Audio/Video RF Modulator from Cables To Go accepts audio/video input from any source and modulates the signal to a CATV/UHF channel of your choosing. Watch your DVD player, satellite receiver, or CCTV surveillance camera on any television in your home. Imagine flipping to a channel on your TV and being able to see who is at your front door or finish watching a DVD movie you started in a different room. The RF Modulator is designed for easy installation. Simply connect any audio/video device, choose an unused CATV/MATV channel and connect the RF Modulator to your home RF system. Multiple Programmable Modulators may be cascaded to distribute multiple inputs.

- Programmable channels: CATV 64~94,100~125, UHF 14~69
- Digital channel display
- Channel memory during power outages
- Inputs: RCA type composite video, R/L Audio
- Output: F type connector NTSC CATV: 64~94, 100~125, UHF: 14~69
- Application: Modulate an A/V signal on a CATV/MATV channel
- Ideal for homes, businesses, education facilities, restaurants, bars and clubs

PC to TV Converter

40698

Convert your computer's VGA video output signal to an s-video or composite video input for your monitor or TV

Simple to install, this converter is ideal for viewing slide presentations, browsing the web, PC gaming, and viewing pictures or movies that are stored on your PC, streamed from the internet or played through the computer's DVD player. The unit supports NTSC/NTSC-J/PAL systems with s-video and composite video outputs. A full-function remote allows users to zoom in/out, adjust vertical, adjust horizontal, flickering filter, color bars, and power. Powered from a standard USB port; two AAA batteries are required for the remote control.

- Reproduction of your computer's video output on any TV or monitor utilizing standard s-video or composite video inputs.
- Converter accepts 640 x 480 pixels (VGA), 800 x 600 pixels (SVGA), and 1024 x 768 pixels (XGA) video signals from a PC

Video To PC Converter

40971

Converts S-Video or composite video to VGA

The Video To PC Converter from Cables To Go uses the latest de-interlace chipset on the market to offer a truly high quality picture. Using this converter you can watch videos or play video games on your PC monitor. The Video To PC Converter will accept S-Video or Composite Video signals and convert them to high resolution computer images. No software is required and connecting this device is a breeze. Within minutes you can be watching your DVD collection, satellite receiver or be playing a video game on any PC. The converter has a small footprint so it's easy to fit in tight spaces and is great for traveling. The built in switch offers convenient switching between the PC and the devices connected to the converter and your PC.

- Converts S-Video and composite video to VGA
- Compatible with VGA, SVGA, XGA and SXGA Monitors
- No software required

TruLink® Multi-Function Converter with CATV Tuner and Picture-in-Picture

40481

Converts composite video or component video to VGA to turn your LCD or plasma monitor into a home theater display

Our multi-function converter is an ideal solution for any crowded dorm room, small apartment, or home office! It turns a PC monitor into a dual-purpose screen for both computer and TV video, and thus eliminates the need to have multiple monitors in one room. Display home theater sources, gaming systems and camcorders on your flat panel. The Picture-In-Picture (PIP) feature allows content to be watched in a separate window on the monitor while the user surfs the internet, pays bills or does schoolwork. The pass-through function allows VGA video to be sent directly to the monitor from a computer when the converter is powered down. MTS stereo output via a 3.5mm stereo jack is compatible with Dolby® Pro-Logic™ for a complete theater experience.

- Output resolution up to 1920 x 1200 pixels for 24 bit RGB true color
- Display home theater sources, gaming systems and camcorders on your flat panel
- Use in a school dorm to turn your standard PC monitor into a television
- Plug-and-play installation; no software required
- Accepts component or composite video signals and converts them to VGA

Velocity™ Toslink® To Mini-Plug Cables

27015

Digital audio cables for personal portable devices

Velocity Toslink To Mini-Plug Cables are manufactured from high-quality optical fiber with a polished lens and gold-plated collar. A 1mm low-loss core conductor maintains an accurate digital signal. Optical cables transfer the signal using light; thus completely eliminating any chance for EMI/RFI or ground loop interference. Connect your DVD, CD, mini disc, DAT, game console or other digital audio equipment for clear, full and richly detailed sound.

- Connect full-size Toslink to mini-plug digital audio
- Digital signal is maintained by a 1mm low-loss core
- Inner-cladding provides low distortion, high signal-to-noise ratio and high fidelity
- Ultra-flexible PVC jacket makes installation a snap even in hard to reach areas
- Protective plastic cover protects lens from dust, dirt and other material
- Ideal for use with DAT, MP3, personal portables and gaming systems

SonicWave™ Toslink® Glass Fiber Optic Cables

40231

Premium digital audio connection for crystal-clear multi-channel surround sound

SonicWave Toslink Glass Fiber Optic Cables are a must have for audio purists. Constructed from 280 individual strands of 0.053mm glass for maximum flexibility, the bend radius is an amazing 70mm. High purity optical grade glass will not haze or discolor over time like plastic. Sophisticated mirror-polishing techniques are employed to make the clearest end possible, and resulting in less error and maximum signal transfer.

- Eliminate EMI and RFI interference common to standard audio/video cables
- Ideal for critical DTS and THX-EX applications
- High purity glass and 24k gold-plated collet construction
- Maximum bandwidth combined with minimum jitter and signal degradation

Velocity™ Toslink® Digital Audio Cables

40389

Digital audio cables for Dolby Digital™ and DTS surround sound

Velocity Toslink Digital Audio Cables are manufactured from high-quality PMMA optical fiber with a polished lens and gold-plated collet to provide an accurate digital signal. The stylish PVC jacket adds flexibility and durability for years of listening pleasure. Optical cables transfer the signal using light; thus completely eliminating any chance for EMI/RFI or ground loop interference. Connect your DVD, CD, satellite receiver or game console for clear, full detailed sound.

- Low-loss fiber provides low distortion and high signal-to-noise ratio
- Corrosion-resistant, precise 24k gold-plated collet ensures long-lasting quality
- Ultra-flexible PVC jacket makes installation a snap, even in hard-to-reach areas
- Ideal for DVD, CD, D-VHS, game consoles and other digital audio applications

SonicWave™ S/PDIF RCA Coaxial Digital Audio Cables

40112

Performance without limits

SonicWave S/PDIF Cables use smooth, flawless, large cross-section silver-plated OFC as the signal conductor. The nitrogen-foamed PE insulation exhibits a dielectric constant as low as 1.35. Triple-shielding using two independent OFC braids, combined with a specially designed RCA connector, ensures characteristic impedance for the cable assembly remains 75-Ohms, +/- 5-Ohms.

- Ideal for critical DTS applications
- Maximum bandwidth combined with minimum jitter and signal degradation
- Three layers of shielding: (2) 80%+ OFC copper braids and (1) 100% overlapped Mylar® foil
- Flexable™ ultra-flexible PVC jacket for easy installation

Velocity™ S/PDIF RCA Coaxial Digital Audio Cables

Provides a quality connection for digital audio equipment

Velocity Digital Audio Coax Cables are a great upgrade from the cables typically included with consumer electronics products. Low-loss 75-Ohm oxygen-free copper center conductors and foam dielectric provides improved sound quality and performance. The 100% aluminum foil and dual OFC braid shields protect against unwanted noise and interference. Molded connectors combine with an ultra-flexible jacket, and allow for easy installation and identification. The 24k gold-plated, durable connectors ensure long-lasting performance.

- Low-loss 75-Ohm oxygen-free copper conductor for maximum signal transfer

SonicWave™ Bass Management Cables

Optimized audio from oxygen-free copper wire

SonicWave Subwoofer Cables ensure your bass management system produces maximum performance and unprecedented impact. Optimized design provides an efficient path for low frequencies to travel to the subwoofer. These subwoofer cables are robustly constructed by using 18 strands of 0.12mm silver-plated OFC and seven strands of 0.18 silver-plated OFC conductor, triples-shielded and housed in a rough-and-ready jacket. Designed to perform under the most demanding environmental conditions, our subwoofer cables will deliver massive impact and clean, low bass to the very limits of human perception! Build a state of the art theater or audio rig by accurately delivering the foundation of music and movie content.

- Large cross-section conductor; 18 strands of 0.12mm plus 7 strands of 0.18mm silver-plated oxygen-free copper
- Three layers of shielding: (2) 80% + OFC copper braids and (1) 100% overlapped Mylar® foil
- SplitLok™ precision-machined 24k gold-plated connectors with split center pins ensure superior fit
- FlexCable ultra-flexible PVC jacket for easy installation

AUDIO/VIDEO SOLUTIONS

Velocity™ Subwoofer Cables

Connects a subwoofer with RCA connectors to any receiver

Velocity Subwoofer Cables are ideal for demanding applications. The durable, dependable and superior performance is ideal for home theater and consumer-level components. These cables offer superb impact and detail while maintaining a "tough as nails" quality! Twisted pair oxygen-free copper wire and foamed PE dielectric are optimized for bass signal transmission. The low-loss 100% foil and spiral-wound oxygen-free copper shielding protect the important bass signals from EMI/RFI interference.

- Ideal for A/V receiver-to-powered subwoofer applications in a home theater environment
- Low-loss 100% Mylar® foil and braid shielding offers superior protection against noise and interference
- Ultra-flexible PVC jacket for easy installation
- Fully molded connectors provide excellent strain relief
- Lifetime warranty

Plenum Rated 3.5mm Stereo Audio Cables

For audio systems installed in commercial environments

Plenum Rated 3.5mm Stereo Audio Cables from Cables To Go are designed to meet the stringent low voltage wiring codes within commercial applications. The airspace above a suspended ceiling or plenum is a common location for runs of low voltage cables. Placement of low voltage cables within the plenum requires the installer to use materials that limit the release of smoke and fumes in the unfortunate event of a fire.

- CMP-rated cable jacket
- 100% shielding
- 24AWG conductors
- Precision-manufactured 3.5mm connectors

Plenum Rated 3.5mm Stereo Audio Cable, M/M

Low profile 3.5mm connectors for easier in-wall installation

Audio/video installations in educational and commercial settings often require plenum rated cabling. Our plenum rated line is engineered to overcome common challenges faced by installers. Low-profile connectors save valuable space and enable easier in-wall connections. Our small-diameter cable design further reduces the space and clearance required to run the necessary cabling through walls and plenum air spaces. These cables are constructed from 24AWG twisted pair wire with foil shielding. The CMP rating provides the fire protection required to run within walls and air plenums without the need for conduit.

- CMP-Rated cable jacket
- Low Profile RCA Connectors (1 1/2" total depth)
- Small-diameter cable (1/4" diameter)
- 24AWG twisted pair with foil shield
- Lifetime warranty

Cable Connection Type Reference

HDMI

DVI

Component

Composite

S-Video

Digital Audio - Coax

Digital Audio - Toslink

RF

Analog Audio

HDMI™

HDMI stands for High-Definition Multimedia Interface. Previous video standards (composite, S-Video, component and RGB) transmit an analog signal. When two digital devices are connected with HDMI, the digital signal stays clearer and noise free. HDMI also allows for multi-channel surround sound and high definition video to be carried in one digital connection.

DVI

DVI stands for Digital Visual Interface. Before the widespread adoption of HDMI, DVI was considered the preferred connection type on high definition A/V applications. DVI resulted in superior quality over analog connections by allowing the transmission of uncompressed digital video. Since DVI uses TMDS just like HDMI, the two connections are adaptable for video information.

Component Video

Component Video is an analog format based on a 3-wire construction with RCA-type connectors. Video is transported as a full bandwidth luminance (black and white) signal and two full bandwidth chrominance (color) signals. Well-suited for home theater and commercial applications, component video is a durable and versatile interface that supports image quality up to 1080i.

Composite Video

Composite Video is the most common of all video connections and has been around for more than 30 years. A 75-Ohm interface, composite video carries both the luminance (black and white) and chrominance (color) information on a single coaxial cable. Durable and inexpensive, Composite Video is a workhorse interface with maximum resolution of about 400 lines.

S-Video

S-Video is a dual-conductor format that made its debut in the early 1980s with the advent of SVHS and ED-Beta. S-Video delivers the luminance (black and white) signal on one conductor and the chrominance (color) signal on another. Digital video signals, such as DVD, satellite and digital cable, will look better using an S-Video interface than a basic composite connection.

Digital Audio - Coax

Coax, is a copper coaxial style cable optimized for a delicate digital data stream.

Digital Audio - Toslink®

Toslink fiber optic cables use light to deliver the digital signal, eliminating the risk of signal interference.

RF Format

RF technology was originally used to transmit analog signals from broadcast towers. While still the underlying technology used in broadcast television, the F-type coaxial cable also now is commonly used as the backbone for digital cable and DSS. With digital cable or satellite, a digital signal that contains both the audio and video is sent down the cable into the settop box. From there the signal, which may be analog or digital, is fed into the display device.

Analog Audio

Analog Audio cables provide uncompromised audio clarity for stereo reproduction. The solid core long-grain copper used in these cables results in lower distortion, higher quality analog audio signal transfer. Connect the red and white RCA connectors to the corresponding colored analog audio input jacks of your HDTV monitor or control box.

AUDIO/VIDEO SOLUTIONS

Velocity™ 3.5mm Mono-Audio Cables & Extensions

40624

A single channel 3.5mm interconnect solution

Velocity 3.5mm Mono Cables are specifically designed to provide quality signal transfer for mono audio and data transfer applications.

- Connectors: 3.5mm mono to 3.5mm mono (gold-plated)
- Foil shielded to prevent unwanted EMI/RFI interference
- Gold-plated connectors
- Lifetime warranty

SonicWave™ 10AWG OFC Speaker Cable

38068

Sonically neutral, naturally detailed, sonorously present - this is the ideal speaker cables for maximum fidelity

Let music speak to you in a pure voice with SonicWave Speaker Cables. They are the ideal combination of transparency and neutrality, ensuring high quality audio reproduction. The 10AWG oxygen-free copper conductors are constructed from seven bundles of 18AWG pure copper in a carefully designed configuration. A 12mm PVC jacket provides the protection your cables need for a lifetime of performance.

- Experience ultimate performance from the best speaker cable design in the business
- Complete with multiple connector configurations for the most common high-end speaker applications; 5/16in spade terminals and banana plugs
- 24k gold-plated terminals

Velocity™ 12AWG Banana Speaker Cables

29176

Enjoy a clear sound and full dynamic range

Durable and dependable, Velocity Speaker Wire offers ideal performance for home theater and stereo audio systems. Features oxygen-free copper wire for clean sound and wide dynamic range.

- Corrosion-resistant, precision-made 24k gold-plated connectors ensure long-lasting sound quality
- Flexible jacket for easy installation
- Oxygen-free copper wire provides clear audio performance
- Low inductance and capacitance ensure superior sound quality
- Not rated for in-wall use
- Ultra-flexible jacket for easy installation
- Terminated with banana plugs on both ends

AUDIO/VIDEO SOLUTIONS

Value Series 1/4in Cables

40063

Connect line or mic level outputs from mixing consoles to recorders and amplifiers with unbalanced inputs

Value Series 1/4in Cables from Cables To Go are made from twisted pair audio cable under an aluminum foil for maximum shielding from noise. Highly flexible 7mm PVC jacket reduces the risk of cables kinking and damaging the conductors. Bright nickel plating on solid brass connectors resists wear from reconfiguring and moving equipment from one venue to another. Spring strain relief on the plug reduces the effects of age on the solder joints and contacts.

- 22AWG Twisted Pair construction
- Foil shield and 60% copper braid
- Nickel plated brass connectors
- Connects unbalanced line outputs to unbalanced line inputs

Dual-Output Digital Audio Adapter

Digital audio conversion for Coaxial and Toslink® formats

S/PDIF Digital Audio is today's standard for home theater surround sound. However there are two distinct formats (Coaxial and Toslink), and your A/V components may feature dissimilar connection types. The Dual-Output Digital Audio Adapter from Cables To Go will help ensure system compatibility by accepting Coaxial or Toslink and delivering a dual output in both formats. Our digital adapter is the ideal solution for converting the digital audio output from your DVD player, cable box or satellite receiver to the input your sound system requires.

- Compact Design: 1.875in (L) x 1.875in (W) x 1in (H)
- Converts Toslink to Coax and Vice-Versa
- Toslink signal extender
- Simple Operation
- Power supply included

Remote Control Repeater Kit

Forward infrared signals to operate electronic components behind closed doors

Does your entertainment system have wooden doors or would you like to mount your components in a closet? Without a clear line of sight Infrared (IR) signals from a remote control will not reach the equipment. The Remote Control Repeater Kit from Cables To Go contains all equipment necessary to remotely operate four components (expandable to 12 components) using your standard remote.

Kit Contains:

- IR Distribution Block
- Mini IR Receiver
- (2) Dual IR Emitters
- AC/DC Adapter
- Controls 4 devices (expandable to a maximum of 12)
- IR Receiver and IR Repeater have blinking Blue LED to confirm receipt of IR Signal
- IR Repeater designed for shelf or wall mount

Note: Careful consideration must be used when placing the IR Receiver near a Plasma Display. Plasma Displays emit IR frequencies during use and may cause interference.

Item#	Description	MSRP
40430	Remote Control Repeater Kit	\$89.99

Ground Loop Isolation Transformers

Eliminate noise from your video system due to the effects of ground loops

Ground loops are caused by voltage potential differences at the ground point on your equipment. Voltages in the range of micro-volts up to milli-volts or higher can cause ground loops. Ground loops occur when multiple A/V components are powered from different outlets, most commonly outlets that are tied to different circuit breakers or even a different secondary from the power transformer. Ground loops manifest themselves in the form of hum bars called herringbone (diagonal lines on the screen) and AC beat (a wide, barely visible bar that rolls from the bottom to top of the screen). Often you can hear the ground loop as the noise on the video encroaches on the audio signal. Ground Loop Isolation Transformers from Cables To Go connect easily into your A/V system and break the ground path through cables between components.

- Eliminate video noise caused by ground loops
- Available for Composite, Component and S-Video applications
- Easy connection using standard video cables
- Component Video Isolation Transformer is compatible with 480p

41145

Item#	Description	MSRP
41145	Composite Video Isolation Transformer	\$39.99

AUDIO/VIDEO SOLUTIONS

Toslink®/Digital Coaxial Converters

40018

The ideal solution for converting digital audio media format

Run out of coaxial digital inputs on your receiver? Most receivers have only one coaxial digital input but have several optical inputs. This coaxial to optical converter will allow you to connect the coaxial digital audio output from your DVD, cable or satellite receiver to a Toslink optical input. Don't buy a new receiver - simply change media formats and get full digital signal sound quality.

- Toslink optical digital audio to/from RCA digital coaxial S/PDIF signal conversion
- Power supply included
- No configuration required – plug in your cables and go
- AC/DC Adapter - #98011
- One year warranty

Item#	Description	MSRP
40018	Digital Coaxial To Toslink Converter	\$39.99
40019	Toslink To Digital Coaxial Converter	\$39.99

Velocity™ Toslink® Adapters & Splitters

27027

Connect, convert or extend your Toslink signal

Velocity Toslink Adapters and Splitters are ideal for splitting the digital signal. Now you can split the digital signal from your CD, DVD or other digital device and connect to both your receiver and recorder.

- Connectors: Toslink Female to Dual Toslink Female
- Designed for: Split the digital audio signal
- Ideal for connecting your CD, DVD or other digital device to both your receiver and recorder
- Not designed for long distances
- Lifetime warranty
- Color: Black

USB 5.1 Audio Adapter

22327

Turn your computer into a personal digital entertainment system

The USB 5.1 Audio Adapter from Cables To Go enables you to generate Dolby Digital or DTS® Surround Sound through your desktop or laptop. Now you can listen to your MP3 and WMA files that are on your PC through your stereo receiver. Get the clarity of an expensive 5.1 sound card with easy to use, cost effective USB technology. This attractive audio adapter connects your computer to your mini disc recorder, receiver, amplifier, portable stereo or PC multimedia speakers delivering full 5.1 sound.

- Get the clarity of an expensive sound card with the added benefits of USB technology
- Externally connects your mini disk recorder, receiver, amplifier, portable stereo and multimedia speakers to your computer
- Input: USB B-Type
- Outputs: Toslink® optical jack and 3.5mm stereo jack

Digital Audio Explorer

28734

Connect three Toslink® sources to your stereo

Unleash the full potential of your audio/video system with the Digital Audio Explorer from Cables to Go. Connect up to three optical sources to the digital/optical input of your home theater system. The Toslink Selector features high-integrity Toslink jacks for optimal transfer of light signals. This selector will also help with preventing the wear and tear on your Toslink cables and I/O jacks that comes from manually connecting and reconnecting cables. And, the unit's space saving design allows you to place it almost anywhere.

- Input: Toslink (3)
- Output: Toslink (1)
- Easy to use locking rotary switch
- Add flexibility to your existing system
- Expand input/output options for optical audio equipment
- Prevents wear on cables and jacks resulting from disconnecting and reconnecting

AUDIO/VIDEO SOLUTIONS

Component Video With Stereo Audio Isolation Transformer

40008

Eliminate noise from your audio/video system due to the effects of ground loops

Ground loops are caused by voltage potential differences at the ground point on your equipment, voltages in the range of microvolts up to millivolts or higher. They occur when multiple A/V components are powered from different outlets, most commonly, outlets that are tied to different circuit breakers or even a different secondary from the power transformer. Ground loops manifest themselves in the form of hum bars called herringbone (diagonal lines on the screen) and AC beat (a wide, barely visible bar that rolls from the bottom to the top of the screen). Often you can hear the ground loop as the noise on the video encroaches on the audio signal.

Note: While these transformers are designed to eliminate ground loops, isolating the source of the ground loop can be very difficult, we recommend test scenarios to eliminate your ground loops.

- Eliminate audio/video noise caused by ground loops
- Easy connection using standard video cables
- One year warranty
- Connectors: 5 RCA in, 5 RCA out
- Video Bandwidth: >300MHz
- Audio Bandwidth: 20Hz ~ 1MHz

Item#	Description	MSRP

40 Piece RF Adapter Kit

40081

A must have kit for installation professionals

Work in the RF or audio/video market for long enough and you will need an adapter that you just don't have on hand. The 40 Piece RF Adapter Kit from Cables To Go is the problem solver you have been looking for. Using included connectors and universal couplers allows you to easily make 64 interseries connector combinations by simply screwing two connectors together. Every technician should keep this kit in their tool box, service vehicle or tool cart. Make the adapter quickly in the field to get the equipment up and running and replace the adapter later when you have more time.

- No soldering or crimping required
- 64 connection combinations
- Inter-series and intra-series adapters possible
- Gold-plated brass body and center conductors
- Teflon® insulator material
- Lifetime warranty

Item#	Description	MSRP

SonicWave™ Audio/Video Connectors

29737

Customize the length of your own audio/video cables

SonicWave connectors are machined from brass and are 24k gold-plated for years of operation that's free from oxidation. These connectors are designed to provide a snug, but not overly-tight, fit when mating with your audio/video device's input and output jacks. Ten pieces per package.

- Machined brass/24k gold-plated with embossed textured grip
- 75-Ohm impedance

Rubber Connector Grips

Make connectors easier to insert, remove and identify

Rubber Connector Grips from Cables To Go are the easy way to make slick metal connectors easier to insert and remove from mating jacks. Use these grips for RCA, BNC and F type compression connectors and SonicWave™ RCA, BNC, S-Video and 3.5mm precision connectors. The connector grips are 10mm high and have an inside diameter of 11mm so they can be used with a multitude of popular connector styles.

- Make connectors easier to insert and remove from jacks
- Quickly identify the function of an audio or video connector
- 10mm wide, 11mm inner diameter

RAPIDRUN® SOLUTIONS

RapidRun is the most complete audio/video cabling system – built to save installation time, accommodate changes, and reduce the likelihood of return service calls due to faulty field terminations.

RapidRun was designed to evolve with your constantly expanding needs. This revolutionary system pioneered a modular Wall Plate, providing the reliability of a factory termination in the field.

Putting an end to restrictive cabling and time consuming installation, the genius behind RapidRun starts with the Runner – the main base cable that runs through walls, rooms and fixtures. To expand its flexibility, multiple signal types can be supported over your choice of runner cable – such as VGA, Composite Video, S-Video, Component Video, or HDMI™ and DVI.

Just select the Wall Plate or Flying Lead that is right for your A/V application, connect the Break-Away to the Runner, and with a simple twist and turn, your termination is complete.

RapidRun is the fast, complete A/V cabling system.

RapidRun Runners

Imagine pulling a VGA cable through a conduit with a 90° sweep and not worrying about all those small pins when you're done. Even better, imagine switching the installed cable from VGA to Component Video or switching DVI to HDMI™ in less than a minute. RapidRun makes these scenarios a reality. Never before has an interconnect system offered such adaptability.

RapidRun Multimedia Runner Cables

50721

The high performance, fast, complete in-wall solution for multimedia applications

The Multimedia Runner is the ideal solution for in-wall installations that support audio and video entertainment or presentation applications. Whether mounting a flat panel display in your bedroom or hanging a projector in a classroom, a clean, crisp signal can be ensured.

- Available in CL2 or CMP (plenum) ratings
- Connectors include a protective pulling cap capable of 30lbs of pulling tension
- (5) 28AWG 75-Ohm mini-coaxial cables
- Coaxial lines feature a 90% shield copper braid for maximum flexibility while protecting against EMI/RFI
- CL2 rated for in-wall installations
- Color Code: Blue

RapidRun Runner Test Adapters

42118

42119

Enables a quick continuity check of the Runner cable prior to sealing it within a wall

The RapidRun Runner Test Adapters have been designed to allow an installer to run a quick continuity test of the Runner prior to leaving the job site, which ensures proper functionality. These test adapters include two pieces: a modified RapidRun connector that connects to the display end of the Runner and an RJ45 adapter cable that connects to the input of a common network cable tester.

- Includes a modified RapidRun connector and RJ45 adapter cable
- Color-coded for easy identification
- Provides a quick continuity check of your Runner cable prior to sealing it within a wall
- 1 year warranty

Item#	Description	MSRP
42118	PC Runner Cable Test Adapter - Yellow	\$26.99

RapidRun Runner Couplers

42188

42057

Customize installations in the field for time savings

The future is always difficult to predict, and so often the same goes for your customers. As projects are modified or upgrades are required, your customers deserve effective solutions to accommodate their existing cabling system. Now you can offer two easy to use solutions. The male-to-male coupler is designed to connect two RapidRun Runners together to go the distance you require. RapidRun female-to-female couplers are the solution for connecting two Flying Leads together without the need for a Runner, allowing the user to easily create custom length patch cables in the field.

- Two versions are available:
 - 12-Pin option for RapidRun Multimedia (blue) applications
 - 15-Pin option for RapidRun PC (yellow) applications
- Use two Runners to get the length you require
- Use the 12-Pin option for RapidRun Multimedia (blue) applications and the 15-Pin option for RapidRun PC (yellow) applications

Item#	Description	MSRP
42057	12-Pin Coupler Male/Male - Blue	\$16.99

RapidRun Runner Coupling Rings

98015

Replacement Coupling Rings for PC (yellow) and Multimedia (blue) Runners

Two coupling rings are provided with every RapidRun Runner Cable, PC (yellow) and Multimedia (blue), for connecting Break-Away termination. This replacement 2-pack is available for the times when those rings are lost or misplaced.

- After Installation, remove the pulling cap from the Runner Cable
- Attach the Coupling Ring to the Runner Cable. Each end of the Coupling Ring has different threads. The knurled end will face away from the cable.
- Connect the Break-Away Flying Lead or Wall Plate to the Runner Cable via the Coupling Ring.

Item#	Description	MSRP
98015	Coupling Rings For RapidRun Runners	\$4.99

RapidRun Wall Plates

RapidRun Integrated Wall Plates are the perfect solution for educational and institutional installations. These Wall Plates are constructed with aluminum for durability, and the locking connector allows the integrator to save valuable space inside the surface mount or electrical box that is typically full of cabling. Optional keystones for data or networking applications add extra space without installing a new Wall Plate.

Find the Integrated RapidRun Wall Plate that best fits your application

Pick the signals you need to support and match to the corresponding RapidRun Aluminum Wall Plates

RapidRun Integrated Wall Plates & Flying Leads (HD15/3.5mm/3RCA)

Use one Runner to simultaneously connect PC video, 3.5mm stereo audio/video, and composite audio/video and 3RCA signals

These particular Wall Plates and Flying Leads cut installation time and cost by allowing you to send PC video, 3.5mm stereo audio, and composite audio/video and 3RCA over one cable. One Wall Plate option offers two HD15 and 3.5mm audio connections for added flexibility. White and black finishes are available in addition to the brushed aluminum for the popular configurations. Each version has keystone options in dual gang sizes.

- These Wall Plates require one Multimedia (blue) and one PC (yellow) Runner
- Supports transmission of RGBHV signals (does not support data-bit transmission), 3.5mm stereo audio, and composite audio/video (3RCA)

RAPIDRUN® SOLUTIONS

RapidRun Audio Breakout Adapters

Breakout 3.5mm audio from a RapidRun Runner for applications where video and audio are delivered to separate equipment in different locations.

These adapters will allow you to run separate 3.5mm audio cables outside the RapidRun Runner. Connect the adapter to the lead of the RapidRun wall plate. Connect the runner to the adapter lead and to your choice of a wall plate or flying lead. Then attach the separate 3.5mm cable to the 3.5mm female adapter lead and to your audio device and you're done!

- RapidRun Color Code: Yellow (for use with PC Runners)
- Supports transmission of RGBHV signals (Does not support data-bit transmission) and RCA composite video
- Fits into a standard single gang junction box
- Wall Plate Color: Brushed Aluminum
- Lifetime Warranty

RAPIDRUN® SOLUTIONS

USB SuperBooster Wall Plates & Dongles

Decora® style wall plate, keystone inserts or dongles with integrated transmitter/receiver sends a USB signal up to 150ft over Cat5

The USB SuperBooster Dongle Transmitter extends the distance of a USB device to a host computer up to 150ft. The USB SuperBooster is powerful yet simple, with no drivers to install or special software required. It's also compatible with any computer that supports USB. This device consists of a transmitter unit and receiver unit incorporated into single gang Decora compatible wall plates, keystone insert or dongles. Numerous receiver options are available so you can customize the configuration. Choose from a 2-Port wall plate receiver, a 1-Port dongle, 2-Port dongle receiver, or a four-port dongle receiver.

- Wall plates fit a standard J-box
- Self-powered so no external power source is required
- Compliant with USB Specification 1.1
- Connectors: Transmitter: USB Type B Female, RJ45 Female; Receiver: USB Type A Female, RJ45 Female

Note: Decora is a registered trademark of Leviton® Manufacturing Company, Inc. This Product is not manufactured or endorsed by the Leviton Manufacturing Company, Inc.

RapidRun Break-Aways

Break-Aways (Flying Leads and Wall Plates) ensure flexible, efficient, high quality connections for all types of equipment. Whether hanging a projector in a classroom or installing a commercial digital signage system a clean, crisp signal is ensured. RapidRun has evolved to meet the needs of the installation crews who use it everyday.

To ensure quick and easy configurations, the RapidRun Runners are color-coded: Blue Break-Aways are only compatible with blue Multimedia Runners, yellow Break-Aways are only compatible with yellow PC Runners, green Break-Aways are compatible with both yellow PC Runners and blue Multimedia Runners and red Break-Aways are only compatible with red Digital Runners. After you have selected the right Runner for your job, choose a Break-Away option: Decora®- compatible Wall Plate, Full Size Aluminum Wall Plate or a Flying Lead.

With three Runner cable options, we offer nearly limitless capabilities and the highest performance – with over 20 configurations that allow you flexibility for your unique application. For added protection, the Runner cables are terminated with female connectors to eliminate the chance for fatal damage to a pin during installation. For effortless connection to the Runner, Break-Away terminations are finished with a male connector. All you need to do is align the red arrows to guide the connectors together and tighten the knurled locking ring. It's that simple!

RapidRun Audio Breakout Adapters

42166

Breakout 3.5mm audio from a RapidRun Runner for apps where video and audio are delivered to separate equipment in different locations.

These adapters will allow you to run separate 3.5mm audio cable/s outside the RapidRun Runner. Connect the adapter to the lead of the RapidRun Wall Plate. Connect the runner to the adapter lead and to your choice of a wall plate or flying lead. Then attach the separate 3.5mm cable to the 3.5mm female adapter lead and to your audio device and you're done! Ideal for applications where video and audio are being delivered to equipment in different locations.

- RapidRun Color Code: Yellow (for use with PC Runners)
- Supports transmission of RGBHV signals (does not support data-bit transmission) and RCA composite video
- Fits into a standard single gang junction box
- Wall Plate Color: Brushed Aluminum
- Lifetime Warranty

RapidRun Digital Runner Test Adapter

42186

Enables a quick continuity check of the Runner Cable prior to sealing it within a wall

The RapidRun Runner Test Adapters are designed to allow an installer to run a quick continuity test of the Runner prior to leaving the job site, which ensures proper functionality. These test adapters include two pieces: a modified RapidRun Connector that connects to the display end of the Runner, and an RJ45 Adapter Cable that connects to the input of a common network cable tester.

- Lifetime warranty

Item#	Description	MSRP
42186	Digital Runner Test Adapter	\$42.99

RapidRun Digital HDMI™ Voltage Inserter

42223

Provides a dedicated power supply for long HDMI cables

At times, a source device (cable box, DVD player, video game system) will not have enough power dedicated to the HDMI output. This will cause a voltage drop and the video quality is affected, or worse, there is no video at all. The RapidRun Digital HDMI Voltage Inserter will solve this problem by isolating the power from the source device and provide a dedicated power signal to give the crisp, clean signal that is expected from high definition equipment.

- Isolates the source power and provides 1 amp of power for your digital video
- Supports HDMI high resolution video up to 1080p
- Lifetime warranty

Item#	Description	MSRP
42223	Digital HDMI Voltage Inserter	\$29.99

RAPIDRUN® SOLUTIONS

RapidRun Digital Active Flying Leads

42417

Connect to equipment with high quality HDMI™ and DVI terminations

Active Flying Leads ensure flexible, efficient, high quality connections for all types of equipment. They are the perfect complement for the Digital Runner when distances of more than 50ft are needed.

The Digital Active Flying Lead is the perfect complement for the Digital Runner when an Active Wall Plate is not required. It is most commonly used when connecting an HDTV to different source devices (i.e. cable box, DVD player, video game system) that are 50ft or more away from the display. Whether hanging a flat-panel TV in a home or installing a commercial digital signage system - a crisp, clean signal up to 1080p resolution can be counted on every time.

- Supports HDMI and DVI-D high resolution video up to 1080p
- Compatible with Digital Runners
- Mylar® foil shield and tinned copper braid overall
- Active Flying Leads are used on the source end of the Digital Runner on systems 50ft or longer
- 1 year warranty

Item#	Description	MSRP

RAPIDRUN® SOLUTIONS

RapidRun - Chosen By Both Customers And Experts Alike

See why industry experts are raving about RapidRun...

RapidRun is the perfect solution for installing and upgrading conference rooms, home theater systems, video displays and other in wall applications. This innovative system has received accolades from customers and has been awarded top honors by leading professionals.

"We purchased RapidRun HD15 (UXGA) with Break-Away Flying Leads so we could run 42" plasmas for a video wall. They work great! We had conduit installed already, so these cables allowed us to use the current conduit and attach the ends versus running new conduit to accommodate the large ends. We found your website and your sales staff to be very helpful. They answered our questions well. Service goes a long way, baby!"

— Jeff B. Florida

STRUCTURED WIRE SOLUTIONS

As the demand and applications for computers continue to grow, so does the demand for quality infrastructure. Structured Wiring Solutions from Cables To Go™ deliver the performance required by high bandwidth applications.

Patch panel and wall plate solutions offer ease-of-use, performance and flexibility. From Cat5e and Cat6 networking products to RG6 coaxial connectivity used in broadband backbones, Cables To Go has solutions for virtually every need. Find out more starting on page 122.

Residential Wiring Systems from Cables To Go delivers turn-key connectivity for residential and SOHO network, telephone, CATV and distributed audio. Learn more about this exciting line by turning to page 135.

To keep wiring systems neat and organized, Cables To Go offers a complete line of cable management solutions. Cost effective and easy to install, these necessary products start on page 122.

STRUCTURED WIRE SOLUTIONS

Rack mount Cat6 Patch Panels

37051

110-type termination; exceeds Cat6 specifications

Experience exceptional performance with Cat6 Patch Panels from Cables To Go. The high density 19in panel design will save you valuable space in your rack, and provide optimal performance with multi-vendor equipment. Each panel features an industry standard 110 termination block, which has been engineered to meet or exceed the TIA/EIA-568-B Cat6 hardware connection specifications. Broken or damaged connectors are no longer a problem - quickly and easily replace them with Keystone Jacks from Cables To Go. Each panel features clear numbering on the front, giving you a quick and easy way to identify cable runs.

- Designed to mount to any standard 19in rack or cabinet
- 50µ gold-plated contacts
- Black electrostatic powder-coated steel
- Accommodates top, bottom or side cable entry
- For TIA/EIA-T568-B/A wiring configuration
- Exceeds TIA/EIA-T568-B.2 Cat6 hardware connecting specifications
- Certification: UL

Item#	Description	MSRP
37050	24-Port Cat6 Patch Panel, 1U.....	\$99.99
37051	48-Port Cat6 Patch Panel, 2U.....	\$159.99

Cat5e 110-Style Patch Panels

03852

110-type termination; exceeds Cat5e specifications

Cat5e Patch Panels from Cables To Go provide optimum performance while interfacing with multi-vendor equipment. Each panel features an industry standard 110-type termination, while meeting and exceeding EIA/TIA TSB-40 Cat5e connecting hardware specifications. The clear numbering on both the front and back of each panel gives you a quick and easy way to identify cable runs, and the high density 19in panel design will save you valuable space in your rack.

- Designed to mount to any standard 19in rack or cabinet
- 50µ gold-plated contacts
- Black electrostatic powder-coated steel
- Accommodates top, bottom or side cable entry
- For EIA/TIA T568B/A wiring configuration
- Exceeds EIA/TIA TSB 40A connecting hardware specifications
- Certification: UL

Cat5e Shielded Patch Panels

03864

Fully shielded to protect against EMI/RFI interference

Shielded Cat5e Patch Panels from Cables To Go protect your high-speed network from noise and electromagnetic interference. The panel and jacks deliver performance that exceeds ISO/IEC 11801 Category 5/class D and TIA/EIA Cat5e requirements. The clear numbering on both the front and back of each panel gives you a quick and easy way to identify cable runs. Comes with an attached cable tray to ensure minimum bend radius and proper cable support.

- Keystone jack with 110 IDC connector
- Designed to mount to any standard 19in rack or cabinet
- 50µ gold-plated contacts
- Black electrostatic powder-coated steel
- Exceeds the latest standard requirements of ISO-IEC 11801 class "D" and TIA/EIA 568-A-5
- Certification: UL

Blank Keystone Patch Panels

03860

Configure your patch panel for Ethernet or multimedia

Blank Keystone Patch Panels from Cables To Go offers all the functionality and compatibility of any name brand at a fraction of the cost. Each panel has stamped cutouts that accept all keystone jacks, making them ideal for Ethernet, voice, audio/video and other applications. The clear numbering on the front gives you a quick and easy way to identify cable runs.

- Mounts to all standard 19in racks and wall brackets
- Certification: UL
- Configurable network solutions for use with Premise Plus Keystone Jacks, Cat5e and Cat6 patch cables, Fiber patch cables, wall-mount brackets and relay racks

Relay Rack Cable Management

Complete cable management

The Relay Rack Cable Management System from Cables To Go is the ideal way to keep your relay rack neat and efficient. Designed for standard EIA 19in racks, this system keeps cabling from becoming cluttered, which makes moves, adds and changes fast and easy. The Vertical Cable Management Unit mounts between standard 84in racks to provide neat and orderly routing of cables. Each unit consists of front and rear covers with the fingers spaced to provide easy access to the cabling while maintaining the minimum bend radius for Cat5e. Each cable management system comes with a lifetime warranty.

Key Measurements

Relay Racks

Ideal for mounting patch panels, datacom/telecom equipment and other rack mount peripherals

- 12U, 20U and 25U configurations for maximum flexibility
- Provides easy access to the backsides of patch panels and electronics
- Accommodates 18in depth on all units
- Left and right quick release hinges
- Sturdy 3in rails support 100lb load capacity
- Stamped lances for mounting reusable hook/loop cable ties
- Relay rack key features
- 84in racks provide 78in (45U) of usable space
- 47.25in racks provide 42in (24U) of usable space
- Heavy duty extruded aluminum construction
- Ships in a single carton*

Wall Mount Shelves & Brackets

Allows convenient wall mounting of patch panels and small equipment

When minimum space is required, APW's heavy-duty 16AWG steel brackets are a great alternative to a full size rack. Designed for 1in equipment, the brackets' hinged design allows convenient wall mounting of patch panels and small equipment while it saves valuable floor space. Brackets provide universal mounting for right or left hinging.

- Constructed from heavy duty 16AWG steel
- Universal mounting for either right or left hinging and easy panel access
- Brackets accommodate 19in patch panels
- Accepts either 10/24 or 12/32 screws
- Durable black powder coat finish

STRUCTURED WIRE SOLUTIONS

8-Port Decora®-Compatible 3U Rack Mount (capital Mount)

40699

Centralize your A/V distribution in one clean and neat panel

Simply install up to eight Decora-style wall plates per mount to create an easy to use patch bay. Switch your A/V sources and destinations quickly and easily. Manufactured from 18AWG brushed aluminum and anodized to a black finish for years of use.

- Use with Decora-style wall plates
- Quickly build an A/V patch bay
- Fits standard 19in relay racks and cabinets
- 3 rack 5.25in high, with black anodized finish over brushed aluminum

Netguard Rack Mount Surge Suppressor

27369

10-outlet, 1072 joules; 8 metal oxide varistors; 19in rack mountable

The Netguard Power Guard Rack Mount provides solid surge protection to your network devices. With more than 1,000 joules of surge protection and a clamping voltage of 330V (UL 1449), you can rest assured that your valuable and expensive network devices are safe from dangerous power surges and spikes.

- More than 1,000 Joules of surge protection from (8) superior metal oxide varistors
- 330V clamping voltage
- RJ11 and RJ45 jacks for surge protection and EMI/RFI filtration
- Push-button circuit breaker reset
- (2) always hot receptacles
- Specially designed brackets for power cord management and support

Cat5e Keystone Jacks

35205

110/KRONE IDC punchdown; T568A/B

Cat5e Keystone Jacks from Cables To Go are designed for superior performance in the home, office or classroom. They exceed all TIA/EIA 568-A-5 requirements and balance signal transmission of insertion loss and crosstalk from one to 100MHz. Available in nine TIA-606-compliant colors for easy identification, Cat5e Keystone Jacks offer a lifetime warranty.

- 50µ gold plating on each contact
- 110 or 110/Krone universal IDC vertical connector for 22-26AWG solid wire
- Dual 568-A/B wiring labels
- Each jack comes with voice, data and Cat5e dust cover snap-ins and (2) plastic wire strain-relief caps
- Lifetime warranty

Cat6 Keystone Jacks

110/KRONE IDC punchdown; T568A/B

Cat6 Keystone Jacks from Cables To Go are designed for superior performance that exceed Category 6/Class E requirements according to TIA/EIA 568B 2.1 and ISO 11801 2nd edition. The keystone jack will balance signal transmission of insertion loss and crosstalk from one to 250MHz. Jacks comply with TIA-606 requirements and are designed to work in conjunction with Premise Plus VWall Plates and Surface Boxes from Cables To Go or any standard keystone and angled multimedia wall plate or patch panel.

- Panel-type unshielded RJ45 (8P8C)
- Termination: 110/Krone IDC horizontal punchdown for 22-26AWG solid wires
- Supports Dual T568A and T568B wiring compatible with Cat5 enhanced requirement
- Includes (2) plastic strain relief caps for IDC connector and (3) color-coded designation dust covers with voice, data and Cat5e icons
- Certifications: UL-listed; complies with FCC Part 68

RJ12 Keystone Jacks

For voice telephone applications

Cat3 Keystone Jacks from Cables To Go are designed for superior performance that exceed industry standards. The keystone jacks are available in nine colors to match housing or allow color coded designation port in compliance with TIA-606 requirements. Designed to work in conjunction with wall plates and surface boxes from Cables To Go, or any standard keystone and angled multimedia wall plate or patch panel. Each keystone jack includes 110-type IDC straight-back termination with strain relief caps, and comes standard with 50µ gold plating on the jack contacts.

- Type: Panel-type unshielded RJ12 (6P6C)
- Termination: 110/KRONE IDC vertical punchdown for 22-26AWG solid wires
- Includes (3) plastic strain relief caps for IDC connector and (3) color-coded designation dust covers with voice, data and Cat5e icons
- Use: Any unloaded keystone wallplate or patch panel
- Certifications: UL-listed; complies with FCC Part 68

Surface Mount Keystone Boxes

Wall mount box for keystone jacks

Surface Mount Keystone Boxes from Cables To Go are ideal for topside applications where wall boxes are not practical. Available in 1, 2 and 12 jack versions, all offer snap-on covers for easy closure or access. Write-on labels with holders for easy station designation. One and two jack versions can be mounted for either side or base entry of cables and come with mounting screws, adhesive tape and cable ties for strain relief.

- Designed for Ethernet, audio/video and other applications
- Work with Keystone jacks and inserts from Cables To Go
- Write-on station designation labels
- Studs for cable tie fastening
- Certifications: UL-listed

Multimedia Keystone Wall Plates - Stainless Steel

Ideal for network and multimedia installations in commercial and institutional environments

Stainless Steel Multimedia Wall Plates from Cables To Go are designed with a plastic spacer that makes the keystone jack appear flush to the face. A variety of jacks and connectors will fill the wall plate openings to meet your specific requirements for voice, data, audio, etc. The inserts are a snap to install and remove, giving you a highly adaptable system. A space is even provided for identifying stations - simply write on the white insert with a fine tip permanent marker.

- Available in single gang and dual gang layouts
- Provides a professional appearance in commercial and institutional environments
- Rugged and easy to keep clean
- Mounts to any electrical box, or to surface mount box; compatible with NEMA standard openings and boxes

STRUCTURED WIRE SOLUTIONS

Stainless Steel Wall Plates

A stainless steel design durable enough for commercial and institutional environments

Add the finishing touch to A/V installations with decorative feedthrough wall plates. These wall plates are stamped from sturdy 20 gauge stainless steel and are designed to mount in standard electrical boxes or mud rings. The thick stainless steel composition provides better protection when compared to plastic wall plates in commercial environments, where constant wear and tear causes damage. Feedthrough connectors and identification markings make these wall plates simple to install. They are compatible with any existing wiring network. Feed through connectors are designed to offer lossless signal transfer and maximum insertions for a lifetime of service.

- Mounting hardware included
- Available in single and double gang
- Available in stainless or black

Passive HDMI™ & DVI Wall Plates

Pass-through or adapt HDMI or DVI based signals

Digital Series Passive Wall Plates from Cables To Go dress up any home theater, conference room or classroom and provide the final touch to your A/V installation. Engineered from the ground up, these wall plates were designed for ease of installation and to provide the best signal transfer possible. Unlike traditional pass-through wall plates, digital series wall plates from Cables To Go are constructed using 4-layer computer grade printed circuit boards. The PCB traces are engineered to maintain the critical impedance necessary to transfer the delicate digital signal. Use these wall plates for HDMI and DVI installations, or use them to adapt an HDMI connection to a DVI connection, or vice versa.

- Constructed using 4-layer computer grade PCB
- PCB traces engineered to maintain critical impedance
- Available in HDMI to HDMI, DVI to DVI, HDMI to DVI and DVI to HDMI configurations
- Fits standard electrical boxes and is compatible with Leviton Decora® brand trim plates
- 20AWG steel
- Lifetime warranty

USB SuperBooster Wall Plates & Dongles

29342

Decora® style wall plate or dongles with integrated transmitter/receiver sends a USB signal up to 150ft over Cat5

The USB SuperBooster Dongle Transmitter extends the distance of a USB device to a host computer up to 150ft, enabling you to place your USB projector, camera, printer, or other USB device exactly where you want it! The USB SuperBooster Dongle is powerful yet simple, with no drivers to install or special software required. It's also compatible with any computer that supports USB. This plug-and-play device consists of a transmitter unit and receiver unit incorporated into single gang Decora compatible wall plates or dongles. Numerous receiver options are available so you can customize the configuration to meet your own needs. Choose from a 2-Port wall plate receiver, a 2-Port dongle receiver, or a 4-Port dongle receiver. These options are ideal for applications where you need more than one USB device on the receiver side, or where you need a dongle instead of a wall plate on the receiver side.

- Extends the distance of a USB device from a USB-enabled computer up to 150ft
- Ideal for use with USB projectors, interactive white boards, cameras, printers, Web cams, hubs or any other USB device
- Wall plates fit a standard J-box
- Compatible with Leviton® Decora® brand cover plates
- Self-powered so no external power source is required
- Uses standard Cat5/Cat5e/Cat6 patch cable (not included) for ease of use and flexibility
- Included toolless IDC RJ45 connectors allow you to terminate your own cable
- Compliant with USB Specification 1.1
- Connectors:
 - Transmitter: USB Type B Female; RJ45 Female
 - Receiver: USB Type A Female; RJ45 Female

Note: Decora is a registered trademark of Leviton® Manufacturing Company, Inc. This Product is not manufactured or endorsed by the Leviton Manufacturing Company, Inc.

USB To Serial DB9 SuperBooster Wall Plate Kit

29343

Decora® style wall plate with an integrated transmitter/receiver that converts a serial signal to USB and extends up to 150ft over cat5

The patent pending USB To Serial DB9 SuperBooster Wall Plate from Cables To Go provides a connection between USB and the traditional RS232 serial port while conquering normal USB length limitations. This item extends the distance of a serial device to a host computer up to 150ft via USB so you can place your devices (such as a cellular phone, PDA, digital camera, modem, scanner, bar code reader, printer or ISDN terminal adapter) exactly where you want them! This plug-and-play device consists of a transmitter unit and receiver unit incorporated into two, single gang Decora compatible wall plates. The transmitter/receiver pair is connected via standard Cat5, Cat5e or Cat6 UTP cable allowing for easy in-wall installation. This makes for a clean, finished installation important in homes, classrooms, offices and anywhere you don't want visible cables lying around. Use pre-terminated network cables or pull un-terminated cable and use the included tool less IDC RJ45 connectors. The USB To DB9 Serial SuperBooster Wall Plate Kit is bus powered so no external power source is required.

- Extends the distance of a serial device from a USB enabled computer up to 150ft
- Supports automatic handshake mode
- More than 230kbps data transfer rate
- Supports remote wake up and power management
- 96 byte buffer each for upstream and downstream data flow
- Ideal for use with serial devices such as cellular phones, PDAs, digital cameras, modems, scanners, bar code readers, printers or ISDN terminal adapters
- Fits a standard J-box
- Compatible with Leviton® Decora brand cover plates
- Bus-powered so no external power source is required
- Uses standard Cat5/Cat5e/Cat6 patch cable (not included) for ease of use and flexibility
- Included toolless IDC RJ45 connectors allow user to terminate their own cable
- Compliant with USB Specification 1.1
- Connectors:
 - Transmitter: USB Type B Female; RJ45 Female
 - Receiver: Serial DB9 Female; RJ45 Female
- Windows® 7 Compatible

Note: Decora is a registered trademark of Leviton® Manufacturing Company, Inc. This Product is not manufactured or endorsed by the Leviton Manufacturing Company, Inc.

Wall Plate Mounting Brackets

Mounts a wall plate without a back box

Securing flush mount wall plates without a wall box is a snap with Wall Plate Mounting Brackets from Cables To Go. Trace around the inside of the bracket, route out your hole and bend the stay tabs into position. Wall plates attach directly into pretapped holes.

- Eliminates the need for a back box
- Works with all standard size wall plates
- Compatible with NEMA standards

Item#	Description	MSRP
03784	Flush Mount Single Gang Bracket	\$2.49
03785	Flush Mount Double Gang Bracket.....	\$2.99

Wall Boxes

Secure flush mount wall plates

Wall Boxes from Cables To Go accommodate both standard and pro flush mount, single-gang wall plates. They are ideal for mounting wall plates and modules on wall or cabinet surfaces. Breakouts on four sides for easy cable entry.

- For use with:
 - Pro Series single gang, flush mount wall plates - see page 127
 - Keystone single gang, wall plate

Item#	Description	MSRP
03838	Single-Gang Wall Box - Ivory.....	\$3.99
03839	Single-Gang Wall Box - White.....	\$3.99

Snap In Surface Mount Boxes

Wall mount box for 1-in module inserts

Surface Mount Boxes from Cables To Go for snap-in modules feature a compact, easy to install design. All models feature a snap-on top cover with write-on designation labels and clear covers. Self-adhesive tape and magnets (two and three module versions only) for metal surface mounting are supplied with the box. Use only one snap-in modules for different configurations of jacks and connectors for maximum installation flexibility. Breakouts are provided on three sides of the box for raceway or cable entry. Modules can be easily snapped out the front so that changes can be made without opening the box.

- Designed for Ethernet, audio/video and other applications
- Write-on station designation labels
- Studs for cable tie fastening
- Raceway/cable breakouts: .75in x .5in, 1.25in x .75in, 1.75in x 1in
- For use with snap-in modules - see page 134

- Lifetime warranty

Surface Mount Boxes For Fiber

Designed for both multimedia and optical fiber applications

Surface Mount Boxes For Fiber from Cables To Go offer flexibility, durability and a clean appearance suitable for any environment. This fiber box enables you to build hundreds of custom configurations to meet your exact needs. Once assembled, no disassembly is required to remove the modules - they disengage with pressure applied to the sub-surface tabs (we recommend using a small screwdriver).

- Breakouts on ends, side and back for raceway/cable entry
- Dual rings to preserve the fiber's bend radius and provide a straight path to the module
- Mounting screw hole patterns that match single and double-gang wall boxes
- Corner studs for easy cable tie fastening
- Molded port identification on cover
- Write-on station labels with clear plastic protectors
- Lifetime warranty
- For use with:
 - 1 in fiber modules
 - Fiber Patch Cables

Item#	Description	MSRP
03846	Fiber Surface Mount Box 6-Port - Ivory	\$8.99
03847	Fiber Surface Mount Box 6-Port - White.....	\$8.99

STRUCTURED WIRE SOLUTIONS

Wall Plates

Wall plate for snap-in modules

Flush Mount Wall Plates from Cables To Go are aesthetically pleasing and provide superior quality. Each wall plate accepts a wide variety of snap-in modules for maximum installation flexibility. The snap-in modules can be easily snapped out the front so that changes can be made without removing the plate after installation. Write-on designation labels with clear plastic holders for system or station identification are included.

- Designed for Ethernet, voice, audio/video and many other applications
- Mounts to any electrical box, or to surface mount box
- Compatible with NEMA standard openings and boxes
- Lifetime warranty
- Accept the following combinations per gang
 - (3) 1in inserts
 - (2) 1.5in angled inserts
 - (1) 1.5in angled insert
 - (1) 1in insert
 - (1) .5in blank insert

03419	Double Gang Wall Plate - White	\$2.99

Audio/Video Snap-in Modules

Feed-through module for video/CATV applications

For applications that demand extra configuration flexibility, use Snap-in Modules and Wall Plates from Cables To Go. They're ideal for multimedia networking and A/V environments because each module can be snapped out of the wall plate without wall plate removal. Insert a small screwdriver into the tab hole and press inward. The entire module and attached cable come out. Choices include multiple fiber, audio/video and BNC styles. To create phone and Ethernet connections, use the desired Keystone jacks with the 1 or 2-Port Blank Modules listed below. To allow for future expansion, take advantage of both .5in and 1in blank modules, which ensure you always have extra port availability.

- Lifetime warranty
- For use with:
 - Snap-in Wall Plates - each wall plate gang can accept any combination totaling 3in
 - Snap-in Surface Mount Boxes - see page 127

STRUCTURED WIRE SOLUTIONS

Inside A Wired Home

The Master Bedroom Suite

As your retreat, shouldn't your most comforting room provide access to your favorite music and TV programming? Lie back and lose yourself in sound as you control the components in your home theater as though they were right next to you.

Children's Room

Bring the magic of media and the Internet to a special place, just for your children. Local source capabilities mean they can experience their music and programming, even while you are enjoying your music and programming in other rooms.

Home Office

The center of your PC network and home to your printer, scanner and other shared peripherals, the home office doesn't need to be without access to fun! Select your favorite music and control track access, volume or radio stations while you surf the 'net or check those important emails.

Home Theater

More than a big TV and a stack of electronics, a well-designed home theater is about easy control, great movies and music, and unlimited future compatibility. Make your electronics investment work for you in any room. Put the control where it belongs. In your hands!

STRUCTURED WIRE SOLUTIONS

Residential Structured Wiring

Residential Structured Wiring means a smart home. Cables To Go makes it easy for you to make your home a smarter place to live, work and play. A wide selection of home automation and control products means you can add value, comfort and convenience to your installed home technologies. From television signal distribution and wholehouse music to computer networking and remote operation of your audio / video components, you can take control!

Cables To Go distribution modules, patch panels and control enclosure systems can be configured to power as many as 8 music zones throughout your home. Up to 4 telephone lines can be distributed to 12 or more locations. Control your CD player, radio or satellite tuner and amplifier from any room. Closed circuit video of the nursery or front door is not only possible, it's easy!

Telecom Distribution Modules

Distribute 4 lines to 6, 8, 12 or more locations throughout your home. Security input and DSL Internet access filter options are available.

Video Distribution

A full selection of splitters, multi-switches and RF amplifiers, means your satellite, cable or off-air television can easily be delivered to any set in your house.

Data-Network Modules

A local area network (LAN) with Cat5e performance allows high-speed Internet access and your computer peripherals to be centralized, while providing complete access for the family from any room.

Remote Control

Locate your audio and video equipment where it fits best, even if that is in a closet or behind solid doors. IR distribution carries remote control signals from you to your equipment.

Audio Distribution

Connect up to 4 separate source components to as many as 8 different rooms. Listen to any source in any room or every room!

Enclosure Panels

Protect the home run location for your distribution modules, enclosures are available in three different sizes for any application.

Speaker Volume Control

Convenient in-wall volume controls assure a comfortable listening level that you control in the room. Local source inputs via a 3.5mm plug.

Wall Plate

The decor of your home is a reflection of your appreciation for detail and environment. Your technology should fit your style. Enjoy a clean, professional and finished look with a wide selection of custom wall plates.

Residential Structured Wiring Kit; Telephone, Cable TV & Network

The necessary parts for starting your residential structured wiring system

The Residential Structured Wiring Products Starter Kit contains a 28in or 14in enclosure for home run wires and houses the distribution modules. These kits include the modules and wall plates to wire four zones for telephone, cable television, a local area network, audio distribution module and volume controls. You can expand to eight zones as your needs grow or if you have a large wiring project.

Wiring Kit #37088

- (8) RJ45 Wall Plates #27414
- (1) 28in Enclosure #37002
- (1) 8-Port Telco Module #37006

Residential Structured Wiring Enclosures

Protect and organize your structured wiring systems and modules

Wiring System Enclosures from Cables To Go are an efficient and effective distribution solution for your home or small office audio/video/telephony/control system. These structured wiring enclosures are the home run point of your system. Available in three sizes to accommodate needs ranging from an apartment to a large custom home, these boxes accept structured wiring modules from Cables To Go. Enclosures feature cable-tie points as well as knockouts for cable entry on top, rear or bottom. A knockout for an electrical "J" box is provided. Enclosures from Cables To Go can be surface-mounted or flush mounted. A matching high-impact plastic cover is included with the boxes to protect enclosed equipment.

- Ideal for SOHO (small office/home office) and home theater installations
- Knockouts on top, bottom and rear for cable entry
- Cable tie points within the box to organize cables
- Flush mount or surface mount options

37001

Residential Structured Wiring Brackets

Mount residential structured wiring system modules and organize wiring

Wiring System Brackets from Cables To Go are an efficient and effective distribution solution for your home or small office audio/video/telephony/control system. Ideal for small systems in homes and apartments, the smaller size also makes these brackets ideal for sub-system break point within your home theater or distribution system. Brackets are available in 11in and 14.5in heights, are single module width and include a wrap-around cover. These brackets accept structured wiring modules and other common modules as well.

- Two sizes: 11in and 14.5in
- Single module width
- Ideal for sub-systems like IR distribution
- Includes high-impact, wrap-around cover
- Surface mount only

STRUCTURED WIRE SOLUTIONS

Telco Modules

37010

Distribute up to 4 telephone lines to as many as 12 locations throughout your home

Telco Modules from Cables To Go provide high performance distribution for your telephone system. The 110-style punchdown terminals for 4-pair wire allow as many as four lines to be distributed to 12 locations. The DSL filter module has a dedicated throughput for the modem and centrally filtered signals for the telephone jacks throughout the house, eliminating unsightly wall jack DSL filters.

- 110-style punchdown terminals
- Four telephone line capability
- Bridge modules together for larger systems
- DSL filter eliminates unsightly DSL line cable filters

Item#	Description	MSRP
37006	8-Port Telco Module	\$44.99
37010	8-Port Telco Module w/DSL Filter	\$64.99
37007	12-Port Telco Module	\$69.99

8-Port Cat5e Patch Panel Module

37012

Install a Local Area Network (LAN) in your home

Patch Panel Modules from Cables To Go allow you to build a home network and reconfigure it as your needs change. Designed for use with the Structured Wiring Panels from Cables To Go, these modules snap into place. Terminate your Cat5e twisted pair wire to the 110-type punchdown terminals and then connect your router or hub with standard patch cables. Patch Panel Modules allow you to share peripherals like multi-media servers, scanners, printers and your broadband connection with multiple locations.

- Easy installation using Cables To Go Structured Wiring Panels
- 110-type punchdown terminals for Cat5e UTP cable
- Meets requirements for Category 5 wiring and installation

Item#	Description	MSRP
37012	8-Port Cat5e Patch Panel Module	\$49.99

RF Splitter Modules

37015

Distribute CATV or antenna signals to televisions throughout the house

RF Splitter Modules from Cables To Go are designed for easy installation in structured wiring system enclosures. RF Splitter Modules distribute cable TV or off-air television signals to 4, 6, 8 or more locations. A video amplifier module may be required to enhance CATV or antenna signal strength. Low-loss and high isolation prevent external noise from interfering with the signal.

- Distribute antenna or cable television signal to 8 or more locations
- Ideal for cable TV or antenna signals, both digital and analog
- Easy snap-in design for use with structured wiring enclosures

Item#	Description	MSRP
37013	4-Way RF Splitter Module	\$19.99
37014	6-Way RF Splitter Module	\$24.99
37015	8-Way RF Splitter Module	\$29.99

RF Amplifier Modules

37019

Increase CATV or antenna signal levels for clean distribution

RF Amplifier Modules from Cables To Go are designed for quick and easy installation into our structured wiring panels. Amplify your off-air antenna or cable TV signal for distribution throughout your house. Improve signal for a bright, clear picture. Low-noise amplifiers are ideal for boosting the signal prior to long runs or connection to a splitter module. Bi-directional amplifiers are compatible with cable modems and video-on-demand services. The 3 x 8 amplifier features 2 additional inputs for use with locally generated signals from RF modulators.

- Amplify off-air or cable TV signals for long cable runs
- Amplify signal prior to splitting for distribution throughout your house
- Bi-directional amplifiers provide a return path for cable modems and VOD

Item#	Description	MSRP
37019	3 x 8 Bi-Directional RF Distribution Amplifier	\$149.99

STRUCTURED WIRE SOLUTIONS

Digital Satellite Multi-Switch Module

Distribute digital satellite service to receivers in up to four rooms for independent viewing

Digital Satellite Multi-Switch Modules from Cables To Go are designed for quick and easy installation into our structured wiring panels. Split the LNB signal of circular-polarized small dish satellite systems for viewing on up to four separate IRDs. Multiplex an antenna feed for local digital and high definition programming, and combine the feed from a dual LNB digital satellite dish for distribution throughout your house. Connect a diplexer at the receiver end to separate the two signals. No additional power is necessary since the multi-switch draws operating power directly from the digital satellite receiver.

- Digital satellite signal distribution to 4 satellite receivers
- Antenna or cable TV input combined with satellite signal on one cable
- Simple snap-in module for quick and easy installation

37017

Item#	Description	MSRP
37017	3 x 4 Digital Satellite Multi-Switch.....	\$89.99

8 Input RF Signal Combiner

Combine up to 8 locally generated signals for distribution through an RF system

RF Signal Combiner Modules from Cables To Go are designed for easy installation into our distribution panels. An RF Signal Combiner creates a head-end similar to a cable company. RF signals from up to 8 modulators are combined into a single output signal that can be distributed through your house, office or school. CCTV cameras, satellite receivers and VCRs are some of the potential sources that you can easily share through an RF system via a modulator. Use one of the inputs for off-air antenna or cable television, and set your modulators for operation on unused channels.

- Combine outputs from up to 8 RF modulators
- Combine modulated signals with off-air antenna or cable TV signal

37020

Item#	Description	MSRP
37020	8 x 1 RF Signal Combiner Module.....	\$119.99

Audio Distribution Amplifier Modules

Whole-house audio distribution made easy

A whole-house sound system distributes music and audio programming to speakers installed in multiple rooms of your home. Audio Distribution Amplifier Modules from Cables To Go are an easy, economical way to provide distributed sound. A line level input for a CD player, tuner or tape deck and 4 or 8 outputs supply speaker-level signals to volume controls mounted in selected rooms. Use this module in combination with IR distribution and you can select tracks on the disc or change radio stations from any connected room. These modules, designed for use with Stereo Volume Controls from Cables To Go, provide up to 20 watts per channel.

- Distribute sound to 8 zones throughout the house
- 1 line level input for a tuner, CD or tape deck
- Use in combination with an IR distribution system
- Up to 20 watts per channel
- Use with Stereo Volume Control #37023

Plenum Rated 40 Watt Stereo Amplifier

Compact, powerful amplifier designed for installation in plenum air space

Save money, time and space with our plenum rated audio amplifier. Laboratory tested and verified, this unit can be installed directly in a plenum air space without enclosing it in a separate plenum-safe box. Its minimal size and weight allow for easy installation virtually anywhere. With a simple design and 40 watts RMS at 4Ω, this stereo amplifier provides excellent sound reinforcement in classrooms, conference rooms, training centers, offices, restaurants and other settings. Dual inputs (RCA stereo audio, 3.5mm stereo audio) are adjusted separately, ensuring the appropriate volume for each connected device.

- 40 Watts RMS output @4Ω (20watts per channel)
- Two Isolated Inputs: 1 L/R RCA, 1 3.5mm stereo
- Gain control for each input
- Short circuit protection
- Quick connect phoenix connector for power and speakers
- Frequency response: 18Hz~22kHz
- Size: 4"(D)x 6"(W)x 1.5"(H)
- Warranty: 3 years manufacturers warranty

STRUCTURED WIRE SOLUTIONS

4-Input Multi-Zone Audio Distribution Modules

Whole-house audio distribution made easy

Audio Distribution Modules from Cables To Go deliver whole-house audio from 1 or 4 sources such as CD, DVD, satellite or tuner to 4 or 8 locations. Amplification built into the volume control allows true control in the room! Press the selector button to toggle through the attached devices. This unique volume control provides up to 10 watts of power and optional infrared control of the source. This unit also features a 3.5mm input jack so that you can connect a portable CD or MP3 player directly to the volume control for local playback. Easy installation and maximum versatility equal real value.

- 4 line level inputs at the distribution module
- Connect via economical UTP cable
- 10 watt amplifier within the volume control
- 3.5mm jack for MP3 or portable CD player
- IR capability to control audio components

Infrared Remote Control Distribution Modules

Extend remote control ability to any room in the house

The Infrared (IR) Remote Control System from Cables To Go is designed to operate alongside sophisticated audio and video systems. Any IR device connected to the system can be controlled remotely through the IR control system. Put your components where you would like them! The IR control system will allow you to operate your equipment as if it was sitting next to your television, even from another room. The control modules are connected with economical and easy to install UTP cable. The targets and emitters operate on 12VDC and are compatible with most other IR devices. The modules can be installed into your structured wiring panel or used with the structured wiring brackets for smaller installations.

- Control A/V devices located behind doors or in other rooms
- Connected via economical UTP cable
- 12VDC operation compatible with common IR devices

37031

Item#	Description	MSRP
37029	8 x 8 IR Distribution Modules.....	\$169.99

DC Power Supply Modules

Convenient power for Cables To Go active structured wiring modules

RF amplifiers, hubs, routers and audio amplifiers require power ranging from 5VDC to 12VDC for operation. Power supplies and outlet strips consume valuable space within the enclosure. DC Power Supply Modules from Cables To Go provide 12VDC, 7.5VDC and 5VDC regulated power for active devices, providing overload and short circuit protection from a clean high power source. Three fixed 12VDC outputs and one switchable 7.5 or 5VDC output for most DC powered devices.

- Provides power for active devices in a structured wiring enclosure
- 3 fixed 12VDC outputs and one switchable 7.5/5VDC output
- Overload and short circuit protection
- Built-in EMI filter
- Clean output power with low ripple

STRUCTURED WIRE SOLUTIONS

Cabling Raceway

Designed to be out of sight

Cables To Go offers a full line of cabling raceways and fixtures to fulfill all of your installation needs. Each cable raceway features a large enough base to provide an excellent adhesive surface, and is made from 94V0 PVC. The aesthetic, low-profile design blends into any environment, while a number of complimentary fittings and accessories allow you to adjust the run as needed. All Cables To Go products are EIA/TIA compliant, and comply with industry standard Cat5 requirements for bend radius.

Structured Wiring System Accessories

Common accessories for use with structured wiring enclosures

The Structured Wiring System Accessory Package from Cables To Go includes four plastic grommets, metal mounting tabs, hook-and-loop fastener and screws. Plastic grommets are available separately in four packs to protect wires from abrasion. Nylon latches, which securely hold module mounting plates, are available in 10 packs.

- Grommets protect cables from abrasion entering the enclosure
- Replace latches broken while installing or reconfiguring the enclosure
- Mounting tabs and screws securely hold devices to mounting plates

ENTERPRISE SOLUTIONS

Enterprise computing and networking applications demand superior connectivity solutions. Cables To Go™ offers a wide variety of solutions to support the exacting demands of enterprise applications. From standard single-mode and multimode fiber patch cables to custom, plenum rated LOMMF pre-terminations, Cables To Go has the products and services to support virtually every enterprise connectivity need.

Cables To Go also offers a wide array of copper-based solutions, including Cat5e/Cat6 cables, plenum rated VGA cables and KVM cables. These cables compliment our line of enterprise hardware solutions, including Minicom enterprise KVMs and video distribution systems. Learn more about enterprise hardware solutions from Cables To Go starting on page 168.

For legacy applications and devices, Cables To Go continues to be the market leader. We offer a broad array of SCSI solutions commonly found in scientific, government and storage applications. We also provide serial and parallel solutions that can be customized to meet specific application needs starting on page 179.

Custom Fiber Solutions

- With no fiber preparation, termination kits or specialized termination training required, Custom Fiber Solutions from Cables To Go save installers time and money
- Pulling eyes, identification labels and spooled solutions reduce the amount of installation time
- Improved optical performance
- Cables are fully tested and ready for installation
- Factory terminated connectors provide improved end-to-end performance
- Custom Fiber Solutions from Cables To Go reduce waste caused by improper field termination
- Reduce the overhead required to outfit field installers with multiple types of fiber, connectors and tools
- Custom pre-terminated fiber solutions ship in as little as three business days

Custom Fiber Options Include

- 62.5/125 and 50/125 Multimode Fiber
- 10 Gigabit Laser Optimized 50/125 Multimode Fiber (LOMMF)
- 9/125 Single-Mode Fiber
- Mode Conditioning Patch Cables
- Multi-Fiber Solutions (Pre-terms)
- MTP Trunk and Break-Out Cables
- Custom Solutions for Plenum, Low-Smoke Zero Halogen, Direct Burial and Overhead applications
- ST, SC, LC, FC, MTRJ, Escon, MTP connectors and more
- Identification labels
- Pulling eyes
- Installer-friendly spools for faster and easier installation
- M.L. spec also are available

Fiber Count & Construction

- 1-288 Strands
- Simplex Cable
- Duplex Zipcord
- Multi-Strand Breakout Cable
- Distribution Cable

Jacket Types

- PVC - Also referred to as OFNR; for use in riser applications
- Plenum - Also referred to as OFNP; for use in air spaces (plenums); when exposed to extreme heat or flames these cables do not emit toxic chlorine gases; this designation is required by the NEC to be stamped on all cable jackets that meet this rating
- Other - LSZH, Armored Direct Burial

Custom Fiber Patch Cable Configuration Made Easy

Cables To Go makes it easy for resellers to configure basic fiber patch cables. Just answer the questions below and call Cables To Go at 800-287-2843, where a friendly sales representative can assist you with your order.

Select Fiber Type

- 9/125 Single-Mode
- 50/125 Multimode
- 50/125 Laser Optimized Multimode
- 62.5/125 Multimode

Select Jacket Type

- PVC
- Plenum
- Low Smoke Zero Halogen (LSZH)

Select Strand Count

- Simplex (1)
- Duplex (2)
- Multiple Strands

Select the connectors* for each end of cable

- *LC, MTRJ, SC, ST
- Note: Additional connector styles available - please inquire

Length

- Typically in meters, but can be constructed in feet

Note: With the above information call Cables To Go at 800-287-2843 for a custom quote and exact lead time.

62.5/125 Multimode Fiber Optic Patch Cables

Ultra-high bandwidth for high-speed applications

The 62.5/125 Multimode Fiber Optic Cables from Cables To Go handle network speeds up to 1000Mbps. The patented injection molding process gives each connection greater durability in resisting pulls, strains and impacts from cabling installs.

- Type: Multimode; duplex
- Color-coded connector keys
- 100% optically inspected and tested for insertion loss
- Immune to electrical interference
- Application: Gigabit Ethernet, FDDI, multimedia, ATM or any application that requires high-speed data transfer

Note: Any length or color is available through custom orders, contact your sales rep. for details.

LSZH Duplex 62.5/125 Multimode Fiber Patch Cables

High-speed patch cables for use where protection from toxic and corrosive gasses is critical

High quality 62.5/125 Low-Smoke Zero-Halogen (LSZH) Fiber Patch Cables from Cables To Go are designed to meet or exceed industry specifications. Use to connect fiber optic equipment to fiber optic cross-connects, interconnects and information outlets. Each cable is individually 100% optically inspected and tested for insertion loss and quality. LSZH jackets are composed of materials that lessen the emissions of smoke and halogens when the cable is exposed to extreme temperatures. This reduces the amount of harmful toxic and corrosive gasses that cabling made with plastic materials would otherwise emit into the air during combustion. This construction makes LSZH cables ideal for use where the protection of people and equipment from harmful corrosive gasses is absolutely critical.

- LSZH jackets provide protection from toxic and corrosive gasses in poorly ventilated spaces and other areas where it is most critical
- Fully compatible with multimode fiber applications
- A cost effective solution, that provides lower loss and higher bandwidth supporting longer distances
- Perfect for use in Gigabit Ethernet applications
- Lifetime warranty against defects of materials and workmanship

Plenum Rated Duplex 62.5/125 Multimode Fiber Patch Cables

For high-speed multimode fiber applications - CMP-rated for in-wall installations, colored for easy identification

High quality, Plenum Rated Fiber Patch Cables from Cables To Go are designed for Ethernet, multimedia or communication applications. The patented injection molding process gives each connection greater durability in resisting pulls, strains and impacts from cabling installs. Each cable is 100% optically inspected and tested for insertion loss before you receive it. The pull-proof jacket design surrounds the popular 62.5/125 multimode fiber. These cables also provide the fire protection required to run within walls and air plenums without the need for conduit. These multi-colored fiber optic patch cables allow you to quickly identify various applications present in your fiber distribution system.

- Fiber Size: 62.5/125 micron
- Type: Multimode; duplex
- Color-coded connector keys available in orange, red, blue, green and black
- 100% optically inspected and tested for insertion loss
- CMP-rated cable jacket provides the fire protection required to run these cables within walls and air plenums without the need for conduit
- Molded form construction
- Immune to electrical interference
- Application: Gigabit Ethernet, FDDI, multimedia, ATM or any application that requires high-speed data transfer

50/125 Multimode Fiber Optic Patch Cables

For high-speed multimode fiber applications

- Buffer material: PVC
- Buffer OD: 900 µm
- Jacket material: PVC (OFNR-rated)
- Jacket OD: 3.0 mm
- Attenuation @850 nm: 3.75 dB/km
- Attenuation @1310 nm: 1.5 dB/km
- Min. bandwidth @850 nm:160 kHz/km
- Min. bandwidth @1310 nm:500 kHz/km
- Maximum tensile load: 100 N/cm
- Loaded min. bend radius: 5cm
- Unloaded min. bend radius: 3cm
- Crush resistance: 750 N/cm
- Impact resistance: 1000 cycles
- Flex resistance: 5000 cycles

Note: Any length or color is available through custom orders, contact your sales representative for details.

Common Fiber Connectors

Many different connector types exist for fiber optic cabling and electronics of today's high tech networks. It is not always necessary to match identical connector types on both ends of the cable; instead, the connectors on the cable should match the inputs/outputs of the electronics being connected. Some of the most common connections found in networking applications are: ST, SC, LC and MTRJ. The ST connection, an acronym for "straight tip", is a round bayonetlocking connector which resembles the BNC connector used on audio/video devices. The SC connection, an acronym for "subscriber connector", is a square shaped connection with a push/pull locking mechanism. The SC interface is still popular in a lot of today's datacomm applications. The LC connection, an acronym for "Lucent connector", is half the size of an SC connection and uses a locking tab to hold the connector in place. LC is growing in popularity and can be found on network electronics that are manufactured today. The MTRJ connection, an acronym for "mechanical transfer registered jack" combines duplex fibers into a single connector providing a single convenient connection. MTRJ uses a locking tab method similar to LC connectors by using a single plastic locking tab to hold the connector in place.

LSZH Duplex 50/125 Multimode Fiber Patch Cables

High-speed patch cables for use where protection from toxic and corrosive gasses is critical

The 50/125 Low-Smoke Zero-Halogen (LSZH) Fiber Optic Patch Cables from Cables To Go are designed to meet or exceed industry specifications. These fiber patch cables are perfect for Fast Ethernet, Fibre Channel, ATM and Gigabit Ethernet applications. Use to connect fiber optic equipment to fiber optic cross-connects, interconnects and information outlets. Each cable is individually 100% optically inspected and tested for insertion loss and quality. LSZH jackets are composed of materials that lessen the emissions of smoke and halogens when the cable is exposed to extreme temperatures. This reduces the amount of harmful toxic and corrosive gases that cabling made with plastic materials would otherwise emit into the air during combustion. LSZH cables are ideal for use where the protection of people and equipment from harmful corrosive gasses is absolutely critical.

- LSZH jackets provide protection from toxic and corrosive gasses in poorly ventilated spaces and other areas where it is most critical
- Fully compatible with multimode fiber applications
- A cost effective solution that provides lower loss and higher bandwidth supporting longer distances
- Lifetime warranty against defects of materials and workmanship
- Buffer OD: 900µm
- Jacket OD: 3.0mm
- Attenuation @850 nm: 3.75dB/km

Plenum Rated Duplex 50/125 Multimode Fiber Patch Cables

For high-speed multimode fiber applications - CMP-rated cable jacket enables in-wall installation without the use of conduit

Get the performance you demand at a price that makes sense with Plenum Rated 50/125 Multimode Fiber Patch Cables from Cables To Go. They provide higher bandwidth and transmission rates and support longer distances with lower loss than 62.5/125 fiber, but are still cost effective. Perfect for use with today's narrower aperture components, they are fully compatible with multimode applications. The 50/125 multimode patch cables are well-suited for protocols such as Ethernet, Fibre Channel, Infiniband, ATM and Internet Protocol. The plenum rating provides the fire protection required to run within walls and air plenums without the need for conduit.

- Fully compatible with multimode fiber applications
- A cost effective solution that provides lower loss and higher bandwidth supporting longer distances
- Perfect for use in Gigabit Ethernet applications
- CMP-rated cable jacket provides the fire protection required to run these cables within walls and air plenums without the need for conduit
- Lifetime warranty against defects of materials and workmanship
- Color coded cables available in orange, red, blue, green and black
- Buffer OD: 900µm
- Attenuation @850 nm: 3.75dB/km
- Attenuation @1310 nm: 1.5dB/km
- Min. bandwidth @850 nm: 160kHz/km
- Min. bandwidth @1310 nm: 500kHz/km
- Maximum tensile load: 100N/cm
- Loaded min. bend radius: 5cm
- Unloaded min. bend radius: 3cm
- Crush resistance: 750N/cm
- Impact resistance: 1000 cycles
- Flex resistance: 5000 cycles

ENTERPRISE SOLUTIONS

10Gb Laser Optimized Multimode Fiber Patch Cables

50 micron aqua fiber for LED/VCSEL laser light sources and 10-Gigabit applications

Laser-Optimized Multimode Fiber (LOMMF) Patch Cables from Cables To Go provide backward compatibility with existing 50/125 equipment while providing the performance headroom required to support laser light sources and 10-Gigabit applications.

Applications continue to grow faster and larger, consuming more bandwidth and placing greater demands on network infrastructure. As the marketplace moves towards 10 Gigabit Ethernet (10Gb) and beyond, it becomes necessary to come up with bigger pipes to carry traffic such as high definition video, VoIP and Web-based computing. Right now, the leading choice of media for 10Gb applications is fiber optic patch cable.

- Fully compatible with 50/125 Multimode fiber applications
- Use with both LED and VCSEL laser light sources
- Designed for use in 10-Gigabit ethernet applications
- Optical Multimode 3 (OM3) fiber supporting 2000MHz EMB at 850nm
- 10Gbps transfers up to 300m using 850nm VCSEL source
- Lifetime warranty against defects of materials and workmanship

Note: Any length is available through custom orders, contact your sales representative for details.

Domestic Fiber Patch Cables

Fiber patch cables to your exact specifications

Domestic Standard Multimode, 10 Gigabit Laser-Optimized and Single-Mode Assemblies are a core part of our business; but we also offer mode-conditioning patch cables, attenuators, Node/Drop service cables, fiber optic launch boxes and multi-fiber assemblies to ensure our customers have the exact solution they need when they need it. Cables To Go specializes in providing multi-fiber assemblies, including MTP, that exceeds your specifications and time requirements. Our cables save field termination time and money while providing a superior factory termination. We carefully construct these cables with the installer in mind to ensure reliability and simplicity for any type of application.

- Faster, easier installation
- With no fiber preparation, termination kits or specialized termination required, Domestic Cables To Go Custom Fiber Solutions save installers time and money
- Pulling eyes, identification labels and spooled solutions reduce time required for installation
- Cables are fully tested and ready for installation
- Factory terminated connectors provide improved end-to-end performance
- Quick turn-around time
- Custom preterminated fiber solutions ship in as little as three business days

Note: Any length or color is available through custom orders, contact your sales representative for details.

Duplex 9/125 Single-Mode Fiber Patch Cables

Color coordinate your high-speed single-mode fiber optic patching systems for easy identification

9/125 Single-Mode Fiber Patch Cables from Cables To Go provide high bandwidth and transmission rates and support longer distances, but are still cost effective. These multicolored fiber cables enable you to quickly identify various applications present in your fiber distribution system. The connectors on each end are color-coded for easy identification in a congested patch field.

- A cost effective solution that provides higher bandwidth and supports longer distances
- Perfect for use in Gigabit Ethernet applications
- Headroom for tomorrow's higher bandwidth needs
- Color-coded connector keys available in yellow, red, blue, green and black
- Lifetime warranty against defects of materials and workmanship
- Connectors: (2) ST to (2) SC
- Buffer material: PVC
- Buffer OD: 900µm
- Jacket material: PVC (OFNR-rated)
- Jacket OD: 3.0mm
- Attenuation @1310 nm: 1.0dB/km
- Attenuation @1550 nm: 0.75dB/km
- Maximum tensile load: 100N/cm
- Loaded min. bend radius: 5cm
- Unloaded min. bend radius: 3cm
- Crush resistance: 750N/cm
- Impact resistance: 1000 cycles
- Flex resistance: 5000 cycles

Plenum Rated 9/125 Duplex Single-Mode Fiber Patch Cables

For high-speed singlemode fiber applications - CMP-rated for in-wall installations, colored for easy identification

Get the performance you demand at a price that makes sense with Plenum-Rated 9/125 Single-Mode Fiber Patch Cables from Cables To Go. These patch cables provide high bandwidth and transmission rates and support longer distances, but are still cost effective. They also provide the fire protection required to run within walls and air plenums without the need for conduit. Perfect for use with today's high-speed networks while providing headroom for tomorrow's higher bandwidth requirements. These multi-colored fiber optic patch cables enable you to quickly identify various applications present in your fiber distribution system. The connectors on each end are color-coded for easy identification in a congested patch field.

- Perfect for use in Gigabit Ethernet applications
- Headroom for tomorrow's higher bandwidth needs
- CMP-rated cable jacket provides the fire protection required to run within walls and air plenums without the need for conduit
- Color-coded connector keys available in yellow, red, blue, green and black
- Lifetime warranty against defects of materials and workmanship
- Buffer OD: 900µm
- Jacket OD: 3.0mm
- Attenuation @1310 nm: 1.0dB/km
- Attenuation @1550 nm: 0.75dB/km
- Maximum tensile load: 100N/cm
- Loaded min. bend radius: 5cm
- Unloaded min. bend radius: 3cm
- Crush resistance: 750N/cm
- Impact resistance: 1000 cycles
- Flex resistance: 5000 cycles

Note: Any length or color is available through custom orders, contact your sales representative for details.

Simplex 9/125 Single-Mode Color Fiber Patch Cables

Color coordinate your high-speed single-mode fiber optic patching systems for easy identification

9/125 Single-Mode Fiber Patch Cables from Cables To Go provide high bandwidth and transmission rates and support longer distances, but are still cost effective. These multicolored fiber optic patch cables enable you to quickly identify various applications present in your fiber distribution system. The connectors on each end are color-coded for easy identification in a congested patch field.

- A cost effective solution that provides higher bandwidth and support for longer distances
- Perfect for use in Gigabit Ethernet applications
- Headroom for tomorrow's higher bandwidth needs
- Color-coded connector keys available in yellow, red, blue, green and black
- Lifetime warranty against defects of materials and workmanship
- Buffer material: PVC
- Buffer OD: 900µm
- Jacket material: PVC (OFNR-rated)
- Jacket OD: 3.0mm
- Attenuation @1310 nm: 1.0dB/km
- Attenuation @1550 nm: 0.75dB/km
- Maximum tensile load: 100N/cm
- Loaded min. bend radius: 5cm
- Unloaded min. bend radius: 3cm
- Crush resistance: 750N/cm
- Impact resistance: 1000 cycles
- Flex resistance: 5000 cycles

Plenum Rated 9/125 Simplex Single-Mode Fiber Patch Cables

For high-speed single-mode fiber applications - CMP-rated for in-wall installations, colored for easy identification

Get the performance you demand at a price that makes sense with Plenum Rated 9/125 Single-Mode Fiber Patch Cables from Cables To Go. They provide high bandwidth and transmission rates and support longer distances. They also provide the fire protection required to run within walls and air plenums without the need for conduit. Perfect for use with high-speed networks while providing headroom for future bandwidth requirements. These multi-colored fiber optic patch cables enable you to quickly identify various applications present in your fiber distribution system. Additional lengths, colors and connectors are available for quick delivery through our custom cable capabilities. For more information on custom cable, contact your sales representative.

- Perfect for use in Gigabit Ethernet applications
- Headroom for tomorrow's higher bandwidth needs
- Ideal for longer distance applications
- CMP-rated cable jacket provides the fire protection required to run these cables within walls and air plenums without the need for conduit
- Color-coded connector keys available in yellow, red, blue, green and black
- Lifetime warranty against defects of materials and workmanship
- Attenuation @1310 nm: 1.0dB/km; Attenuation @1550 nm: 0.75dB/km

MTP® Multimode Fiber Assembly Ribbon Cables - Plenum & Non Plenum

Fiber optic non-plenum and plenum rated MTP ribbon cables have 12 fibers in one pre-terminated assembly

The MTP Fiber Assembly Ribbon Cables from Cables To Go consist of 12 62.5/125 Multimode fibers under one OFNP plenum-rated jacket. Save time and money with MTP's increased ease of installation - simply pull one cable rather than 12. The small form factor of an MTP connector provides a higher port density. Make MTP your choice for high-density fiber networks!

- Easier installation
- Small, rugged design
- MTP connector is easy to engage and disengage with its push-pull release mechanism
- Latch design prevents the plug from snagging when patch cables are being routed
- Immune to electrical interference
- Application: Fast Ethernet, Fibre Channel, ATM and Gigabit Ethernet
- Available in both PVC and Plenum
- Available in 9/125, 50/125, 62.5/125 and 10Gb for a variety of applications

Note: Multimode Fiber Assembly Ribbon Cables are available in a wide variety of custom lengths and configurations - contact your sales representative for details.

Mode Conditioning Fiber Patch Cables

25328

Fully IEEE 802.3z compliant

Mode Conditioning Fiber Patch Cables from Cables To Go are fully compliant with IEEE 802.3z application standards. They are used in applications where new high-speed Gigabit 1000BASE-LX routers and switches are being deployed into existing multimode plants. Launching a single-mode laser into the center of a multimode fiber can cause multiple signals to be generated, which confuse the receiver at the other end of the fiber. These multiple signals, caused by Differential Mode Delay (DMD) effect, severely limit the cable distance lengths for operating Gigabit Ethernet. A mode conditioning patch cable eliminates these multiple signals by allowing the single-mode launch to be offset away from the center of a multimode fiber.

- Mode: 62.5/125µm
- IEEE 802.3z (Gigabit Ethernet) Compliant
- Assembled with FIS zirconia ferrule connectors
- Masks DMD effects
- Use in place of standard equipment-to-cable plant patch cable

Note: Custom lengths are available, contact your sales representative for details.

MTP Rack Mount Fiber Optic Enclosures & Panels

39102

Our rugged rack mount enclosures can securely house 3, 6 or 12 pre-terminated modules or adapter panels. They're available in 1, 2 and 4U configurations and feature front and rear doors for convenient access. The top panels also can be removed for additional access, and are equipped with rear knockouts for horizontal cabling entrances. Guaranteed for life, each enclosure is designed to be installed in racks or cabinets supporting 19in or 23in rails. The rack mount ears can also be adjusted to three different depths from front to rear, providing even more flexibility. For additional savings, 1 and 2U rack mount panels are available. Like the enclosures, they can accept 3 or 6 pre-terminated modules or adapter panels.

- Protects the delicate fiber optic terminations
- Provides a central access point for the fiber optic infrastructure in the data center with safe cable entrances and exits to protect the cable jackets from nicks, cuts and scrapes
- When used with our Quad LC Modules or adapter panels, up to 288 connection points can be achieved in a single 4U enclosure
- Both doors on the 1U enclosures are constructed of steel and feature a locking sliding inner tray for even more flexible access
- The 2U and 4U enclosures are equipped with a smoked plastic front door and a steel rear door
- Spool rings for securing and storing excess cable lengths with a safe bend radius
- All units ship with an accessory pack that includes mounting screws, a cable ID label for marking terminations, cable ties and rectangular cable holders for managing cable terminations
- 1U, 2U, and 4U versions can accept 3, 6 or 12 pre-terminated MTP modules or adapter panels
- Front and rear access doors for easy access
- Universal rack mounting ears supporting both 19" and 23" racks and cabinets
- Rack mount ears can be adjusted to 3-different depths front to rear
- Each enclosure is shipped with an accessory pack that includes mounting screws, cable ties for cable management and a cable ID label for the installed cables
- Each side has large grommet openings for safe horizontal cable routing
- Top panels are equipped with addition rear knockouts for horizontal cabling entrances
- Rectangular cable holders are also provided for dressing the patch cables in the front of the unit behind the smoked plastic front door
- Lifetime warranty

Wall Mount Fiber Optic Enclosures

39106

Featuring a lifetime guaranteed, 100% steel construction, our wall mount enclosures are designed to secure MTP breakout modules or adapter panels in the horizontal or zone distribution areas. With your choice of sizes including 2, 4 and 12 modules, these heavy-duty enclosures feature a low profile that requires little wall space, as well as a large routing space for accessible patch cabling entrance.

- Ideal for small to large horizontal or zone distribution points with a low profile design to reduce the amount of wall space needed
- Provides a central access point for the fiber optic infrastructure in the data center with safe cable entrances and exits to protect the cable jackets from nicks, cuts and scrapes
- When used with our Quad LC Modules or adapter plates up to 288 connection points can be achieved in a single enclosure
- Offers the option of 2, 4 or 12 module or adapter panel configuration
- Custom or pre-loaded configurations also available
- Large top-and-bottom grommeted holes provide easy entrance for the horizontal trunk cables
- A latching front door, stamped with knockouts for optional locks, provides convenient access to the enclosed modules
- Spool rings for securing and storing excess cable lengths with a safe bend radius
- Heavy duty steel construction
- Top and bottom grommeted holes provide easy entrance for the horizontal trunk cables
- Easy access front latching door with knockouts provided for optional locks
- Low profile requires little wall space
- Large routing space for patch cables
- Lifetime warranty

ENTERPRISE SOLUTIONS

MTP Fiber Distribution Breakout Modules

39126

MTP Breakout Modules from Cables To Go provide the mechanical distribution of the 12-strand MTP connector. Housed in a rugged steel enclosure that's guaranteed for life, these durable modules arrive fully loaded with the pre-terminated and tested MTP breakout harness - which not only reduces installation time but also ensures the most robust factory-quality performance and consistency. For additional convenience, our modules snap in either rack or wall mount enclosures and feature scalable designs that can grow with your network system.

- Available in 16 off-the-shelf configurations - supporting conventional terminations such as LC, SC and ST and allowing standard patch cables to easily attach the network hardware to the fiber optic infrastructure
- Custom modules supporting other fiber types can also be turned around quickly
- Offers a small footprint: 1.125in H x 5.125in W x 4.5in D
- Adapter panels available with a wide variety of configurations
- Shipped with a helpful test report highlighting optical characteristics - ideal for calculating your optical budget

Adapter Panels

31114

The Q-Series Fiber Distribution System was designed with legacy installations in mind. We offer a comprehensive line of adapter panels that easily installs in any of our enclosures or rack mount panels. Each adapter is loaded with mating sleeves. Simply select your connector type and plug-and-play.

- Available in 27 off-the-shelf configurations - supporting conventional terminations such as LC, SC and ST and allowing standard patch cables to easily attach the network hardware to the fiber optic infrastructure
- Custom panels supporting other fiber types can also be turned around quickly
- Offers a small footprint: 1.125in H x 5.125in W

4X-4X Infiniband™ & CX4 Latching Cables

33063

Infiniband 10-Gigabit Copper

Infiniband is a high-performance serial I/O computing architecture that enables increased communication speeds while lowering latency. Infiniband cables from Cables To Go provide a low cost copper alternative to fiber optics for connecting servers, RAID arrays and other network components. Entrust the performance and integrity of your high-speed applications to Cables To Go Infiniband™ cable.

- High-speed 10Gb/s Copper Interconnect
- Low latency - Less Than 6 microseconds
- Lifetime warranty against defects of materials and workmanship

BNC ThinNet Ethernet Cables

Built for tough environments

These BNC ThinNet Cables from Cables To Go are the ideal cable for your ThinNet ethernet network. It meets or exceeds standards for shielding and features a rugged design. This heavy-duty cable will stand the test of time in the toughest environments. BNC Cables are the solution in environments where there is considerable interference, or where running new twisted pair wire is not feasible.

- Cable Type: 50-Ohm RG 58/U
- Requires BNC T-Connector for proper connection
- Ideal for thin Ethernet networks
- Connector: BNC Male to BNC Male
- RG Type: 58/U
- Impedance: 50-Ohm

Cisco® Compatible Cables

Provides superior router connectivity

With Cisco Compatible Cables from Cables To Go, you get the fit and functionality of the manufacturer's cable with greater convenience and a lower price. The Cisco equivalent cables are guaranteed to comply with Cisco's rigid standards for original manufactured cabling specifications.

- Same fit and functionality as originals
- In-stock and ready to ship
- Lifetime warranty

Shielded Cat6a & Cat6a Snagless Patch Cables

The next generation of networking

Cat6a Patch Cables from Cables To Go enable 10-Gigabit data transmission over a 4-conductor twisted pair copper cable, allowing connection distances of up to 100m. Current Cat6 cabling systems may only support 10-Gigabit Ethernet over limited distances. The Cat6a draft extends the Cat6 electrical specifications from 250MHz to 500MHz. It also proposes a new measurement for Power-Sum Alien crosstalk to 500MHz. Alien Crosstalk is a coupled signal in a disturbed pair arising from a signal in a neighboring cable.

- Supports IEEE 802.3af® and is DTE power compliant
- Compatible with T568A and T568B wiring
- Provides NEXT performance beyond 600MHz
- Low-profile hood is ideal for high density switch applications
- A snagless hood design
- PoE rated to four times the standard

Cat6 Molded Snagless Patch Cables

27140

High bandwidth for critical applications - choose from nine colors up to 150ft long

- Connector: 50-micron gold-plated RJ45 Male to Male
- Conductor: 24AWG stranded copper
- Molded, snag-free boot prevents unwanted cable snags
- Designed for network adapters, hubs, switches, routers, DSL/cable modems, patch panels and twisted pair applications
- Standard: Cat6 TIA/EIA-568-B-2.1

Cat6 Snagless Patch Crossover Cables

27821

Get maximum speed when connecting peer-to-peer

Connect your computers peer-to-peer and get 550MHz of bandwidth with Cat6 Snagless Patch Crossover Cables from Cables To Go. By reversing the transmit and receive pairs on one end of the cable, you can connect computers directly to each other without needing a hub. They also are ideal for adding hubs without a crossover port!

- Ultra-flexible jacket makes installation easy
- Snagless, molded strain relief provides increased flexibility and durability

Cat6 Shielded Patch Cables

550MHz bandwidth in an all new snagless design

Stay ahead of the game with Shielded Cat6 550MHz Snagless Patch Cables from Cables To Go. These high-speed cables are designed to deliver stable performance to 550MHz for distribution of data, voice and video. These cables will dramatically reduce both impedance and structural return loss (SRL) as compared to standard 100MHz cables.

- PVC jacket
- Designed For: Network adapters, hubs, switches, routers, DSL/cable modems, patch panels and other twisted-pair applications
- Meets or exceeds all Category 6 TIA/EIA- 568-B-2.1, draft 9 standards
- Applications:
 - Gigabit 1000 BASE-T; 100 BASE-T; 10 BASE-T (IEEE 802.3)
 - 4/16 Mbps Token Ring (IEEE 802.5)
 - 100 VG-AnyLAN
 - 100 Mbps TP-PMD (ANSI X3T9.5)
 - 55/155 Mbps ATM
 - T1 voice

Cat5e Assembled Patch Cables

Cost effective network patching solution

These cables will handle bandwidth intensive applications up to 350MHz and will drastically reduce both impedance and structural return loss (SRL) as compared to standard 100MHz cable. The 350MHz Patch Cables from Cables To Go are available in a variety of colors to easily color-code your network installation.

Note: Custom lengths are available, contact your sales representative for details.

Common Fiber Connectors

Wiring Schematics - 568A vs. 568B

EIA/TIA 568A and 568B specify the Pin designation for Cat5 cabling. While the original specification was known as 568A, it later became known as a wiring scheme along with 568B. The only difference between the two configurations is the placement of the second (white/orange, orange) and third pairs (white/green, green).

Either wiring scheme may be used during installation. Although 568B is more common, there is no difference in performance. What is critical, is that the same wiring scheme is used throughout the network. If 568B is used at the wall plate, then it must also be used at the patch panel. Failure to do so will cause the network switch to not communicate properly. Although there are four pairs, only two (white/orange, orange; white/green, green) are used to transmit and receive.

Crossover Cables - 568A to 568B

A crossover cable is simply a Cat5, Cat5e or Cat6 network cable that is pinned 568A on one end and 568B on the other. While the unused pins 4, 5, 7 and 8 are pinned identical, pins 1, 2, 3 and 6 are crossed over to 3, 6, 1 and 2, respectively. Crossover cables are used where two devices have the same interface, particularly computer-to-computer. A crossover cable or port is often used when patching a hub or a switch into a wall plate.

568A

Pair	Wire	Pin
1	White/Blue	5
	Blue	4
2	White/Orange	3
	Orange	6
3	White/Green 1	2
	Green	
4	White/Brown 7	8
	Brown	

568B

Pair	Wire	Pin
1	White/Blue	5
	Blue	4
2	White/Orange	1
	Orange	2
3	White/Green	3
	Green	6
4	White/Brown 7	7
	Brown	8

Cat5E 350 MHz Solid Patch Cable

Solid twisted pair cable for high performance networking applications

For voice/data/video distribution, it will handle bandwidth-intensive applications up to 350 MHz. Meets all Cat5E TIA/EIA standards, and drastically reduces both impedance and structural return loss (SRL) when compared to standard 100 MHz wire. Each of the individual pairs is bonded together to help maintain the twist-spacing throughout the line right up to the termination point. Constructed from high-quality cable and a shortened body plug, this design minimizes Near-End Crosstalk (NEXT) levels. Connector 1: RJ45 Male

- Conductor: 4-pair (UTP) 24 AWG solid copper
- Connector: 50 micron gold-plated RJ45
- Jacket: PVC, high density polyethylene insulation
- CSA listed
- Warranty: Lifetime

Cat5e Assembled Crossover Patch Cables

Cost-effective peer-to-peer networking solution

Cat5e Assembled Crossover Patch Cables from Cables To Go will handle bandwidth intensive applications beyond 350MHz. Each meets all Cat5e TIA/EIA standards, and drastically reduce both impedance and structural return loss (SRL) as compared to standard 100MHz wire! Constructed with high-quality cable and a shortened body plug, this design will keep Near-End Crosstalk (NEXT) levels to a minimum. 350MHz.

- Connector: 50-micron gold plated RJ45 Male to Male
- Conductor: 4-pair 24AWG Stranded Copper
- Jacket: PVC
- Applications: 1000 BASE-T; 100 BASE-T; 10 BASE-T (IEEE 802.3(R))
- Designed For: Two like devices
- Exceeds Category 5e specifications
- Wired: TSB 568B (AT&T 258A)
- Certification: TIA/EI

Cat5e Molded Shielded Patch Cables

Fully shielded network cables for noisy environments

To protect your high-speed network from noise and electromagnetic interference, use Shielded Enhanced Cat5e Molded Patch Cables from Cables To Go. Each cable meets all Cat5e TIA/EIA standards. The molded boot provides extra strain-relief and durability.

- Connector: Shielded 50-micron gold plated RJ45 Male to Male
- Conductor: 4-pair 24 AWG Stranded STP
- Jacket: PVC
- Molded boot provides extra strain-relief and durability
- Foil shielding with drain wire
- Applications: 1000 BASE-T; 100 BASE-T; 10 BASE-T (IEEE 802.3(r))
- Designed For: Network Adapters, Hubs, Switches, Routers, DSL/Cable Modems, Patch Panels and other twisted-pair applications in high-noise environments
- Wired: TSB 568B (AT&T 258A)

Cat5e 350MHz Solid PVC CMR Cables

Cost effective solutions for 10/100 networks

350MHz Cables from Cables To Go are ideal for standard 10/100 Ethernet applications. These cables are available in various colors for easy identification and color coding. UL-listed and meets or exceeds Cat5e 100MHz standards, Bulk Cabling from Cables To Go is ideal for a variety of applications!

- 4-pair unshielded twisted pair cable
- 24AWG solid bare copper conductor
- Meets or exceeds Cat5e specifications
- Rated to 350MHz to provide additional performance and bandwidth over and above the basic requirements of Cat5e 100MHz standards
- High-density polyethylene insulation, PVC jacket
- Foot-marked cable packaged in EZ pull box
- Ideal for 10Base-T (IEEE 802.3[®]), 100Base-TX (IEEE 802.3u[®]), 1000Base-TX, 100 Vg-AnyLAN (IEEE 802.12[®]), Token Ring (IEEE 802.5[®]), TPPMD (ANSI X3T9.5), 350Mbps CDDI, ATM 1.55, Voice and Multimedia
- CM/CMR-rated for use in walls and conduit in ceiling
- Verified compliant with EIA/TIA standards by UL and ETL
- UL/CSA listed

Note: See the rest of our Bulk Cables on starting on page 185.

Modular In-line Couplers

20201

Designed to connect two patch cables together

If you are trying to link several line cords together, or extending existing modular cable runs, In-line Cat5e Couplers from Cables To Go can help you make the right connection. The in-line coupler provides a Female-to-Female feed-through connection for easy cable hook-up. Capable of handling LAN speeds of up to 100Mbps, meets TIA/EIA 568A and Power Sum Certified, the Cat5e coupler will meet all of your performance requirements.

- Connectors: 1 RJ45 Female to 1 RJ45 Female
- Type: Straight-Thru RJ45 Cat5e
- Designed For: Data applications
- Use: Extends the length of 2 Cat5e patch cables

Modular Telephone Cables

02970

Single-line telephone cable

Quickly and easily connect your telephone, fax machine or modem with Modular Telephone Cables from Cables To Go. These cables are constructed from heavy-duty silver satin wiring. Gold-plated connectors provide clear communication.

- Connectors: RJ11 (6P4C) Male-to-RJ11 (6P4C) Male
- Two-wire construction for handling single phone line
- Constructed from quality 26AWG stranded wire
- Heavy-duty PVC jacket protects cable

24-Port 10/100 Ethernet Switch - Rack Mount

30707

The 24-Port 10/100Mbps Ethernet Switch from Cables To Go is perfect for workgroup or department users. The rack mountable metal case design combined with a safety certified internal power supply make this switch a robust solution. This 24-port switch is very cost effective for environments with less than 24 users. The plug-and-play and auto-negotiation capabilities allow the switch to quickly auto-detect link partners. An uplink (cascade) port is provided to link to another switch, giving you the capability for further expansion. Easy to read LED indicators make cable installation and normal operation diagnostics trouble-free. The Switch can be used on desktop or rack mount so you can best utilize your space.

- Complies with IEEE 802.3/802.3u® Ethernet standards
- (24) 10/100Mbps RJ45 ports
- Full and half duplex support
- IEEE 802.3x® flow control support
- Built-in 2K MAC address
- Built-in 4Mbps memory buffer
- Automatic source address learning
- Plug-and-play
- Easy read LED indicators for installation and operation diagnostics
- Certifications: FCC, CE

Item#	Description	MSRP
30707	24-Port 10/100 Ethernet Switch – Rack Mount	\$129.99

16-Port 10/100 Ethernet Switch - Rack Mount

30703

Ideal for SOHO or workgroup users

The 10/100Mbps Ethernet Switch from Cables To Go is designed for SOHO (Small Office/Home Office) or workgroup users. The rack mount metal case design combined with a safety certified internal power supply make this switch a robust product that is very cost effective. This switch for environments with less than (16) users, can be used on desktop or be rack mounted.

- Complies with IEEE 802.3/802.3u® Ethernet standards
- 10/100Mbps RJ45 ports
- IEEE 802.3x® flow control support
- Built-in 8K MAC address
- Built-in 4Mbps memory buffer
- Internal Power Supply: 110/220V
- Automatic source address learning
- Easy to read LED indicators for installation and operation diagnostics
- Complies with IEEE 802.3/802.3u Ethernet standards
- 16 10/100Mbps RJ45 ports
- Full and half duplex support
- Automatic source address learning
- Plug-and-Play
- Fits an 11 in rack
- Easy-to-read LED indicators for installation and operation diagnostics

30703	16-Port Switch (11 in)	\$84.99

8-Port 10/100 Ethernet Switch

30702

An easy, affordable way to share network resources

From NICs to switches, network connectivity solutions enhance the performance, flexibility and reliability of your network. Expanding your network is easy, plug-and-play features allow for fast, hassle-free installation so you'll never miss a beat! The 8-Port 10/100 Ethernet Switch from Cables To Go is the perfect way to expand your existing network. By adding eight 10/100 network ports, you'll have plenty of connectivity to get the job done. This switch gets your network moving with over 200Mbps transfer rates when operating in full duplex mode. Share resources such as network printers, file servers and Internet access while eliminating the headache of network bottlenecks. The 8-Port Switch is compact enough to be placed on a desktop or it can be rack mounted to allow for more work space. Maximize your network potential and minimize configuration headaches with this switch.

- 8 10/100Mbps RJ45 Auto-MDIX ports
- Complies with IEEE 802.3/802.3u® Ethernet standards
- Full and half-duplex mode operation
- Built-in storage of more than 1K MAC address
- Automated source address learning
- IEEE 802.3x® flow control for full-duplex operation
- Back pressure flow control support for half-duplex operation
- Ventilation holes prevent the switch from overheating
- LED indicators for powerlink speed and collision
- Compact design yet can be rack mounted

ENTERPRISE SOLUTIONS

Broadband Internet Router With Firewall

30714

The ideal all-in-one solution for your networking needs

The Cable/DSL Router With Firewall from Cables To Go features a 4-Port 10/100 switch that allows you to share internet resources between multiple computers. The setup is easy and the user-friendly, web-based management ensures everything works smoothly out of the box. Firewall is built in the router to protect your network by monitoring unauthorized data request in and out of your network. NAT protects the computers behind the firewall so they are not exposed to internet attacks.

- Broadband access server support
- SOHO firewall keeps hackers out
- Internet access control
- Virtual server function
- Supports PPPoE and DMZ hosts
- DHCP server/client
- Web-based user interface management
- Default button for fast system setting recovery
- Supports IPSec pass through, access monitor and dynamic DNS
- Support Windows® 95/98/ME/NT/2000/XP, Unix, Linux, and Mac®

Premise Plus Rack Mount Surge Suppressor

27369

10 outlet, 1072 joules; 8 metal oxide varistors; 19in rack mountable

The Premise Plus Power Guard Rack mount from Cables To Go provides solid surge protection to your network devices. With more than 1,000 Joules of surge protection and a clamping voltage of 330V (UL 1449), you can rest assured that your valuable network devices are safe from dangerous power surges and spikes.

- Over 1,000 Joules of surge protection from (8) superior metal oxide varistors (MOVs)
- 330V clamping voltage
- RJ11 and RJ45 jacks for surge protection and EMI/RFI filtration
- Push-button circuit breaker reset
- 2 always hot receptacles
- Specially designed brackets for power cable management and support

10/100Mbps PCI Ethernet Adapter With Wake-On Lan

30705

An easy and affordable way to network your PC

Expanding your network has never been so easy. LED indicators for installation verification and diagnostic purposes make installing this PCI card hassle free.

- Meets PCI local bus specification, Rev 2.0 or later
- PCI 32-bit bus master architecture
- IEEE 802.3/802.3u® auto-negotiation for automatic selection of 10Mbps or 100Mbps data transmission speed
- Easy migration; single RJ45 port for both 10Base-T and 100Base-TX
- Support Full Duplex operation on both 10Base-T and 100Base-TX
- STP/UTP cable using Cat3, 4 or 5 for 10Mbps and Cat5 for 100Mbps connections
- Optional remote boot ROM available
- Meets FCC and CE safety standards
- Comprehensive drivers support of all popular network operating systems

30705	10/100Mbps PCI Ethernet Adapter With Wake-On Lan	\$12.99

54Mbps Wireless PCI Card

30709

Go wireless with this easy to install PCI card

The IEEE 802.11g® PCI Card from Cables To Go is a wireless PCI Card that offers 54Mbps data rate with 2.4GHz frequency from the latest IEEE 802.11g® Wireless Standard. This 802.11g PCI card operates in the 2.4GHz frequency band similar to 802.11b, but provides a throughput up to 54Mbps by using a different radio technology in order to boost overall bandwidth. The card offers peer-to-peer connection via desktop Ethernet LAN/WAN connection. It is backwards compatible with devices on 802.11b standard, and can easily connect to routers or access points on the 802.11b or 802.11g standard.

- Meets both IEEE 802.11g and IEEE 802.11b standards
- Data transfer rates: IEEE 802.11g: 6, 9, 12, 18, 24, 36, 48, & 54 Mbps; IEEE 802.11b: 1, 2, 5.5, 11 Mbps
- PCI Interface 2.2
- Encryption 64/128 bit WEP, WPA/WPA2
- Driver Support: Windows® 2000/XP/Vista
- FCC, CE Certifications
- Operation Range: 100 meters indoor and 300 meters outdoor (distance varies with data rate at different usage environments)

30709	54Mbps Wireless PCI Card.....	\$53.99

2-Port RJ45 Splitter/Combiner

37133

Permits connection of 2-network devices over a single cable drop

The 2-Port RJ45 Splitter/Combiner from Cables To Go is handy when you need another network connection but don't have the time or the money to add another cable drop. Simply plug one device to your work area network port and another unit to the corresponding patch panel port. Now you can run two network devices over the same network cable. Sold individually, this item must be used in pairs for each installation, one on each end of the cable.

- Plug-and-play operation
- Passive solution
- Supports network speeds of up to 100Mbps
- Non-intrusive to the network
- Lifetime warranty

54Mbps Wireless Laptop PC Card

30708

Go wireless with this easy to use PC card

The 802.11g PC Card is a wireless PC Card that offers 54Mbps data rate with 2.4GHz frequency from the latest IEEE 802.11g® Wireless Standard. The 802.11g standard operates in the 2.4GHz frequency band similar to 802.11b, provides a throughput up to 54Mbps by using a different radio technology in order to boost overall bandwidth. The PC card offers peer-to-peer connection via notebook Ethernet LAN/WAN connection. Easy to setup, and offers security protection with industry standard WEP (Wired-Equivalency Privacy) 64bit or 128bit encryption and WPA/WPA2.

- Data Transfer Rates: IEEE 802.11g®: 6, 9, 12, 18, 24, 36, 48, and 54Mbps or IEEE 802.11b®: 1, 2, 5.5, 6, 9, 11Mbps
- PCMCIA Type II, 32-bit interface is ideal for use with your notebook
- Driver Support: Windows® 2000/XP/Vista
- Network Protocols: TCP/IP, IPX, NDIS3, NDIS4 and NetBEUI
- LED Indicator shows RF/Link activity
- Operation Range: Indoor 100m and Outdoor 300m (Distance varies with data rate at different usage environments)

Wi-Fi Wireless Networking Antenna Cables

03481

Your wired solution for your wireless problems

Increase your Wi-Fi wireless network range by connecting a high gain antenna with Wi-Fi Wireless Networking Antenna Cables from Cables To Go. Many buildings are not conducive for RF propagation due to concrete walls and elevator shafts. Cables To Go offers a wired solution to relocate your Wi-Fi antenna to a location that is not affected by these obstacles. Just select the adapter cable that is appropriate for your system and a cable that meets your distance requirements. Wi-Fi Antenna Cables from Cables To Go are your wired solution to your wireless problems.

- Adapter cable combinations compatible with Wi-Fi wireless networking equipment
- Extended lengths

10/100 USB Print Server

28803

Single-port 10/100 fast ethernet USB print server

The 10/100 USB Print Server from Cables To Go is a powerful and convenient way to connect your USB printer to a network without a dedicated PC print server. By supporting multiple servers and protocols, it allows you to print from any computer to any USB printer on the network. This eliminates the need to place your printer right next to your workstation or fileserver. With the Print Server IPP (Internet Printing Protocol) technology, printing through the Internet is much easier. You can send a print job to a printer in another country just as easily as to a printer in your own office - even easier than faxing! Why send a degraded fax image when you can print an original at the destination? The 10/100 USB Print Server supports popular network protocols such as Microsoft® NetBEUI and Novell® IPX/SPS.

- Note: The USB printers below do not support a remote connection and will not work with this print server:
 - All multi-function devices
 - Check with your printer manufacturer to confirm if your model is networkable

Note: Once this item is opened it is non-returnable unless defective.

Pricom USB Device Server

28285

Network your Multi-Function Printer and utilize all its functions

The Pricom USB Device Server provides full networking capability for printing, scanning and memory card sharing of the Multi-Function Printer (MFP) or All-In-One (AIO) Printer products. You can control the scanning function on the network by using the MFP scanner utility, or share your data through the memory card on the MFP slot, then print it through the same MFP. Not only can you network your MFP, the USB Device Server is designed to provide easy network accessibility for all your USB products. With Silex's bundled USB network driver and utility, the USB Device Server intuitively converts single user printers, multi-function printers, scanners, or storage devices with a USB interface to shared resources on the network. Your device's application will run smoothly on the network as if the device was connected directly to the PC. The USB 2.0 Device Server has four physical USB 2.0 high-speed ports (up to 480Mbps) and a 10/100bps Ethernet port that allows connected USB 2.0/1.1 devices accessible over a wired LAN. The USB 1.1 Device Server has one physical USB 1.1 port affording value priced Multi-Function Printer sharing.

- Supports USB 1.1 at 14 Mbps
- Network sharing for Multi-Function or All-In-One Printer capabilities (print, scan, fax, memory card)
- Instantly convert USB devices to a shared network resource
- Ideal for use with USB hard drives, CD/DVD/Zip drives, scanners, printers and digital cameras

Pricom Internal HP-Compatible EIO Print Server

32586

Dual printer support at one affordable price

The Pricom Internal HP-Compatible EIO Print Server from Cables To Go uniquely supports two printers from a single EIO slot in any of HP® compatible line of LaserJet and InkJet printers. It's easy to add the EIO print server to a printer and connect an additional USB printer through the EIO board. This is the most cost effective and productive network printing solution in today's mixed SOHO and corporate/enterprise environments.

- High-speed and reliable 10Base-T/100Base-TX Ethernet networking, full-featured TCP/IP, NetWare, AppleTalk and recent Windows® protocols support in every common client operating system
- IP filtering capability limits access to a printer by specifying authorized IP addresses or a range of authorized IP addresses via web browser - this allows the network administrator to control unauthorized access to a printer
- Supported protocols: TCP/IP: LPD, IPP Rev. 1, Raw socket #9100(for EIO port only), FTP, HTTP, TELNET, SNMP, DDNS, DHCP, BOOTP, RARP, TCP, UDP, ARP, IP, ICMP; NetWare®: IPX, SPX, NDS, Bindery, R/NPRINTING; AppleTalk: PAP, ATP, ZIP, RTMP, NBP, DDP, AARP, AEP, ELAP; Windows®: NetBEUI, NetBIOS over TCP, WINS
- Compatible with the following HP® printers: LaserJet 9000, LaserJet 8150, LaserJet 5100, LaserJet 5000, LaserJet 4300, LaserJet 4200, LaserJet 4100, LaserJet 4000, color LaserJet 8550, color LaserJet 5500, color LaserJet 4600, color LaserJet 4550, color LaserJet 2500, business InkJet 2200

Note: Only a USB printer with its own power supply can be connected to the USB port. Otherwise, the connected printer/device may be damaged.

Once this item is opened it is non-returnable unless defective.

Pricom External Canon® USB Print Server

Connect up to four USB printers with this easy to use print server

The PRICOM External USB Print Server from Cables To Go is the ideal way to add one or more printers to your network. This 10/100BASE-TX USB print server was developed exclusively for Canon Bubble Jet® printers to enable network sharing. With the USB Master device function, you can maximize your investment by connecting up to four USB printers.

- Full DHCP support allows the IP address to be set using DHCP
- Network Interface: 10BASE-T, 100BASE-TX (auto-detection)
- Supported Protocol: TCP/IP: LPD, IPP, Raw Socket #9100, FTP, HTTP, TELNET, SNMP, DHCP, BOOTP, RARP; IPX Peer to Peer: Silex technology original protocol
- Supported Network OS: Windows® XP, 2000, Windows NT 4.0, Windows 95/98/ME
- Printer driver is not included in this product - please reference your printer documentation for printer driver details
- Compatible with the following Canon printers:
 - BP CAPT Printer: LBP-3600, LBP-3700, LBP-3200, LBP-2810, LBP-2710, LBP-2410, LBP-2360, LBP-2300, LBP-2050, LBP-1910, LBP-1810, LBP-1710, LBP-1610, LBP-1510, LBP-1310, LBP-1210, LBP-1120, LBP-1110SE, LBP-1110, LBP-810, LBP-350
 - Bubble Jet: i900, i6500, i6100, i990, i950, i900D/i905d, i865R, i860/i865, i850, i550, i475D, i470D, i455, i450, i320, i70, i50, S9000, S6300, S4500, S900, S830D, S820D, S820, S800D, S800, S750, S630, S600, S530D, S520, S500, S450, S400, S330, S300, S200, S100, BJC-8200, BJC-6500, BJC-6200, BJC-6100, BJC-3000, BJC-2100, BJC-85, BJC-55

Minicom Phantom KVM Switch Solutions

The first ever micro-sized Cat5 KVM switch for server management

The Minicom Phantom Specter is the ideal solution for high density server and rack environments. The micro-sized specter provides more power than a conventional switch by freeing up rack space, eliminating cable clutter and maximizing your flexibility. The Minicom Phantom KVM solution is comprised of two components: the Universal Phantom Manager (UPM control unit) and the Specter Remote Interface Connection Cable (RICCs), which serve as the remote unit(s). RICCs are attached to each server's keyboard, monitor and mouse ports. The UPM is connected to the first RICC in the series, and each RICC is daisy-chained to the next RICC so that there is only one Cat5 cable between the UPM and first RICC, and one Cat5 cable between each RICC. The Specter RICCs easily attach to the side of the server, rack or cabinet for ease of installation. The system is completely hardware-based and configuration can be performed through the BIOS-based On-Screen display (OSD) interface. You can manage your Phantom system, via a serial port, using the Phantom's Control Software or any other third party software. If two-user accessibility is needed, choose the MXII and the Specter II remotes. This solution provides two users the same flexible access without all the wires.

- Includes: 1 (UPM) unit per system and 1 Specter RICC, up to 63 per line
- Single user control up to 63 servers on a single line
- Advanced OSD management and multi-layered security
- Scalable - buy only what you need and add as you grow
- Flexible server/KVM console placement up to 110m/360ft away
- No external power supply at Specter units
- 3 year warranty

Minicom Smart Cat5 KVM Switches

Powerful multiple server control via a simple Cat5 patch cable

Minicom's 8-Port And 16-Port Smart Cat5 Switches are the next-generation line of single-user, rack mountable KVM switches. The sleek, 1U sized Smart Cat5 line uses standard Cat5 cabling to create the connection between the KVM and the Remote Interface Connection Cable (RICC). This eliminates cable clutter and supports cabling runs up to 33ft. The Smart Cat5 Switches can be easily cascaded to provide the user control of several hundred computers, while providing control via one keyboard, monitor and mouse. For added power and control, we offer the Minicom Smart 16IP KVM Switch. It enables the user to connect the servers to the KVM via the user's network. The 128-bit SSL technology ensures security is maintained, while the browser-based TCP/IP interface prevents the need for the user to install software on any of the connected servers. Complete server control can be performed from anywhere on the LAN or WAN. (Multi-platform PS/2, Sun® and USB support)

- New RIC (Remote Interface Connection) cable technology
- Extend the distance between computer and switch up to 10m/33ft
- Innovative Cat5 technology eliminate cable clutter at the rack
- Multi-layer security protects your corporate data; 3 year warranty
- Better server management with your choice of On Screen Display, serial port or push button control
- Supports the following operating systems: Dos, Windows® 3X,9X,2000, NT4, ME, XP, Linux, Unix®, QNX, SGI, FreeBSD, BeOS, Open VMS, Novel® 3.12-6

ENTERPRISE SOLUTIONS

Minicom Smart Cat5 Switch 216 & 232 IP

50141

Simultaneous remote and local access to servers

The Minicom Smart Cat5 Switch 216 and 232 IP gives one local and two remote system administrators secure, BIOS level access and control of up to 16 servers. In addition, two remote users can operate serial sessions for controlling serial devices such as routers, managed network switches or PDU. This device utilizes the highly secure 128-bit SSL protocol to guard your corporate data through every kind of remote access device. This technology efficiently prevents unauthorized access and security breaches.

The Smart Switch overcomes many of the challenges facing distributed server rooms and data centers. This rack mountable, 1U sized switch features Minicom KVM over Cat5 technology that directly connects the switch to each server in the room, providing up to 30m/100ft of distance between server and switch. The Smart 216 and 232 IP enables 2 remote users seamless access to target servers via a single IP address.

- 2 Remote users; 1 local user
- 3 simultaneous KVM users
- USB keyboard and mouse console
- High level industry standard 128 Bit SSL encryption
- Seamless centralized management with KVM.NET
- Multi-platform - PS/2, and USB support
- Integrated power control
- Remotely supports control of 2 serial devices
- Rack Mount brackets included

Minicom Cat5 Smart KVM Extender

27456

Extend the distance from your workspace to your servers while maintaining total control

The Minicom Cat5 Smart KVM Extender enables controlling a computer up to 110m/360ft away by extending the KVM console. Using Cat5 cable technology makes it easy to install and eliminates troublesome cable clutter. More than just an extender, the Cat5 Smart KVM Extender is actually a multifunctional system that can perform multiple tasks all in one unit: KVM extension, dual-user access, 2 x 2 control and KVM switch extension.

The dual user option enables two users to access the same computer making work more efficient. This makes it an ideal solution for storage, industrial applications and SOHO environments.

- Double the power of your computer by allowing 2-user access
- 2-Port KVM switch functionality
- Uses inexpensive Cat5 cabling that is easy to install
- Supports high resolution video 1600 x 1200 @ 75Hz
- Pure hardware solution - software/network independent
- 3 year warranty

Minicom Mini KVM Extenders

38512

Fast, easy extension from your servers to your KVM switch

The Minicom Mini KVM Extender is a high value, solution for extending your KVM console from your computer or KVM switch up to 70m/230ft away over Cat5/6 cables up to a resolution of 1600 x 1200 @75Hz. Ideal for industrial applications such as manufacturing lines or clean rooms, the Mini KVM Extender provides maximum safety and security while allowing you to place computers and servers in a single centralized location, far away from any production hazards. IT managers seeking extended access to server rooms in a tightly secured environment will find the Mini KVM Extender particularly efficient and user-friendly. The Mini KVM Extender consists of two micro sized, compact units on both ends: the transmitter unit that connects to the computer and the receiver unit that connects to the KVM hardware. The Mini KVM Extender is a pure hardware solution making it both software and network independent. The Mini KVM Extender connects PS/2 KVM consoles to any platform - Sun®, USB and PS/2.

- 3 year warranty
- External power needed only on receiver end; transmitter draws power directly from KB port

Minicom Cat5 Video Display System

Distribute UXGA video signals and audio up to 330ft over shielded Cat5 cable

The Minicom Cat5 Video Display System (VDS) broadcasts high resolution video (and optional audio) over Cat5 cable to multiple display stations in real time. The VDS is also a powerful presentation tool in computer classrooms and training environments and a great alternative to expensive projectors. In the classroom, the VDS can perform two important training functions with a simple 2-button controller: send a teacher's screen to all remote monitors or darken all remote monitors to gain the undivided attention of the students. The system uses inexpensive Cat5 cable and enables you to place the remote display stations up to 110m/360ft away from the source. Since the Cat5 VDS is a pure hardware solution, it provides real time screen transfer without loss of screen quality.

The VDS consists of the following components:

- Broadcaster 8-port and compact control unit kit
- Micro-sized remote dongle for every remote monitor; dual display remote dongle supports (2) monitors
- Optional 8-Port line splitter for adding more displays to your VDS solution
- Video and optional audio signal distribution to hundreds of remote display devices
- Easily expandable system - buy only what you need and add more as you require
- Supports high resolution video - up to 1600 x 1200 @75 Hz
- Pure hardware solution with no software required
- Cat5 technology makes installation easy and inexpensive
- Low cost of ownership
- 3 year warranty

Note: VDS systems with the audio option require the use of shielded Cat5 (STP) cable.

*Requires the use of shielded Cat5 (STP) cabling

Minicom DS Vision 3000

Robust, high-capacity audio/video distribution system

The DS Vision packs a 3-in-1 punch – audio and video broadcasting and serial management of channels all in one box. Broadcast high definition video at 1080p. And a DDC protocol optimizes player-screen interaction for the best visual experience. Multiply the number of screens carrying the message without adding additional players. Instead of multiple players with their own software, you get the capability to transmit your message from a single player to up to hundreds of screens. And in turn, lower your software and content licensing, eliminate unnecessary hardware and simplify maintenance by servicing a single player instead of dozens. DS Vision 3000 is the only system in the market to include fully bidirectional RS232 communication, to send a command but also query the screen and get a response. Remotely view screen status instead of walking from screen to screen, remotely turn screens on/off, remotely monitor screen operation time to prevent overheating and double/triple screen life, and remotely increase volume, brightness. Connect and extend serial devices such as touch screens. Three year warranty.

- Resolution Up to 1920 x 1200 @ 60Hz; 1080p (depending on cable length)
- Input/Output video signals analog signal red, green, blue 0.7v p-p 75-Ohm
- Sync TTL compatible; horizontal/vertical sync polarity pos/neg

Cat5 RS232 Extender

Control serial devices up to 3,300ft away over Cat5 cable

The Cat5 RS232 Extender from Cables To Go is a hardware-based solution providing remote access and control of any RS232 protocol device. With regular RS232 devices you are limited to an immediate area of control. The Cat5 RS232 Extender extends control to 1000m/3300ft. Now you can place RS232 devices in any location you want and control them remotely. The RS232 Extender also provides full duplex transmission and is compatible with all RS232 protocols. Installing the extender is quick and easy. Thanks to its simple architecture all you do is plug-and-play! The system is composed of two units, one local unit and one remote unit, both contained within a sturdy metal casing. The two units are connected via standard Cat5 cable that eliminates cable clutter. A single power supply is used to power the system and it can be placed at either end depending on where it is most convenient.

- Extends RS232 serial signals up to 1000m/3300ft
- Uses inexpensive Cat5 cable
- Power supply can be attached at either the local or remote unit
- No software required
- 3 year warranty
- Local port: DB9 Female
- Remote port: DB9 Male
- DB9 Pin Out
 - Pin 1, Pin 2 - Receive Data, Pin 3 - Transmit Data, Pin 4 - Data Terminal Ready, Pin 5 - Signal Ground, Pin 6 - Data Set Ready, Pin 7 - Request To Send, Pin 8 - Clear To Send, Pin 9 -

TruLink® VGA Over Cat5 Extender

39960

Extend your VGA signal up to 300m over Cat5e

The TruLink VGA Over Cat5 Extender is ideal when you need to place your computer in a remote location. This is common in digital signage applications that are typical in retail stores, houses of worship, classrooms and board rooms where you need video presentation in one room but want the computer to be out of sight and in a safe and secure environment.

- Extend your analog video signal up to 300m (1000ft)
- Cat5e UTP cable enables easy and cost effective in-wall installation
- Ideal for digital signage applications in retail stores, houses of worship, classrooms and board rooms
- Supports the following resolutions using Cat5e cabling:
 - 50m - 2048 x 1536
 - 100m - 1280 x 1024
 - 180m - 1024 x 768
 - 200m - 800 x 600
 - 300m - 640 x 480
- Input/Output Connectors: HD15 Female; power supply: DC 12V 600mA
- RJ45 connectors join the base unit and the remote
- Remote unit required - sold separately

Item#	Description	MSRP
39959	TruLink VGA Over Cat5 Extender - Base Unit	\$174.99
39960	TruLink 4-Port VGA Over Cat5 Extender - Base Unit.....	\$219.99

39975

TruLink® DVI Over CAT5 Extender

Extend your DVI-D signal up to 50m over Cat5

The TruLink DVI Over CAT5 Extender is a durable solution that allows you to extend your DVI signal up to 50m (164ft) over two Cat5 Unshielded Twisted Pair (UTP) cables. This solution is ideal for applications where your DVI monitor needs to be placed further than the average 20m DVI cable limitation. Driving a DVI signal over Cat5 allows you to take advantage of your UTP cable infrastructure already installed for a cost-effective and reliable installation.

- Extend your digital video signal up to 50m (164ft)
- Cat5 UTP cabling enables easy and cost effective in-wall installation
- Ideal for digital signage applications in retail stores, houses of worship, classrooms and boardrooms
- # Supports the following resolutions using Cat5* cabling:
 - 30m - 1600x1200 @ 60Hz
 - 50m - 1280x1024 @ 60Hz
 - 50m - HDTV resolution up to 1080i"

39975	TruLink DVI Over Cat5 Extender	\$349.99

TruLink® VGA With Audio Over Cat5 Extender

Extend your VGA and audio signals up to 1000ft over Cat5e

The TruLink VGA With Audio Over Cat5 Extender is a robust solution that allows you to extend your VGA and 3.5mm audio signal up to 300m (1000ft) over a Cat5e Unshielded Twisted Pair (UTP) cable. Driving VGA and audio signals over Cat5e allows you to take advantage of your existing UTP cable infrastructure for a cost-effective and reliable installation.

The TruLink VGA With Audio Over Cat5 Extender solution is ideal for applications where you need to place your computer in a remote location. This is common in digital signage applications typical in retail stores, houses of worship, classrooms and boardrooms where you need video presentation in one room but want the computer to be out of sight and in a safe and secure environment. With the TruLink VGA With Audio Over Cat5 Extender, you can place your display across the room, on another floor, or in another building while your computer remains in a convenient location.

- Cat5e UTP cabling enables easy and cost effective in-wall installation
- Note: This solution requires either a 1-Port or 4-Port base unit and a remote unit for each connected monitor. The base unit and remote units are sold separately.

PS/2 Console UTP Extender

Extend KVMs up to 500ft from your CPU

The PS/2 Console UTP Extender from Cables To Go allows access to a computer system from a remote console (keyboard, monitor and mouse) up to 500ft away. It provides the ideal means to access the remote system box, since it improves on previous designs by using inexpensive Cat5 UTP cable, the kind commonly used in Ethernet networks. Setup is easy connect the PC system box and local console to the local module, run the UTP cable to the remote module (up to 500ft away) and plug the remote console into the remote module.

- Connectors:
- Keyboard: 6-Pin mini DIN Female
 - Mouse: 6-Pin mini DIN Female
 - Monitor 15-Pin HD Male/Female
 - Unit to unit: RJ45 8P8C Jack
- System can be up to 500ft from the console
 - Uses inexpensive Cat5 UTP cable
 - Local and remote consoles

8/16-Port VGA KVM Switches With On-Screen Display

Access up to 16 PCs from one keyboard, mouse and monitor

KVM Switches from Cables To Go are ideal for computer users who want to control multiple units with ease, save on redundant equipment and eliminate time wasted from jumping from one machine to the next.

- Supports PS/2 mice
- Stackable configuration expands system capability up to 16 units
- Auto-scan automatically selects computers sequentially
- Supports Microsoft IntelliMouse® (Pro) and other extended function mice
- Hot key functions allow easy computer access
- Keyboard states automatically saved and restored when switching computers
- Operating system independent and transparent to all applications
- Programmable scan filters unused computers
- Store system settings and name entries to non-volatile memory
- Password security locks the computer from unauthorized access
- Keyboard and mouse can be hot plugged at any time
- High VGA resolution 1920 x 1440

Note: Use Male to Male cables for connecting to servers

TruLink® Video Signal Booster

Place your VGA monitor up to 210ft from your source

With the TruLink UXGA Video Signal Booster you can overcome VGA length limitations without compromising signal quality. With built-in amplification and equalization, you can place the monitor up to 210ft away from the video source. No software is required and installation is as simple as connecting your monitor to one end, your VGA cable to the source end, and connecting the included power adapter. Daisy-chain two signal boosters together to extend your VGA signal even further - up to 420ft! From use at a test bench, to data centers and help desks, classrooms and multi-media centers, the TruLink Video Signal Booster delivers both performance and value.

- Placed your monitor up to 210ft from your source
- Daisy-chain (2) TruLink signal boosters to extend your signal up to 420ft
- Supports video resolutions up to 1920 x 1440 @60Hz
- Suitable for VGA, SVGA, XGA, SXGA, UXGA and Multisync monitors
- Input connectors: 1x HD15 Male
- Output connectors: 1x HD15 Female

Plenum Rated HD15 UXGA Cable With 3.5mm Audio

CMP rated cable jacket enables in-wall installation without the use of conduit

Plenum Rated UXGA Cables with 3.5mm Audio from Cables To Go are the ideal, high performance solution for quickly connecting a video display system with speakers where the cable must perform over long distances. These cables are constructed from (3) 75-Ohm coaxial cables plus (3) 26AWG twisted pairs and (2) 26AWG conductors ensuring signal integrity. Coax cables are shielded by a tinned copper braid providing a minimum of 85% coverage, by Mylar® aluminum foil and drain wire to provide 100% coverage. CMP-rated PVC jacket and Teflon® inner insulators provide the fire protection required to run these cables within walls and air plenums without the need for conduit.

- Metal HD15 connector housing
- Lifetime warranty

Plenum Rated UXGA Cables

40248

A necessity when installing video systems in commercial and educational facilities

Plenum rated cables are a necessity for commercial or institutional installations. UXGA is the preferred interface for high quality data and image display, especially when longer runs are a factor. This precision cable assembly features three 75-Ohm video conductors, three 26AWG UTP and two 26AWG conductors. The assembly is 100% shielded using a combination of Mylar® foil and copper braid. CMP-rated PVC jacket and Teflon® insulation meet all plenum code requirements.

Plenum Rated M/M SXGA Monitor/Projector Cables

40510

Low profile HD15 connectors for easier in-wall installation

Audio/video installations in education and commercial settings often require plenum rated cabling. The plenum rated line of monitor/projector cables from Cables To Go was engineered to overcome common challenges faced by installers. Low-profile connectors save valuable space and enable easier in-wall connections. The small-diameter cable design further reduces the space and clearance required to run the necessary cabling through walls and plenum air spaces.

- CMP-Rated cable jacket
- Low Profile HD15 connectors (1 1/4" total depth)
- Small-diameter cable (1/4" diameter)
- (3) 30AWG coax cables with (1) 26AWG pair
- Lifetime warranty

Note: This cable carries RGBHV signals only and requires a one-time setup to ensure proper video resolution.

Pro Series UXGA Monitor Cables With 3.5mm Audio

43095

Listen to great sound while viewing clear, high resolution video

The Pro Series UXGA Monitor Cables With 3.5mm Audio provides a quick and convenient way to connect your PC to a video display system with speakers. The single jacket construction allows you to install a single cable to carry both video and audio signals. These cables are ideal for use with projectors, flat-screen monitors, KVM switches with audio, video splitters and extender. Designed to support resolutions of 1600 x 1200 and above, these cables can support distances up to 100ft without conditioning the signal. This cable is shielded to extend your video and audio signals without distortion or loss.

- Ideal for video presentations, projectors, video distribution, video extension and classroom environments
- Drive signals without ghosting or signal distortion
- 12in long 3.5mm stereo plug lead
- HD15 F/F mini gender changer included

Flexima™ UXGA Cables

The ultimate in flexibility and performance

Flexima UXGA Cables are the ultimate in performance and flexibility. These ultra thin cables are highly flexible making installation in even the tightest areas a breeze. Unlike cheap VGA cables, the Flexima cables will not coil up or snag during installation. The low profile connector will allow you to install in places other connectors won't. Featuring ferrites, double shielded twisted pairs, and triple shielded coax, these monitor cables can go the distance without ghosting and signal distortion. Flexima UXGA extension cables are ideal for video presentations, home theater and HDTV applications, classroom environments, POS, server rooms or simply for organizing your work area for maximum comfort and efficiency.

- Connectors: HD15 Male-to-HD15 Male
- Constructed from premium grade double-shielded twisted pairs and triple shielded coax
- Ferrites protect against EMI/RFI interference
- Accommodates cable runs up to 100ft without a booster (in most cases)
- Ideal for video presentation devices, home theater and HDTV applications, classroom environments, POS, server rooms and more

Sun® Compatible 13W3 Monitor Adapters

Adapters for all of your workstation needs

Now you can adapt your Sun monitor for use on a PC! The 13W3 Monitor Adapters from Cables To Go are fully-molded which reduces EMI/RFI interference.

Note: Not all monitors and frame buffers are compatible.

- Fully-molded design reduces EMI/RFI interference
- Please see our website for monitor compatibility
- Connector: 13W3 Female to HD15 Male
- Lifetime warranty

Premium Shielded SXGA Monitor Cables

35562

UL2919 shielded coax solution for office applications

Gain maximum flexibility when positioning your monitor with Premium Shielded SXGA Cables from Cables To Go. These premium cables are ideal for video presentation devices, video splitters and KVM switches. Constructed from premium grade shielded UL2919 certified video cable which uses a combination of coax and twisted pair to accommodate cable runs up to 100ft away, without any of the typical distortion problems associated with extended length cabling runs. These cables are designed to hold the signal over greater distances without the need for boosting or reconditioning. Premium Monitor Extension Cables are ideal for video presentations, classroom environments, POS, server rooms or just for organizing your work area for maximum comfort and efficiency.

- Connectors: HD15
- Constructed from premium grade shielded video cable which uses a combination of coax and twisted pair
- Ideal for extending or replacing monitor cables
- Lifetime warranty

TruLink® 2-Port DVI-D Splitter

40312

Split 1 DVI-D output for display on 2 DVI-D compatible monitors

The TruLink DVI-D splitter connects two HDTV displays or two computer monitors equipped with DVI inputs. HDCP compatibility means this splitter will work with high definition video for HDTV applications and high resolution PC applications. Compatible with DVHD equipped PC video cards operating at a maximum resolution of 1920 x 1080 pixels, or with video devices at 480p, 480i, 720p, 1080i, and 1080p scan rates. Built-in DVI repeater allows lossless runs up to 10 meters from the splitter.

- Supports resolutions up to 1920x1080 (1080p)
- Supports EDID and HDCP
- Rugged metal enclosure to prevent damage
- Cascadable up to 4 levels
- Extends DVI-D signals up to 10 meters

IEEE 488® HPIB/GPIB Bus Cables

02785

Double-shielded cable for connecting computers and instruments

Designed for optimum efficiency and durability, the HPIB/GPIB Cables from Cables To Go ensure flawless data transmission and are manufactured according to IEEE 488 specification. They feature Male and Female piggy-backed 24-Pin Centronics style connectors to allow daisy-chaining to another instrument or printing device. Each cable is double shielded and fully molded to reduce EMI/RFI interference and achieve maximum signal integrity.

- Connectors: Centronics 24-Pin Male/Female to Centronics 24-Pin Male/Female
- Specified Transfer Rate: 1MB per second
- Up to (15) instruments (devices) can be connected to (1) computer (controller)
- Cable length: 20m between controller and (1) device or 2m between each device, whichever is less
- Data Transfer Mode: 8-bit parallel
- Designed for connecting computers and instruments

ENTERPRISE SOLUTIONS

IEEE 1284® DB25 Parallel Cables

06103

For use with printers, scanners and other IEEE 1284 peripherals

High-speed IEEE 1284 Parallel Cables from Cables To Go ensure you realize the added speed and two way communications offered by your newer printers, HP tape drives, Iomega devices, scanners and more. This advanced technology, which defines high-speed, bidirectional communications between PC and peripheral, requires both high quality connectors and a specialized wire-type to handle the increased data rates. Seventeen pair wire twisted with at least 36 turns per meter, molded connectors, foil shielding and 85% coverage braid soldered 360° to the connector shell providing maximum resistance against harmful EMI/RFI and achieving the maximum performance for your peripheral.

- Works with IEEE 1284 compliant printers, tape drives, Iomega® devices, scanners and other IEEE 1284 compliant peripherals
- Connectors: DB25 (A) Male-to-DB25 (A) Male or Female
- Provides increased speed and functionality over standard parallel cabling
- Greater protection against EMI/RFI interference
- Maximum end-to-end attenuation not to exceed 1.5dB at 5MHz

DB25 All Lines Cables

02664

For straight-through parallel and serial applications

DB25 Male To Male Cables from Cables To Go are designed for RS232 serial or parallel applications. Easily connect your printer, modem or other DB25 device to a switchbox. All 25 lines are wired straight through pin-to-pin for ease of compatibility. Each cable is constructed from molded connectors and foil shielding for EMI/RFI protection.

- Connectors: DB25 Male or Female
- Connect your printer, modem or other DB25 serial/parallel devices to a switchbox
- Fully shielded against EMI/RFI
- Fully-molded connectors with thumbscrews provide a quick and easy connection every time
- All 25 lines wired straight through

Ultima™ PS/2 Keyboard & Mouse Cables

Dress up your desktop with these stylish, high performance cables

Ultima Series PC Cables combine style, quality, performance and value, while giving you the ultimate in cable technology. The sleek design of the molded connectors makes them easy to grip. The connectors are color-coded to match the ports on your personal computer or notebook, ensuring a simple connection. The charcoal gray cable jacket not only matches your case but disappears behind your desk leaving a clean, organized look. Constructed from UL tested and certified cable, the Ultima Series meets the rigid standards of everyday use. The PS/2 cable is foil shielded with drain wire. Copper foil wraps the undermold, while a 360° solder-to-connector shell creates an end-to-end shielding solution for a noise-free connection.

- Connectors: 6-Pin Mini Din
- Compatible with all PS/2 devices
- 24k gold connectors provide maximum corrosion resistance for error-free data transfer
- Ultra-flexible jacket makes installation easy
- Heavy-duty molded strain relief provides increased flexibility and durability
- 26AWG copper conductors ensure excellent signal transmission.
- Aluminum undermold shield assists in reducing EMI/RFI interference to meet FCC requirements
- Lifetime warranty

SCSI-2 Cables

03564

These SCSI-2 Cables from Cables To Go feature the Micro-Density 50-Pin connector found on Fast SCSI-2 host adapters and on many newer SCSI peripherals. With a Male to Male cable you can connect one peripheral directly to another or to a SCSI host adapter.

- Connectors: Micro-Density 50-pin Male to Micro-Density 50-Pin Male
- Cable Type: SCSI-2
- Primary Use: Connects a SCSI-2 peripheral to either a SCSI-2 bus or another SCSI-2 peripheral
- Applications: Scanners, external storage devices and other SCSI-2 peripherals

Item#	Description	MSRP
03563	3.5ft SCSI-2 MD50M/M Cable	\$20.98

SCSI-1 Cables

02488

SCSI-1 Cables from Cables To Go provide you with the performance you expect from your SCSI devices. These SCSI-1 cables feature the DB25-Pin found on SCSI host adapters on PCs or Mac®s to a 50-Pin Centronics connector most often found on peripherals. With the Male-to-Male cable you can connect one peripheral directly to your SCSI host card.

Designed with a foil and braided shield overwrapping a twisted-pair construction, providing maximum immunity to EMI/RFI interference combined with a high quality wire that provides data integrity. Molded connectors provide strain relief and add additional protection against EMI/RFI interference.

- Connectors: DB25-pin Male to Centronics 50-pin Male
- Cable Type: SCSI-1
- Primary Use: Connecting the DB25 SCSI port on a PC or Mac to an external SCSI-1 device
- Applications: Scanners, external storage devices and other SCSI-1 peripherals

SCSI-3 Cables

07864

Ultra SCSI (or SCSI-3) is the latest of the ever improving SCSI standards, and is the cable of choice for such peripherals as the Lomega™ Zip Drive. SCSI-3 Cables from Cables To Go include specifications for a single-ended as well as a differential bus style. The single-ended is similar to Fast SCSI-2, except it accommodates up to (32) devices over a 16-bit single cable bus. This new style also increases data throughput up to 20Mbps in single-ended applications. Single-ended SCSI-3 is limited to four devices over 3m or eight devices over 1.5m. Differential SCSI refers to a bus configuration using two wires per signal, with the signal being derived by the voltage difference between the two wires. This approach effectively eliminates noise on the SCSI bus and allows bus length to increase up to 25m. If you need cables for differential Ultra SCSI applications, please call for help since they require different construction techniques.

Item#	Description	MSRP

SCSI Connector Guide

Centronics 50

The Centronics 50 Connector is often used by older SCSI-1 devices such as scanners and storage devices.

Centronics 50 Male

Centronics 50 Female

MD68

The MD68 Connector is often used by SCSI-3 devices such as scanners, removable storage drives, controllers and external CDR/CDRW drives.

MD68 Male

.8mm VHDCI Male

VHDCI

The VHDCI Connector is smaller in physical size than an MD68 and often used in SCSI-3 RAID applications.

MD50 Male

DB25 Male

MD50

The MD50 Connector is often used by SCSI-2 devices such as scanners, removable storage drives, controllers and external CDR/CDRW drives.

DB50 Male

DB25 Female

DB25

The DB25 Connector is often used by SCSI-1 devices and some Apple computers.

VHDCI SCSI Cables

VHDCI (Very High-Density Cable Interconnect) SCSI Cables from Cables To Go feature 30AWG double-shielded twisted-pair cabling and .8mm 68-Pin molded connectors to reduce EMI/RFI interference. These cables are designed to meet or exceed SCSI specifications. These cables are primarily used to connect advanced SCSI multi-port applications to RAID controllers. The small footprint allows up to four channels to be connected on a single card, and offers excellent shielding against data loss. By creating this improved physical interconnect, connectivity is both more versatile and manageable. VHDCI cables are also referred to as SCSI-V cables.

- Connectors: External Very High-Density .8mm 68-pin Male to External Very High-Density .8mm 68-pin Male
- Twisted-pair conductors ensure that each data line is paired with a ground line to minimize interference
- Braid and foil shielding reduces EMI/RFI interference ensuring error-free data transfer
- Designed for: Connects advanced SCSI multi-port applications to RAID controllers

External SCSI Terminators

SCSI Terminators from Cables To Go optimize the performance of your SCSI bus - from the popular passive and active terminators for single-ended SCSI applications, to the active negation and hard-to-find, premium-quality forced perfect terminators. Picking the right terminator is vital to the performance of your SCSI chain. A passive terminator is simply a resistor network designed to regulate the impedance in the line, while an active terminator uses a voltage regulator to optimize signal voltage. Active termination is always preferred over passive, and most Cables To Go Active Terminators feature an LED to monitor terminator power line status. Before you can connect your expensive SCSI equipment, make sure you make the right connection with a Cables To Go Terminator!

- Connector: SCSI-1 Centronics 50-pin
- Termination: Active
- Designed For: For external SCSI-1 end-of-line termination

Item#	Description	MSRP
03574	External SCSI-1 C50M Active Terminator.....	\$21.99
03572	External SCSI-2 MD50M Active Terminator.....	\$21.99

Item#	Description	MSRP

09512	External SCSI-3 MD68M (TS) Active Negation Terminator With LED	\$40.99

Internal SCSI Cables

Be ready for the next high-speed SCSI protocol with Ultra320 Cables from Cables To Go. Ultra320 SCSI provides the most competitive performance choice for high-traffic workstations, servers, multi-user systems, and storage area networks (SANs). This high-quality cable supports both single-ended and LVD connections. The fully laminated twisted and flat design allows for tighter impedance control, and is designed to maintain single-ended and differential impedance. All Cables To Go SCSI cables adhere to SCSI specifications to ensure maximum performance and data integrity.

- Connectors: 68-Pin Male to 3 x 68-Pin Male; (1) for the SCSI controller card, (2) for SCSI devices, and (1) for an optional terminator
- Supported Transfer Speed: up to 320Mbps
- Devices Supported: 2
- Backwards compatible with Ultra2/Ultra160 applications
- Connector Spacing: 0-16-21-22in
- Ideal for internal hard drives, removable storage devices, and other LVD/SE peripherals

BULK WIRE SOLUTIONS

Wire and connectors are the fundamentals for every cabling job. Get the job done right with quality bulk wire and connectors. We offer a wide array of Cat5e and Cat6 bulk wire solutions, including plenum rated wire for commercial applications. See our wire and connector solutions starting on page 189.

Broadband applications such as high-speed internet and digital cable/satellite TV demand high performance wire. RG6 Coax from Cables To Go™ meets these rigorous demands. See our coaxial wire, connectors and tools starting on page 190.

Home automation is an exploding market and Cables To Go has the wire offering to support this demand. Our speaker and multimedia wire provide control, fidelity and convenience. Learn more starting on page 194.

BULK WIRE SOLUTIONS

32602

Cat6a 600MHz Bulk Cable

The next generation of networking

Experience the next generation of networking with Cat6a Bulk Cable from Cables To Go. Cat6a network cables enable 10 Gigabit data transmission over a 4-connector twisted pair copper cable, allowing connection distances of up to 100m - significantly farther than current Cat6 cabling. The Cat6a draft extends the Cat6 electrical specifications from 250MHz to 500MHz and also proposes a new measurement for Power-Sum Alien Crosstalk to 500MHz. Alien crosstalk is a coupled signal in a disturbed pair arising from a signal in a neighboring cable.

- Ideal for VoIP and IP video
- Supports 10GBase-T and all applications designed for Cat6a or lower cabling
- A center isolation member maintains pair separation for optimal NEXT performance
- Jacket is sequentially numbered enabling the user to know how much cable is left
- Cable diameter is 0.29in
- Drain wire runs under the cable jacket between a Mylar® tape and an aluminum foil tape
- Meets the following standards:
 - ISO/IEC 11801:2002, Ed. 2 and Ed. 2, Amendment 1 (draft)
 - ANSI/TIA/EIA 568-B.2-1 and 568-B.2-10 (draft)
 - IEC 61156-5:2002
 - UL CMR and CSA FT4 or UL CMP and CSA FT6

Network Cable Standards

	Speed	Distance	Frequency
Cat6a	10/100/1,000/10,000Mbps	100m	500MHz
Cat6	10/100/1,000Mbps	100m	250MHz
Cat5e	10/100Mbps	100m	100MHz

Cat6a Solid PVC Cable

Item#	Description	MSRP

Cat6 Bulk Cable

For Gigabit Ethernet applications

With Gigabit Ethernet, broadband, audio/video and security capabilities, Cat6 Bulk Cable from Cables To Go is ideal for any critical network installation. Cat6 Bulk Cable is offered in blue and grey for easy identification, and is NEC compliant, meeting EIA/TIA Category 6 standards.

- 4-pair unshielded twisted pair cable
- 24AWG bare copper conductor for superior conductivity
- CSA listed
- Installer-friendly cable shipped in easy to use pull box

Cat6 350MHz Solid Cable

- Durable, high-density polyethylene insulation and PVC jacket
- Meets all Category 6 requirements for high-speed, full-duplex, parallel transmission protocols
- CM/CMG-rated for single floor, general purpose use in walls and ceilings

Item#	Description	MSRP
32593	Cat6 350MHz Solid PVC CMR Cable - Blue 500ft	\$104.99

43107	Cat6 Stranded Bulk Cable - Gray 500ft.....	\$114.99

Cat6 550MHz Plenum Rated Cable

For commercial air-plenum installation

- Varying left hand lays to minimize crosstalk
- Tested to 550MHz to provide additional performance and bandwidth over and above the basic requirements of Cat6 standards
- Durable, low-smoke, FEP plenum rated jacket

Item#	Description	MSRP
43091	Cat6 550MHz Plenum Rated Cable - Gray 1000ft.....	\$449.99
43092	Cat6 550MHz Plenum Rated Cable - Blue 1000ft	\$449.99

BULK WIRE SOLUTIONS

Cat5e Bulk Cable

27351

Cost effective cabling for 10/100 networks

Cat5e Bulk Cable from Cables To Go is ideal for standard 10/100 Ethernet applications. Our cable is tested to meet or exceed Cat5e standards and is available in solid PVC, stranded PVC, and solid plenum to cover your needs.

- 4-pair unshielded twisted pair cable
- 24AWG bare copper conductor for superior conductivity
- Foot-marked cable packaged in Easy to use pull box
- CSA listed

Cat5e 350MHz Solid Cables

Taperwire[®] 25ft Flat Cat5 Cable

43031

Put a telephone or network connection in hard-to-reach locations

The Taperwire Flat Cat5 Cables from Cables To Go has a self-adhesive backing that allows you to install the wire in plain sight. Many houses are not conducive to running wire after the walls are up. Stucco, plaster and masonry walls can pose challenges for even the most skilled installer. Fire blocking within the wall cavities and foam insulation can be impossible obstacles to overcome. Measuring less than 1/32in thick, you can stick it to the wall and cover it with paint, wallpaper or joint compound to make it disappear. Punchdown to a standard RJ45 jack for a complete installation.

- Ultra flat wire, less than 3/32in thick; hide the wire in plain sight
- Self-adhesive backing holds wire in place

Item#	Description	MSRP

RJ45 Cat5e Modular Plug For Round Solid/Stranded Cable

27574

Terminates round, solid or stranded cable in Cat5e and Cat6 network applications

Modular Plugs from Cables To Go are manufactured from high impact clear polycarbonate to withstand everyday wear and tear.

- Plug type: RJ45
- Position/conductor: 8 x 8
- 50 micron; gold-plated contacts
- Conform to FCC Part 68 requirements
- Designed for data applications
- Compatibility: Round, solid or stranded cable
- 2 piece design
- Load bar ensures Cat5e and Cat6 performance

BULK WIRE SOLUTIONS

RJ45 8 x 8 Modular Plugs

Terminates 8 x 8 flat/stranded or round/solid cable in voice/data applications

Modular Plugs from Cables To Go are manufactured from high impact clear polycarbonate to withstand everyday wear and tear. With a UL/CSA listed rating, you can expect error-free data transfers.

- Plug type: RJ45
- Position/conductor: 8 x 8
- Gold-plated contacts, designed for voice applications
- Compatibility: Flat/stranded or round/solid Cable

RJ45 Cat5e Modular Plugs For Stranded Cable

Terminates round stranded cable in data/voice applications; 50micron gold-plated contacts

From the popular 4 x 4 and 6 x 4 voice grade plugs and adapters to the 8 x 8 and 10 x 10 data products, Cables To Go has the solution for your cable terminations. Modular plugs are designed to terminate either stranded or solid conductor wire and to accommodate either oval or round cable. Manufactured with 50 micron gold-plated contacts and UL/CSA listed for reliable data transfers.

- Plug type: RJ45
- Position/conductor: 8 x 8
- Designed for data/voice applications
- Compatibility: Round (UTP) stranded cable

BULK WIRE SOLUTIONS

Modular Adapters

A popular way to run client server applications

Using modular adapters with inexpensive silver satin or flat oval twisted pair wire has become a popular way to run client server applications. Needing to connect terminals on the desktop back to a central patch panel or directly to a MUX via RS232, many network planners have implemented modular adapters as the most cost effective way to complete these connections. Colorcoded modular adapters lend easy identification and differentiation to your cable plan. We are more than happy to configure any adapter to fit your application.

Composite Cable With Two RG6/U & Two Cat5e

Pull two network and two television cables in one run

Composite Cables from Cables To Go satisfies the homeowner's demands for connectivity by combining the most commonly used cable types into one easy-to-install cable. Two RG-6/U Quad Shield are ideal for antenna, cable television and satellite installations. The 18AWG copper clad steel center conductor is surrounded by a foam polyethylene dielectric. A bonded aluminum foil and 60% aluminum braid over another foil and 40% aluminum braid provide 100% shield coverage. Sweep testing to 3GHz ensures performance at applicable frequencies. Two Cat5e UTP cables for home networks and low voltage applications consist of four twisted pairs of 24AWG, 350MHz cable. All cables are color-coded for easy identification. This UL listed cable meets UL and CUL specifications for CL1, CL2, CM, CMX and CMG installations. To help you keep track of cable used, the cable jacket is sequentially marked every two feet.

- Pull four cables at one time
- (2) RG6/U plus (2) Cat5e
- 18AWG copper clad steel center conductor
- Bonded foil covered by 60% aluminum braid over foil and 40% aluminum braid provide 100% shield coverage
- Foam polyethylene dielectric
- Four twisted pairs of 24AWG, 350MHz
- Sweep tested to 3GHz
- Sequential foot marking
- CM/CL2 rated PVC jacket
- UL listed

RG6/U & RG59/U Coaxial Cable With Copper Center & 95% Braid

Ideal for composite video, RGBHV video, component video and surveillance systems

Achieving the best picture possible for your composite video installations requires the best cable. Copper clad steel conductors are fine for RF applications like antennas and satellite installations, but may result in poor quality composite video signals. This Coax Cable from Cables To Go is designed specifically for installations where you intend to run composite video, RGBHV video, component video and even surveillance systems. This cable has a bare copper center conductor surrounded by a foam polyethylene dielectric, 95% tinned copper braid and PVC jacket. This UL listed cable meets UL and CUL specifications for CL1, CL2, CM, CMX and CMG installations. Sweep tested to 3GHz to ensure performance. To help you keep track of cable used, the cable jacket is sequentially marked every two feet.

- RG6: 18AWG solid bare copper center conductor
- RG59: 20AWG solid bare copper center conductor
- 95% tinned copper shield
- CM/CL2 rated PVC jacket
- Sequential foot marking ends at 0ft

Siamese RG59/U Coaxial Cable With 18/2

43113

Carries video and power over one cable for surveillance installations

Siamese Cables from Cables To Go make installation of surveillance systems easier by carrying video over the coax and power over the 18/2. Dual shield RG59/U coax cable features a 20AWG solid copper center conductor for a truly clean video signal. The 95% solid copper braid over a foil shield protects the video signal from external EMI and RFI while providing a reliable path for PTZ signal control. This is a UL listed cable for CL1, CL2, CM, CMX and CMG installations. Sweep tested to 3GHz to ensure performance. The cable jacket is sequentially marked every 2ft to aid in tracking the remaining cable on the spool.

- Siamese construction for video and power
- Dual shielded RG59/U
- 95% solid copper braid suitable for PTZ control
- UL-listed
- Sweep tested to 3GHz
- Sequential foot marking ends at 0ft

25ft Taperwire® Flat 75-Ohm Cable

43030

Put a cable television jack anywhere you need it - ideal for surveillance

The Flat 75-Ohm Cable from Cables To Go is an ultra flat Coax wire with a self-adhesive backing that allows you to install the wire in plain sight. Many houses are not conducive to running wire after the walls are up. Stucco, plaster and masonry walls can pose challenges for even the most skilled installer. Fire blocking within the wall cavities and foam insulation can be impossible obstacles to overcome. Measuring less than 1/32in thick, you can stick it to the wall and cover it with paint, wallpaper or joint compound to make it disappear. Use the gold-plated "F" connectors (#29788) for a complete installation.

- Ultra flat wire, less than 1/32in thick
- Hide the wire in plain sight
- Self-adhesive backing holds wire in place

Item#	Description	MSRP

Hex Crimp F-Type Connectors

41080

Anodized brass hex-crimp F-Type connectors for satellite, cable television and antenna installations

These Hex Crimp F-Type Connectors from Cables To Go are commonly used for antenna, cable television and satellite television installations. They are made from anodized brass to provide years of life free from oxidation. Easy installation using the #38010 hex crimp tool.

- Anodized brass for long life
- More threads inside the nut provide better shielding
- Larger nut surface to easily finger tighten the connector

BULK WIRE SOLUTIONS

Compression F-Type Connectors

Weatherproof compression connectors for satellite, cable television and antenna installations

Quickly becoming the standard in satellite and cable television installation, Compression Connectors from Cables To Go provide reliable connections and resistance to moisture. The bright nickel finish stands up to harsh environments and reduces the effects of oxidation. Internal O-rings and a tapered plastic ferrule provide a barrier to moisture migration under the cable jacket, which could damage the cable. An O-ring in the nut prevents moisture migration through the threads. Easy installation with the 3-in-1 compression tool #38011.

- High frequency, compatible with digital cable and satellite
- O-rings protect the cable from moisture migration

BULK WIRE SOLUTIONS

Miniature Coax Component Video Cable

Customize your own component video and audio/video cables

Choose 3-mini coax for RGB applications or 5-mini coax for RGBHV applications. The cable's flexibility is increased by using a 25AWG stranded bare copper center conductor. The Mylar® aluminum foil is covered by a 40% braid of tinned copper to provide 100% shield coverage. Foamed polyethylene dielectric helps the cables maintain the crucial cable geometry required to maintain a 75-Ohm characteristic impedance, while providing dielectric properties close to that of air. The CL2 PVC jacket is tough enough for long cable runs and flexible enough to go wherever you want.

- 75-Ohm miniature coax cables
- 25AWG stranded bare copper center conductor
- 100% shield coverage
- CL2-rated PVC Jacket

Velocity™ 12AWG Bulk Speaker Wire

High performance speaker wire

Velocity Speaker Wire from Cables To Go offers precision sound quality for today's audio and home theater applications. These cost-effective performance cables give you maximum sound and wide dynamic range. The stranded oxygen-free copper wire lowers inductance and capacitance ensuring superior sound quality. For low noise and distortion, each conductor is wrapped by polypropylene insulation. For price and performance, they are the perfect solution for connecting speakers to your receiver.

- Oxygen-free copper wire provides clear audio performance and wide dynamic range
- Low inductance and capacitance ensure superior sound quality
- Each conductor is wrapped by polypropylene insulation for low noise and distortion
- Ultra-flexible jacket for easy installation

18AWG Plenum Rated Bulk Speaker Cable

Plenum rated speaker wire for connecting audio systems in commercial environments

Audio/video installations in education and commercial settings often require plenum rated cabling. Our plenum rated speaker cable was engineered to overcome common challenges faced by installers.

These cables are constructed with two color-coded 18AWG twisted pair copper cables ensuring easy identification. The speaker wire is twisted within a natural colored jacket. The CMP rating provides the fire protection required to run within walls and air plenums without the need for conduit.

- CMP Rated cable jacket
- (2) 18AWG copper cables, Red/Black
- Each conductor made from 7 strands 26AWG copper
- Footage markers
- Lifetime warranty

BULK WIRE SOLUTIONS

14AWG High Strand In-Wall Speaker Wire

43085

Ideal for whole house audio systems

If you are planning to install audio throughout your house, this is the cable you'll need. This cable is CL2 rated for use inside walls and features a flame retardant jacket that helps to diminish the potential of fire spreading between floors. In-wall speaker wire features conductors twisted upon each other that makes the cable round and much easier to pull throughout the house than flat or zip-cord style speaker wire. Inner conductors are color-coded for easy identification.

- 41 strands per conductor
- 99.9% high purity copper
- Color-coded conductors for easy identification
- Flame retardant black PVC jacket
- UL listed and CL2 rated for in-wall installation

Item#	Description	MSRP
43085	250ft 14/4AWG In-Wall Speaker Wire	\$179.99

43090	1000ft 14/4AWG In-Wall Speaker Wire	\$359.99

16AWG High Strand In-Wall Speaker Wire

43083

Ideal for whole house audio systems

If you are planning to install audio throughout your house, this is the cable you'll need. This cable is CL2 rated for use inside walls and features a flame-retardant jacket that helps to diminish the potential of fire spreading between floors. In-wall speaker wire features conductors twisted upon each other that makes the cable round and much easier to pull throughout the house than flat or zip-cord style speaker wire. Inner conductors are color coded for easy identification.

- 65 strands per conductor
- 99.9% high purity copper
- Color coded conductors for easy identification
- Flame retardant black PVC jacket
- CL2 rated for in-wall installation

16AWG Flat Speaker Wire

43157

Ultra flexible for easy installation

Whether you are installing your first home theater system or just adding additional speakers, Flat Speaker Wire from Cables To Go is a great choice. The extremely thin profile makes it ideal for running under carpeting or behind base boards. The 16AWG wire is ultra flexible due to the special formula PVC and conductor construction. Each conductor is made from 96 strands of 36AWG bare copper, allowing the cable to bend easily for seamless installation. The surface print conventionally identifies polarity. This product is a great fit when running wire to the left, right or rear channel speakers.

- High strand count for maximum flexibility
- Parallel conductors
- Surface print for easy identification of polarity
- Compact size; nominal dimensions of 0.090in x 0.430in

Item#	Description	MSRP
43157	100ft 16AWG Flat Speaker Wire	\$69.99
43158	250ft 16AWG Flat Speaker Wire	\$139.99

18AWG Bulk Speaker Cable

40528

Connects speakers to audio amplifiers

Our cost effective cables give you maximum sound for your dollar. Clear PVC jacket with white marker for easy polarity identification. High strand count offers maximum flexibility for easier installations. Each conductor is manufactured from three bundles of 24 copper strands.

- Clear jacket with polarity identification
- (2) 18AWG conductors
- (3) bundles of 24 strands for each conductor
- Dimensions: 0.10" X 0.20"
- Lifetime warranty

BULK WIRE SOLUTIONS

Taperwire® Flat Speaker Wire

Makes the impossible speaker installations possible

43028

Tapewire Flat Speaker Wire with self-adhesive backing allows you to install wire in plain sight. Many houses are not conducive to running wire after the walls are up. Measuring less than 1/32in thick, you can stick it to the wall and cover it with paint, wallpaper or joint compound to make it disappear. Special connectors are included to make the connection between the round and flat wire, so the only tool needed for installation is a pair of flat pliers.

- Ultra flat wire, less than 1/32in thick
- Hide the wire in plain sight with its clear color
- Self-adhesive backing holds wire in place
- IDC connectors require only a pair of pliers to install

Item#	Description	MSRP
43028	25ft Taperwire Flat 18/2 Speaker Wire.....	\$62.99

Composite Cable - One 14/4 In-Wall Speaker Cable & One Cat5e

43079

The ideal speaker wire for installing whole house audio systems

More sophisticated home audio distribution systems require more sophisticated wiring. This unique cable has the 14/4 in-wall speaker wire for your sound - plus a UTP CAT5e cable for your controls. In-wall speaker wire from Cables To Go is made from 41 strands of 99.9% high-purity copper, making it very flexible and less likely to kink during installation. CAT5e UTP cable for home networks and low voltage applications consist of four twisted pairs of 24AWG, 350MHz cable. This cable is CL2 rated for use inside walls and features a flame retardant jacket that helps to diminish the potential of fire spreading between floors. All cables are color coded for easy identification. To help you keep track of cable used, the cable jacket is sequentially marked every two feet.

- 99.9% high purity copper
- Four twisted pairs of 24AWG, 350MHz
- Flame retardant yellow PVC jacket
- CL2 rated for in-wall installation
- Sequentially marked every 2ft

Premium Audio/Video Connectors

29787

High performance connectors for your demanding A/V installations

Ideal for home and mobile audio/video projects, our premium audio/video connectors provide the performance and value you demand. These premium A/V connectors are CAD engineered and precision-machined with 24k gold-plating to ensure ideal signal reproduction.

- Two-way cable entrance for quick, easy installation
- Accepts speaker wire up to 8AWG
- Corrosion-resistant, precision-machined 24K gold-plated connectors ensure superior fit and long lasting quality

SonicWave™ Audio/Video Connectors

40358

Customize the length of your own audio/video cables

SonicWave solder style connectors are machined from brass and 24k gold-plated for years of oxidation-free operation. These connectors are designed to provide a snug, but not overly-tight, fit when mating with your audio/video device's input and output jacks. The embossed textured grip on the metal shell is engineered to provide better leverage while inserting or removing the connectors.

- Machined-brass/24k gold-plated
- 75-Ohm impedance
- Maximum cable diameter 3.3mm or 6.5mm

Rubber Connector Grips

41131

Make connectors easier to insert, remove and identify

Rubber Connector Grips are the easy way to make slick metal connectors easier to insert and remove from mating jacks. These connectors provide color coding so you can quickly identify the function of the cable you are making. Use these grips on RCA, BNC and F type compression connectors as well as SonicWave™ RCA, BNC, S-Video and 3.5mm precision connectors. The connector grips are 10mm high and have an inside diameter of 11mm so they can be used with a multitude of popular connector styles.

- Quickly identify the function of an audio or video connector
- 10mm wide, 11mm inner diameter

Taperwire® Flat 26/4 Alarm Wire

43029

Makes installing alarm contacts a breeze

Tapwire Ultra Flat Alarm Wire from Cables To Go with a self-adhesive backing allows you to install the wire in plain sight. Many houses are not conducive to running wire after the walls are up. Stucco, plaster and masonry walls can pose challenges for even the most skilled installer. Fire blocking within the wall cavities and foam insulation can be impossible obstacles to overcome. Measuring less than 1/32in thick, you can stick it to the wall and cover it with paint, wallpaper or joint compound to make it disappear.

- Ultra flat wire, less than 1/32in thick
- Hide the wire in plain sight
- Self-adhesive backing holds wire in place
- DC connectors require only a pair of pliers to install
- 26AWG four conductor

Plenum Rated UXGA Bulk Cable

43093

A necessity when installing video systems in commercial and educational facilities

Plenum Rated UXGA Cable is a necessity for any systems integrator working on an educational or commercial installation. UXGA cables are used for video projectors, plasma screens, LCD or CRT monitors and in installations where the cable must perform over long distances. The cable construction consists of three 75-Ohm coaxial cables plus three 26AWG twisted pairs and two 26AWG conductors ensuring signal integrity in your installation. The coax cables feature a tinned copper braid providing 93% shield, while Mylar® aluminum foil and drain wire to provide 100% coverage. CMP rated PVC jacket and Teflon® inner insulators provide the fire protection required to run these cables within walls and air plenums without the need for conduit.

- UL-listed, CMP rated cable jacket
- FEP, Teflon outer jacket and inner insulator
- (3) 28AWG coax cables, (3) 26AWG twisted pairs, (2) 26AWG conductors
- Sold by the foot
- Lifetime warranty

Solutions For Every Application Capabilities and Services

- Molding capabilities using all types of materials. Several molding machines on-hand for maximum production efficiency.
- Quick-turn prototyping available for sample approval.
- Rapid production of fiber optic network cables including cables, pre-terms and MTP.
- Modification of "stock" cable assemblies and harnesses.
- Fabrication of customer-specific custom cable assemblies and harnesses.
- Production of custom cable assemblies for highly-integrated design specifications.
- Production of kitting of value-added cable assemblies that include PCBs, housing or metal fabrication.

What wire gauge do I need for speaker cables?

Choosing an appropriate speaker wire requires consideration of two parameters - current delivery and cable length. Small speakers working from bookshelf systems rarely demand more than 1 or 2 amps of current. 16AWG wire is sufficient. For runs over 150ft, moving up one wire gauge to minimize voltage loss over the length of the wire may improve the quality of the bass and dynamic impact.

Larger, high performance speakers driven by larger amplifiers are capable of delivering 10 or more amps to a speaker. For critical installations, a 14AWG or even 12AWG wire is appropriate. Speaker voltages rarely exceed 50 volts, so Class 2 wiring for in-wall applications is sufficient. Class 3 wiring is rated for up to 300-volt applications.

TOOLS & TESTING SOLUTIONS

The right tools make the difference, and with quality tools and test equipment from Cables To Go™ installation and verification is made easier. We offer complete tool kits, starting on page 200, ranging from novice to expert applications.

The right tester verifies performance of installation. Our twisted pair, tone and probe and coaxial testers ensure that the wiring system is achieving maximum performance. Problems and bottlenecks are easily identified and corrected. See our broad offering of testers starting on page 208.

Save installation time by using the right tool for the job. Cables To Go offers a comprehensive line of hand tools designed to make wiring installations hassle-free. Cut, strip and crimp with these labor-saving devices starting on page 209.

PC Cable Tester Pro ATA

All-in-one tester for almost any PC cable including SATA

The PC Cable Tester PRO ATA from Cables To Go now supports the SATA/High-Speed Serialized AT Attachment. This stand-alone test device provides the user with a wire map of standard PC data cables. The unique LED display clearly determines wiring status by providing a point-to-point pin out of the actual wiring configuration. This is an essential tool for cable dealers, cable assembly houses, IT professionals or system integrators to quickly troubleshoot PC data cables, where most data transmission problems occur.

- Covers almost every PC cable on the market: SATA, RJ45, USB, IEEE 1394® FireWire®, DB9, DB25 and HD15
- Uses wire mapping display
- Detects open wires, shorts and miswiring
- Tests USB and FireWire for actual pin configurations
- LED glow-enhanced for printer cable test
- Automatic or manual scanning
- Hand-held, lightweight and totally portable DC battery compartment and AC power jack

LANsmart TDR Cable Tester

Multi-functional network cable tester for the professional installer

- Tests RJ45, Cat5, Cat6, UTP and STP for opens, shorts, miswirings, reversal, split pairs and shield continuity
- Compatible with any twisted pair Category 3, 4, 5 and 6 cables
- Built-in port finder locates corresponding jacks on hubs/switches
- Measures length on UTP and STP cable without remotes
- Increases measuring accuracy with its velocity of propagation adjustable calibration ability for non-standard cables
- Displays in both meters and feet
- Built-in tone generator (probe not included) sends signals to all or just selected pins or conductors
- Displays test results in pin-to-pin/wiremap format
- Battery operated, compact and easy to use

SMARTest Compact Network Cable Tester

Does the job of a full-size tester, yet fits in your shirt pocket

The first pen-style tester available, SMARTest from Cables To Go has a lightweight rugged design, which is very convenient for network professionals. It performs all the functions of a full-size tester - detecting shorts, opens, crossed pairs, reversed pairs and split pairs, but it's only 5in long, allowing it to fit inside your shirt pocket! SMARTest's 2-button operation makes it very easy to use. A built-in remote unit allows for testing cables both before and after installation and a built-in tone generator (probe not included) can be used with a standard probe to trace wires to their source.

- At 5in long and 1in wide, it fits inside your shirt pocket
- Tests for wiring faults: opens, shorts, reversed, crossed and split pairs
- Detects split pair faults with just a minimum cable length of 40cm
- Provides verification of shield integrity
- Specially designed remote unit enables one person to test installed cables
- Easy-to-read fault display and high-speed testing
- Low battery indicator
- Test cable installations up to 200m (656ft)

NETfinder Network Cable Tester

39009

Tracing and testing in one easy step

The newest generation of the LANtest family, NETfinder has an advanced circuit design surpassing the original technology. NETfinder is ideal for commercial and residential applications. NETfinder enhances users' ability to quickly locate and verify the status of common and standard voice and data cables. It combines the functions of a convenient cable tester with a built-in low emission frequency tone generator. NETfinder is also equipped with PORTfinder functions to trace a cable back to the hub/switch. With NETfinder, cable tracing and testing is now one easy step.

- Tests for wiring faults of open, short, reversed and crossed
- Provides verification of shield integrity
- Specially designed remote unit enables one person to test installed cables
- Built-in PORTfinder function traces ports back to switch
- Easy to read fault display and high-speed testing
- Low battery indicator
- Test cable installations up to 200m (656ft)

Multi Network Cable Tester-E

26854

Designed for quick testing of TIA568A/568B, Token Ring and 10/100Base-TX (STP/UTP) cables

The Multi Network Cable Tester-E from Cables To Go is specifically designed for testing network cables quickly. Featuring high-speed auto scanning for wire continuity, miswiring and shield integrity, this compact unit tests TIA568A/568B, Token Ring and 10/100Base-T (UTP/STP) cables. Test installed cables with the compact remote terminator that conveniently piggy-backs onto the master unit.

- High-speed testing of UTP/STP and coaxial cables
- Verifies adherence to 10BASE-2, 10BASE-T, 100BASE-T, TIA-568A, TIA-568B and Token Ring wiring standards
- Verifies shield integrity
- Power switch
- Piggy-back remote terminator design
- Includes storage pouch

Item#	Description	MSRP
26854	Multi Network Cable Tester-E.....	\$69.99

NETest-E Network Cable Tester

39003

Economic solution to quickly test network cable continuity and wiring

The NETest-E from Cables To Go detects the most common wiring faults on TIA568A/568B, Token Ring, 10BASE-T and 10/100 BASE-T twisted pair cables. The faults detected by the NETest-E include shorts, miswiring, reversed pairs and shielding faults on UTP or STP cables. Plug a cable into the Main and Remote units and the NETest-E will begin testing automatically.

- Small form factor of 2in W x 3in H x 1in D
- Test network cable (Cat5, Cat6, UTP, STP, RJ45) continuity and wiring configuration
- Detect common wiring faults include shorts, miswiring, reversed pairs and shielding faults
- Test TIA568A/568B, Token Ring, 10BASE-T, and 10/100 BASE-T twisted pair cables
- Test cable installations up to 200m(656ft)

TOOLS & TESTING SOLUTIONS

SOHOtest-E Residential Cable Tester

39004

Easy to use, tests residential wiring with "F" and RJ45 connector jacks

This easy to use tester helps novice home network users determine cable faults before calling for service. The SOHOtest-E (Small Office Home Office) from Cables To Go is an economical solution to test the most commonly used cables in residential wiring - those with "F" and RJ45 connectors. Use this tester to determine wiring faults in network, phone and cable TV cables before or after installation.

- Pass/fail coaxial test
- Remote unit for single person testing
- Compact, lightweight design
- RJ45 and F connector jacks
- Test cable installations up to 200m
- Small form factor of 2in W x 3in H x 1in D

Item#	Description	MSRP
39004	SOHOtest-E Residential Cable Tester.....	\$39.99

LANtest-E Wire-Mapping Cable Tester

39005

Maps wiring configurations for network cables, even those installed in walls

The LANtest-E from Cables To Go features a compact design, is practical, easy to use and provides clear results. LANtest-E maps actual wiring configurations for 10/100BASE-T cables, BNC cables, RJ45/RJ11 modular cables, 258A, EIA/TIA 568A/568B and Token Ring cables. With the included remote unit, an individual can easily test cables installed in walls or patch panels.

- Small form factor of 2in W x 3in H x 1in D
- Pin-to-pin wire-mapping for RJ45, RJ11 and BNC cables (with supplied adapter)
- Dual-speed testing
- One-person testing
- Compact and lightweight design
- Remote storage attached to the main unit
- Test cable installations up to 200m (656ft)

Item#	Description	MSRP
39005	LANtest-E Wire-Mapping Cable Tester.....	\$49.99

GIGAtest-E 10/100/1000 Cable Checker

39006

Takes seconds to verify compatibility of Ethernet network cabling and devices

In just seconds, the GIGAtest-E from Cables To Go will verify compatibility of network cabling and network devices as well as determine cabling faults. GIGAtest-E is designed to test the full range of ever-expanding Ethernet cable configurations. It will determine if the UTP/STP cables are wired straight through and if they are 10/100BASE-T crossover or 1000BASE-T crossover. The detachable remote unit allows cable testing for common wiring faults like opens, shorts or miswirings. With the remote detached, an individual can test cables before or after installation.

- Main and remote units enable single person testing
- Determine suitability of cabling for 1000BASE-T networks
- Compact and lightweight design
- Easy to use and read
- Test cable installations up to 200m (656ft)
- Small form factor of 2in W x 3in H x 1in D

Item#	Description	MSRP
39006	GIGAtest-E 10/100/1000 Cable Checker	\$59.99

LANtest Network Cable Tester

13138

Reads the actual wiring configuration for Cat5/Cat5e/Cat6, coaxial and modular phone cables

The LANtest from Cables To Go is the simplest and most affordable wire-mapping device for networking cables available on the market. Use it to read the actual wiring configuration for Cat5, coaxial and modular telephone cables by comparing a transmitting end to a receiving end. Cabling faults such as discontinuity, open wires, shorts, miswiring and crossed pairs are crystal clear with the LANtest's unique LED display.

Kit Includes:

- (1) Master box, (1) Remote Box, (2) 1.5cm BNC adapter cables, (1) BNC M/M adapter, (1) RJ45 1.5cm modular cable, (1) deluxe carrying bag
- Tests pin configuration of 10Base-T, 10Base-2 Thinnet, RJ45/RJ11 modular cables 356A, TIA-568A/ 568B and Token Ring cable
- Remotely test cable up to 1000ft away either on wall plate or patch panel
- Features auto or manual scan for pinout indicators

Item#	Description	MSRP
13138	LANtest Network Cable Tester.....	\$79.99

TOOLS & TESTING SOLUTIONS

Multi-Modular Cable Tester

Designed to test modular terminated RJ45, RJ11, RJ12 for continuity and miswiring

The Multi-Modular Cable Tester is specifically designed to test modular-terminated cables (RJ45, RJ11, RJ12) for wire continuity and miswiring. It can be used to test a variety of pin configurations such as USO 4, USO 6 and USO 8, whether the pins are crossed or wired straight through. Moreover, with the remote terminator, use it for remote testing even if the cable has already been installed.

- Determines continuity faults for modular cables with RJ11/RJ12/RJ45 connections
- Compares wiring configuration to USO 4/USO 6/USO 8 standards
- Identifies wiring shorts, open wires, crossed pairs, reversed pairs and miswiring
- Tests installed cables with included remote terminator
- Includes storage pouch

26853

26853	Multi-Modular Cable Tester.....	\$73.99

LANtest Pro Testers

Tests for wiring faults of open, short, reversed, crossed and split pairs

The LANtest Pro from Cables To Go is a small hand-held tester that quickly reads the status of Ethernet twisted pair cables. The LANtest Pro includes one master unit. The small remote unit is designed to slip into the master unit to prevent loss or damage.

- Tests for wiring faults of open, short, reversed, crossed and split pairs
- Split pair fault detection at a minimum 40cm cable length
- Pairs tested: 1/2, 3/6, 4/5, 7/8 and shield
- Verification of shield integrity
- Specially designed remote unit that enables one person to test installed cables
- Easy to read fault display and high-speed testing
- Debug mode for detailed fault identification results
- Auto sleep mode and power off switch
- Built-in tone generator
- Low battery indicator

Network Cable Tester

Quickly test UTP cables for continuity

The Network Cable Tester from Cables To Go is a basic cable tester designed to quickly test UTP cables for continuity. With a push of a button, the Network Cable Tester will automatically scan all pairs of the subject cable for open wires or shorts. Using the provided set of DIP switches and jumpers, the user can test the actual pin configuration or rewire cables for various results.

09748

Item#	Description	MSRP
09748	Network Cable Tester	\$49.99

Tone Generator & Probe

Verify continuity and search for wiring faults, polarity and voltage

The Tone Generator from Cables To Go is a network installation and trouble-shooting tool which features a single or multi-tone signal, two test leads and a 4-conductor modular cable. The signal emitted by the Tone Generator can be traced by the Probe, even when cables are in a bundle or hidden in a mess of punchdown blocks or wall plates. The Tone Generator and Probe can be used to verify cable continuity, identify wiring faults, determine line polarity and voltage in network (Cat5 and Coax) and modular telephone lines.

- 2-position switch for single tone or multi-tone signal
- Toggle switch to control 3 modes of operation
- 3-color LED indicator display for telephone line polarity, continuity and voltage testing
- Black and red testing leads and power switch to prevent battery drain
- Special inductive plastic tip prevents accidental shorts (possible with copper-tip tracers) when using near high voltage devices
- Traces and identifies wires or cable in a bundle or group without damaging insulation
- Adjustable volume level for various work environments
- Both amplifier and LED for loud or dark work environments

26844	Tone Generator And Probe.....	\$95.99

TOOLS & TESTING SOLUTIONS

Psiber® Pinger Plus + Network IP Tester

29431

Advanced ping capability, a DHCP client mode and a Port ID function

The Psiber Pinger is a handheld tester used for installing and maintaining computer Local Area Networks (LANs) running the TCP/IP protocol. The Pinger uses the powerful Ping function to verify connectivity, check transmitted and received data integrity, indicate network traffic loading by measuring round trip time, notify duplicate IP address responses, provide the MAC address of an IP address and warn when the default gateway cannot be located.

- Identifies 10/100/1000 Base-TX link signals
- Verifies connectivity across a LAN by transmitting/receiving pings at either 10Base-T or 100 Base-TX speeds
- Variable packet size
- Up to 99 consecutive pings
- Stores up to 8 preprogrammed profiles that include Pinger Plus + IP address, gateway address and 1 to 80 destination IP addresses that can be pinged individually or successively
- Verifies LAN operation at a remote location over the Internet
- Provides port identification function (link light activation)
- Identifies wire pair connections with reversed polarity
- DHCP client capability to verify DHCP server is functioning and correct IP addresses are being provided
- Web browser interface for unit setup and software upgrade
- Alpha-numeric keyboard for easy IP address entry

Item#	Description	MSRP
29431	Psiber Pinger Plus + Network IP Tester	\$349.99

Psiber® CableTool Multifunction Meter

29404

Essential for contractors, electricians and low voltage installers

The New CableTool Model 50 from Psiber Data Systems provides contractors, electricians, low voltage installers, or anyone involved in the installation or maintenance of metallic cables the capability to quickly find faults in cables up to a distance of 2500ft. Select the appropriate cable type from the pre-stored library, attach the leads to 2 conductors of the cable and with a single press of a button the length of the cable or distance to an open or short is displayed. Voltage on the wires is continuously measured and displayed to warn of a potentially unsafe condition. The CableTool will also inject a tone onto the conductor for tracing cables installed in walls and ceilings with a standard tone probe. The universal test leads allow for a wide range of adapters to be used for any connector type.

Includes:

- 1 CT50 Multifunction Cable Tool
- 2 Test Leads with Alligator Clips (one red and one black)
- 4 AA Batteries
- 1 Carrying Case
- Instruction Sheet

Item#	Description	MSRP
29404	Psiber Cable Tool Multifunction Cable Meter.....	\$279.99

Psiber® LanMaster 35 Power & Link Tester

29432

Tests network cable pairs for Power over Ethernet (PoE)

The Psiber LanMaster 35 is used for installing and maintaining Local Area Networks (LAN) using Power over Ethernet (PoE). The LanMaster 35 Power and Link Tester conducts power tests with actual loads to ensure that when a powered device such as a VoIP phone, wireless access point or security camera is connected to the network it will operate properly. The LanMaster 35 identifies whether power is IEEE 802.3af® compliant or a legacy configuration, such as Cisco Inline power, for correctly connecting powered devices. The LanMaster 35 provides link speed and duplex mode testing capabilities for verifying connectivity of a powered or unpowered 10/100/1000BaseTX Link. The unit measures cable length and can be connected to a wall outlet to identify a connected port on a switch or hub. The LanMaster 35 is an essential tool for installing and maintaining networks that utilize the latest PoE technology.

- Tests network cable pairs for Power over Ethernet (PoE)
- Simulates a network device for making power measurements under actual loaded conditions
- Displays voltage, polarity and mid-span or phantom configuration for powered wire pairs
- Identifies damaged cables and bad punchdowns by measuring wiring Loop Resistance
- Detects 10/100/1000 BaseTX link speed and duplex mode
- Measures cable length and open or short condition
- Provides Port ID function (link light activation) for identifying connected ports
- Applies a tone signal for tracing cables with the CT15 CableTracker Tone Probe

Item#	Description	MSRP
29432	Psiber LanMaster 35 Power And Link Tester.....	\$359.99

TOOLS & TESTING SOLUTIONS

Psiber® LanMaster 30 Outlet Identifier

29405

Quickly test a wall outlet and identify the type of circuit

The LanMaster 30 Outlet Identifier is an essential tool for any user responsible for managing, installing or maintaining network or telecom systems. The Model LM30 eliminates guessing when connecting telephones, modems, fax machines and computers to the RJ45 jacks of a wall outlet. It will identify a 10baseT Link, 100baseTX Link, Token Ring Link, Analog Telephone, PBX or ISDN Line. The unit also will warn the user if unidentified signals are present at the jack or if the jack is not connected. Connecting equipment to an untested wall outlet can damage the installed device if the outlet does not have a compatible electrical interface. The LanMaster 30 scans all 8 wires connected to an RJ45 outlet to identify the type of system connected or the presence of potentially harmful unknown signals. Identifying outlet connections with the Model LM30 reduces time troubleshooting physical layer problems and tracing cables to identify the far end equipment.

Item#	Description	MSRP
29405	Psiber LanMaster 30 Outlet Identifier.....	\$219.99
29409	Psiber LanMaster 30 Accessory Kit	\$19.99

Psiber® LanMaster 20 Link Tester

29407

Decode link signals in just three seconds

The LanMaster 20 Link Tester provides LAN Installers and Maintainers a tool to quickly test Fast Ethernet (100baseTX) and Standard Ethernet (10baseT) links. Fast Ethernet LAN products have a wide range of new features and capabilities. Auto-sensing, auto-negotiation and full duplex capabilities are optional requirements to the fast Ethernet (IEEE 802.3u®) standard. Knowing equipment capabilities is essential to optimizing network system performance. In just three seconds, the LanMaster 20 decodes the link signals and displays the exact configuration of the equipment connected to the link. The Model 20 also verifies link connectivity to the far end, tests for reported faults and determines polarity of the outlet or cable.

Item#	Description	MSRP
29407	Psiber LanMaster 20 Link Tester.....	\$199.99
29408	Psiber LanMaster 20 And 25 Accessory Kit.....	\$19.99

Psiber® LanMaster 25 Deluxe Link Tester

29406

Quickly test a wall outlet and identify the type of circuit

In just seconds, test fast Ethernet (100Base-TX) and standard Ethernet (10Base-T) LAN links for connectivity and far-end equipment configuration. The LanMaster 25 tests active LANs to quickly verify link operation and provide critical link speed (10 or 100Mbps), duplex mode (half or full) and auto-negotiation information. The LanMaster 25 transmits a link signal to the network device, verifying round-trip connectivity and negotiating capability on 10/100 devices. The LanMaster 25 includes a link activation port ID feature to identify user port location on active networks by transmitting link signals back to the far end equipment and flashing the link light on the connected hub or switch port. The LanMaster 25 generates a tone signal for tracing cables with a standard tone probe without carrying additional test equipment.

Item#	Description	MSRP
29406	Psiber LanMaster 25 Deluxe Link Tester	\$189.99
29408	Psiber LanMaster 20 And 25 Accessory Kit.....	\$19.99

Psiber® Cable Tracker Network ID Complete Kit

29400

Designed for network managers and technicians

Toning an active LAN circuit can disrupt network traffic and is difficult to track due to cable twist and tone bleed. The Cable Tracker Network Tone and Probe Kit model CTK1015 features a Port ID function that blinks the link light to verify cable connectivity. This feature also provides a simple and effective method to identify switch or hub port assignments on active networks. Three different blink rates are provided to ensure compatibility with equipment from a wide range of manufacturers. Traditional toning with two different tone frequencies and patterns is provided for non-active circuit tracing. Detachable alligator clips are included for connecting to punchdown blocks or unterminated cables. The Cable Tracker Network Probe Model CT15 incorporates volume control, non-conductive plastic tip, and complete compatibility with existing toners.

- Tests active and inactive (dark) cables
- Transmits four audible tones
- Easy cable connection for RJ45 jack, patch cable or alligator clips
- Detects shorts using built-in continuity check
- Probe is ergonomically designed and provides an adjustable volume control

TOOLS & TESTING SOLUTIONS

Fiber Break Tester

27555

Sends a visible red laser light down the fiber locating any breaks or unseen faults

The Fiber Break Tester is a pocket-size tool that sends a visible red laser light through fiber optic cables. Breaks or faults in the fiber will refract the light, creating a bright glow around the faulty area. The universal connector can be used for all common fiber interfaces.

- Connector: Universal (2.5mm ferrule)
- Wavelength: 635 + 20nm @25°C
- Output Power: <5mW
- Spectral Width: <10nm
- Transmission: Continuous or 3Hz pulsed
- Range: Visibility up to 3km
- Power: 2 AAA 1.5V Alkaline Batteries

Item#	Description	MSRP
27555	Fiber Break Tester	\$199.99

Duplex 62.5/125mm & 50/125mm SC Loopback Testers

26984

Quickly test any wall outlet and identify the type of circuit

Provides a looped signal from source for testing Fiber Loopback from the source device to hardware for testing purposes. This allows for a signal check for both the transmit and receiving functions.

- Connector: SC, LC, MTRJ
- Cable Type: Multimode, 62.5/125 or 50/125
- Durability: Over 500 cycles (≤ 0.2 dB change)
- Reflectance: 20dB min

Item#	Description	MSRP

TelCheck Pro

23572

Quickly check if a telephone line is an analog or digital signal

The TelCheck Pro is an enhanced phone line checker with noise filter that alerts you of reversed polarity, overcurrent conditions and digital phone lines that carry a much higher current than analog lines. Designed to be used with modem-enabled laptops, its built-in noise filter eliminates radio frequency interference (RFI) that can interrupt your Internet connection.

- Connectors:
 - Input: RJ11 6P4C Jack
 - Output: RJ11 6P4C Jack
- Quickly check if the line is analog signal
- Tells you if the line is overcurrent
- Prevents your modem from damage by plugging in an incorrect telephone system
- Easy to identify the connecting status of the line whether it is a new installed line or an existing line
- Compact and easy operation
- Line noise filter reduces RFI interference

Item#	Description	MSRP
23572	TelCheck Pro	\$29.99

Modular Cable Termination & Test Kit

29575

Modular RJ45 crimp tool and cable tester economically priced

This is the tool kit that every installer of utp needs in their tool box. The crimping tool cuts, strips and crimps RJ45 connectors onto unshielded twisted pair cable. The cable tester will quickly identify correct or incorrect wiring, reversed or open, for EIA/TIA-568A, EIS/TIA-568B, AT&T 258, Ethernet 10Base-T and token ring.

- Warranty: 90 Days
- Color: Various
- Mfr: Cables To Go
- Weight: 2.5lbs

Item#	Description	MSRP
19579	RJ11/RJ45 Crimp Tool With Cable Stripper	\$44.99

19579

RJ45 Ratchet Action Crimping Tool

Quickly and easily crimps RJ45 connectors

- Quickly and easily crimps RJ45 connectors
- Ratchet-action delivers quick and accurate crimping motion
- Heavy-duty jaws hold connector securely
- For use with RJ45 modular plugs

Item#	Description	MSRP
04623	Ratchet-Action Crimping Tool.....	\$34.99

04623

Universal Crimping Frame (without Die)

High quality ratchet-type crimp tool; Interchangeable dies provide versatility

- High quality ratchet-type crimp tool for electricians, contractors and installers
- Ratcheted crimp action provides repeatability and reliability
- Interchangeable dies provide versatility (sold separately)
- Cushioned comfort-grip handles
- For Die, use Die Set #19954 or #19955

Item#	Description	MSRP
19953	Universal Crimping Frame (Without Die).....	\$34.99

19953

TOOLS & TESTING SOLUTIONS

Flat Ribbon Cable Crimp Tool

Crimps IDC connectors onto your ribbon cable

Terminating Flat Ribbon connections can be both tricky and tedious. The Flat Ribbon Crimping Tool from Cables To Go allows you to terminate most flat ribbon IDC connectors with minimum effort and maximum efficiency.

04597

Item#	Description	MSRP
04597	Flat Ribbon Cable Crimp Tool	\$24.99

Ratcheting Crimp Tool

For crimp-style connector installation

A ratcheting crimp tool reduces fatigue on your hand by reducing the amount of pressure needed to crimp the connector. Accommodates RG58, RG59 and RG6 connectors, and the laminated steel construction.

- Accommodates RG58, RG59 and RG6
- For use with "F" Connectors
- Lifetime warranty

38009

Item#	Description	MSRP
38009	Ratcheting Crimp Tool	\$27.99

Professional RG58/59/62 Crimp Tool

Crimps hex connectors with diameters of 0.068in, 0.213in and 0.255in

- Crimps hex connectors with diameters of 0.068in, 0.213in and 0.255in
- Offers adjustable crimping pressure
- Heavy-duty jaws for long life
- For use with F-connectors
- For use with Hex Crimp "F" Connectors

04606

Item#	Description	MSRP
04606	RG58/59/62 Crimp Tool.....	\$27.99

Hex Crimp Tool

Economical hex crimp tool for "F" and BNC Connectors

- Accommodates RG59 and RG6 connectors
- For use with Hex Crimp "F" Connectors
- Lifetime warranty

38010

Item#	Description	MSRP
38010	Hex Crimp Tool.....	\$19.99

F-Connector Crimp Tool

Crimps RG59/62 and RG6 hex-style connectors

- Crimps RG59/62 and RG6 hex-style connectors
- Durable steel frame
- Padded hand grips
- Ideal for CATV and satellite TV installations

04625

Item#	Description	MSRP
04625	F-Connector Crimp Tool.....	\$9.99

Self-Adjusting Wire Stripper

The ideal tool for stripping wire

- Perfect for removing outer jacket from multi-conductor cable
- Accommodates wire from 30-40AWG
- Built-in wire cutter
- Lifetime warranty

38007

Item#	Description	MSRP
38007	Self-Adjusting Wire Stripper	\$7.99

Precision Wire Stripper

For technicians and installers of network and A/V systems

- Contoured handle for repetitive use
- Accommodates wire from 12-22AWG
- Clamp holds wire in place while stripping
- Lifetime warranty

38008

Item#	Description	MSRP
38008	Precision Wire Stripper	\$14.99

TOOLS & TESTING SOLUTIONS

Precision Coax Cable Strippers

Prepare coax cable for termination quickly and neatly

The two-step stripping tool first cuts the cable down to the center conductor cleanly without possible damage or nicks that will reduce signal quality. The second step removes the outer jacket without removing the braid. The two-stage design of the tool holds the cable firmly in place as it strips the insulation from the cable.

- Two-stage tool grips the cable firmly as it is stripped
- Two-step cutting die prepares the cable without damage to the conductors
- Contoured handles make the tool comfortable to use all day long

38100

Item#	Description	MSRP
38100	RG-6 Precision Cable Stripper	\$24.99
38101	RG-6Q Precision Cable Stripper	\$24.99
38102	RG-59 Precision Cable Stripper	\$24.99

Mini Coax Cable Stripper

Adjustable miniature coax wire stripper

Adjustable miniature coax wire stripper for use with Miniature Coaxial Cable and Compression Connectors (#40986-40997)

40998

Item#	Description	MSRP
40998	Mini Coax Cable Stripper.....	\$14.99

Universal Coax Cable Stripper

Strips RG58, RG59 and RG6 cable

- Strips at two different lengths: 4mm and 8mm
- No need to adjust V block when changing cable types

04592

Item#	Description	MSRP
04592	Universal Coax Cable Stripper	\$17.99

Fully Adjustable Coax Cable Stripper

Strips RG174, RG58, RG59 and RG6 cable

- Strips in four lengths: 4, 6, 8 and 12mm
- Spring loaded jaws hold cable while rotating motion strips outer jackets

04627

Item#	Description	MSRP
04627	Fully Adjustable Coax Cable Stripper.....	\$19.99

Ideal Cyclops Wire Stripper For UTP & STP

Removal of outer insulation from all unshielded and shielded twisted pair cables

- Fast, easy removal of outer insulation from all unshielded twisted pair, shielded twisted pair and multi-core cables
- Works on PVC and plenum type insulation

09732

Item#	Description	MSRP
09732	Ideal Cyclops Wire Stripper For UTP & STP	\$62.99

3-Step Coaxial Wire Stripper

Adjustable coaxial wire stripper

- Adjustable coaxial wire stripper
- For popular dual crimp BNC/TNC and Thinnet BNC connectors
- Strip is for MIL-C-39012 connectors
- Strip braid 0.328in (8.2mm) and dielectric 0.109in (2.7mm)

19950

Item#	Description	MSRP
19950	3-Step Coaxial Wire Stripper	\$19.99

Cable Cutting Shear

For round cables including coax and network cable

This round cable-cutting shear is better for cutting coax than traditional diagonal cutters and pliers. A diagonal cutter or pliers will crush the cable as it cuts while a shear will slice through the cable. The slicing action of the shears won't distort the cable's shape ensuring proper signal transmission.

- Doesn't crush the cable as it cuts
- Cushioned handle for added comfort
- Lifetime warranty

38012

Item#	Description	MSRP
38012	Cable Cutting Shear.....	\$5.99

TOOLS & TESTING SOLUTIONS

Coax Hex Crimping Tool For RG6 Quad Shield Cable

38026

Economical hex crimp tool for RG6 Connectors

- Accommodates RG59 and RG6 Connectors
- Laminated steel construction
- Cushioned handle
- Lifetime warranty

Item#	Description	MSRP
38026	Coax Hex Crimping Tool For RG6 Quad Shield Cable	\$19.99

Spring Action Flat Ribbon Cable Cutter

04618

Ideal tool for cutting flat ribbon cable

- The ideal tool for cutting flat ribbon cable
- Spring action and soft plastic grips for ease-of-use
- Blade lock for safe storage

Item#	Description	MSRP
04618	Spring Action Flat Ribbon Cable Cutter	\$9.99

Round Cable and Wire Cutter

19952

Cuts RG58 and RG6 coaxial cable

- Cuts RG58 and RG6 coaxial cable
- Curved cutting blades maintain cable geometry for better cable performance
- Steel reinforced center conductors can be trimmed with built cutting holes
- Cushioned comfort grip handles
- Locking latch keeps tool closed in pouch

Item#	Description	MSRP
19952	Round Cable and Wire Cutter	\$12.99

Precision Universal Pliers

38003

Technician tools for precise work and tight spaces

The bent nose pliers give you extra leverage when prying on a stubborn piece. The diagonal cutters are ideal for cutting small gauge wire. The long nose pliers are ideal for gripping small parts and getting into tight spaces. Lifetime warranty.

Item#	Description	MSRP
38001	4in Flush Cutting Pliers	\$5.89
38002	4.5in Long Nose Pliers	\$4.99

Item#	Description	MSRP
38003	4.5in Bent Nose Pliers	\$4.99
38004	5in Diagonal Cutter	\$6.99
38005	5in Long Nose Pliers With Cutter	\$6.99

110 Impact Punchdown Tool

05955

Termination of telephone and high-speed network data cables

- For termination of telephone and high-speed network data cables
- Impact punchdown tool with impact mechanism inside divided from a turnable body
- Rugged frame with storage compartment in the body of the tool for storing one blade
- Blades are easily changed without using a screwdriver
- Blades made from hardened SNCM-21 and are interchangeable and reversible

Item#	Description	MSRP
05955	110 Impact Punchdown Tool	\$34.99

110/88 Non-Impact Punchdown Tool

04607

Economical tool for punching down 110 blocks

- Reversible blade with cutting/non-cutting edges
- Tool less blade removal
- Uses interchangeable blades

Item#	Description	MSRP
04607	110/88 Non-Impact Punchdown Tool	\$19.99

TOOLS & TESTING SOLUTIONS

Keystone Punchdown Puck

33100

An easy, secure way to hold keystones for punchdown

The Keystone Punchdown Puck from Cables To Go fits in the palm of your hand and securely holds keystones while you punch them down. It also provides a solid surface to ensure proper seating of the wire in the jack.

Item#	Description	MSRP
33100	Cables To Go Keystone Punchdown Puck	\$5.99

110 Terminal Block Punchdown Tool

04628

For punching down 4-pair UTP 24AWG cable onto terminal blocks

- For punching down 4-pair UTP 24AWG cable onto terminal blocks
- Punches and cuts in one motion
- Comfort-grip rubber handle
- Reduces time and fatigue by punching down 4-pairs at once

Item#	Description	MSRP
04628	110 Terminal Block Punchdown Tool	\$79.99

Replacement Blades For Punchdown

04608

Replacement blades

Note: For use with 05955

04611	66 and 110/88 Blade - Non-Cutting Reversible	\$11.99

F-Type Connector Combination Tools

04630

Having the right tool can make all the difference

This unique dual-tool aids in terminating "F" connectors. One end flares the coax cable making insertion of the connector much easier. The other end of the tool provides leverage while inserting the connector onto the cable. The insertion tool also protects your finger from injury by the cable center conductor.

- Flares cables for easier connector insertion
- Provides leverage for connector termination

Item#	Description	MSRP
04619	RG59 F-Type Connector Combination Tool.....	\$9.99
04630	RG6 F-Type Connector Combination Tool.....	\$9.99

F-Connector & BNC Installation/Removal Tool

04621

Socket-style head firmly grasps to lock or unlock in hard-to-reach spaces

- Ideal for installers
- Socket end easily inserts and extracts
- For hard to reach spaces

04602

Item#	Description	MSRP
04621	12in F-Connector Installation/Removal Tool	\$14.99
04602	6.5in BNC Installation/Removal Tool	\$14.99

13 Piece Knife Set

38017

For Technicians and Installers of Network and A/V systems

- 3 handles with blades/10 replacement blades
- Convenient carry case

Item#	Description	MSRP
38017	13 Piece Knife Set	\$11.99

TOOLS & TESTING SOLUTIONS

50ft Steel Fish Tape - 1/8in

Helps with conduit bending plus wire fishing and pulling

- Durable blue steel tape resists kinking, breaking and corrosion 2100lbs tensile strength
- Convenient handle winds tape smoothly without kinks or jams
- Textured case surface provides positive grip
- Impact-resistant plastic case

Item#	Description	MSRP
19958	50ft Steel Fish Tape - .125in	\$29.99

19958

Bulk Cable Roller & Cable Dispenser

No more fumbling with cumbersome and heavy cable spools and drums

The Cable Roller is the easiest way to manage heavy spools of cable. Simply set the drum onto the heavy-duty ball bearing rollers and pull cable effortlessly! The built-in ramp on the front will prevent back strain by allowing you to roll the cable into place.

- Heavy-duty ball bearing rollers will support cable spools up to 250lbs
- Adjustable roller positions for cable spools from 10in to 40in in diameter
- Accommodates spools up to 17.5in wide

Item #	Description	MSRP
43112	Cable Roller & Cable Dispenser	\$249.99

43112

40 Watt Hot Melt Glue Gun

Bonds most materials in seconds - without clamping

- Trigger control for precise adhesive flow
- Contoured grip provides added comfort
- Built-in stand folds away during use
- 40 Watt heating element

Item#	Description	MSRP
38023	40 Watt Hot Melt Glue Gun	\$11.99
38024	Clear Hot Melt Glue Stick (10pcs)	\$7.99

38023

Soldering Iron Stand

Safety spring-type holder for hot iron tips

Keep your soldering iron safe and at hand with this solder station. The safety spring design keeps the hot iron away from work and lessens the chance of a dangerous burn. A sponge receptacle keeps a sponge at hand for cleaning residue from the iron's tip.

Item#	Description	MSRP
27447	Soldering Iron Stand	\$9.99

27447

1mm Lead-Free Solder Rosin Core - 1lb

Get a more reliable solder joint for all of your tasks without the concern of using solder containing lead

Featuring a chemistry of 99.3% tin and 0.7% silver, is ideal for general purpose soldering tasks. Rosin in the solder core melts before the solder and chemically cleans the surfaces for a more reliable solder joint.

- Lead-free to alleviate concerns about the environment and your health
- 99.3% tin and 0.7% silver; Rosin core for reliable solder joints

Item#	Description	MSRP
38027	1mm Lead-Free Solder Rosin Core - 1lb.....	\$34.99

38027

2mm Solder Wick

Quick and effective

- 5ft in length
- Removes solder
- Plastic reel organizer
- 2mm x 5ft roll

Item#	Description	MSRP
27449	2mm Solder Wick.....	\$4.99

27449

Helping Hands With Magnifier

Holds small wires and components for assembly

Every technician will eventually need a little extra help when soldering or assembling a project. Pieces and parts get too small to handle. The Helping Hands from Cables To Go are always there for you. Two small adjustable clips hold at almost any angle. The magnifier helps even the sharpest eye see details. The sturdy cast metal base stays in place throughout the operation.

- 2 adjustable clips; integrated magnifier
- Sturdy cast metal base

Item#	Description	MSRP
38022	Helping Hands With Magnifier.....	\$6.99

38022

TOOLS & TESTING SOLUTIONS

Insertion/Extraction Tool

04617

Use a tool that's designed for the job

Use this tool when filling and/or removing terminals from D-sub housings. Fits contacts for 22AWG wire in standard and high-density housings.

Item#	Description	MSRP
04617	Insertion/Extraction Tool.....	\$4.99

7in Aluminum Solder Pump

27444

Quickly and easily clear away molten solder

Quickly and easily clear away molten solder from a PCB joint. Made from heavy-duty aluminum to provide a long service life. The aluminum solder pump has a plastic screw for the anti-static tip to isolate the technician from the work. Low recoil won't cause the tool to jump when operating.

Item#	Description	MSRP
27444	7in Solder Pump	\$6.99

16 Piece Jeweler Screwdriver Set

38014

For technicians and installers of network and A/V systems

- Plastic case keeps tools organized
- Six-slotted head screwdrivers: 1.0, 1.4, 2.0, 2.4, 3.0 and 3.8mm
- Four-Philips head screwdrivers: #0-2, 0, 1 and 1-1
- Three hex drivers: 1.5, 2 and 2.5mm
- Three nut drivers: 3, 4 and 5mm
- Includes a cross bar to loosen stubborn screws

Item#	Description	MSRP
38014	16 Piece Jeweler Screwdriver Set.....	\$12.99

6 Piece Precision Screwdriver Set

38013

For technicians and installers of network and A/V systems

- Four-slotted head screwdrivers: 1mm, 1.6mm, 2.4mm and 3mm
- Two-Philips head screwdrivers: #0 and #1 point
- Lifetime warranty

Item#	Description	MSRP
38013	6 Piece Precision Screwdriver Set.....	\$5.99

Cable Quick Tie Kit With Gun

13407

Ideal for installation, field repair and maintenance

This convenient Cable Quick Tie Kit is ideal for wiring installations, field repairs and maintenance. Each kit contains all the necessary items for cable management, including (100) 4in, 5.75in and 8in cable ties, (50) adhesive mounts (4-way) and one attachment tool. Contained in a durable plastic box, this Cable Tie Kit is sure to be your most efficient source for all your cable management needs. Replacement strips for the 4in and 8in kits are available, as well as 11in ties for larger cabling applications.

Item#	Description	MSRP
13407	Cable Quick Tie Kit With Gun	\$69.99

8 Piece Insulated Screwdriver Set

38015

A/V and network technicians know these screwdrivers are a must

- Four-slotted head screwdrivers: 1.12in x 3in, 0.16in x 4in, 0.2in x 5in and 0.25in x 6in
- Three-Philips head screwdrivers: #0 x 3in, #1 x 4in, #2 x 6in
- Voltage tester screwdriver
- Lifetime warranty

Item#	Description	MSRP
38015	8 Piece Insulated Screwdriver Set.....	\$12.99

6-In-1 Screwdriver

38016

Handy tool for technicians and installers of network and A/V systems

- Two-slotted head screwdrivers: 1/4in and 3/16in
- Two-Philips head screwdrivers: #1 and #2
- Two nut-drivers: 5/16in and 1/4in
- High impact red handle
- Lifetime warranty

Item#	Description	MSRP

New Technology Solutions Perfect For Education

Cables To Go has your A/V education needs covered! From plenum solutions to multiple configurations, Low-profile connectors and conduit applications, we have a solution that fits your needs. If you don't see what you're looking for, we also have custom solutions, so be sure to ask your account manager for details.

RapidRun®

RapidRun is an award-winning, audio/video modular cabling system that eliminates field terminations. It is a perfect solution for the classroom and contains Wall Plate and Runner configurations specifically designed for the education market.

Ideal For:

Conduit applications
Future upgrades

Premium-quality concerns
Multiple signals and configurations

Classic Series Wall Plates & Plenum Cables

This solution contains multiple options for Brushed Aluminum Wall Plates and Plenum Cabling required in a typical, education bid.

Ideal For:

Plenum cable requirements
Traditional connectivity

Budget constrictions
Low-profile connectors

Contact your account manager today and let us help you determine which solution & products are the best fit for your next education bid.

CablesToGo™
Service Through Every Connection

3555 Kettering Blvd • Moraine, Ohio 45439
1.800.287.2843 • www.cablestogo.com

We're celebrating 25 years as a cabling and connectivity provider! We wouldn't be where we are today without the support of our valued resellers and distributors, and we offer a sincere "thank you" from our entire team.

As we enter the next chapter in our company's history, our guiding principle remains our commitment to providing an extraordinary customer experience. By working together we'll continue to achieve mutual success!

Here's to the next 25 years...
